Analysis

Total expenditures for support in 1957-58 amount to $1,455,142, an increase of $137,585 or 10.4 percent over 1956-57.

The $107,401 increase in salaries and wages represents $41,460 for 9 new positions to staff a 15-bed unit for a proposed day-night hospital, $46,992 for 8 psychiatric residents, $16,959 for 5.2 food service and maintenance positions to meet work load, $25,536 increased cost of authorized positions, and $23,546 increase in salary savings.

Operating expenses show a net increase of only $1,246 due primarily to increases in medical supplies of $12,120 and feeding of $6,273 offset by $17,500 reimbursement for Services to Alcoholic Rehabilitation Commission in current year which is not budgeted for 1957-58.

The $28,970 for equipment is composed of $15,251 for replacement, 5.9 percent of equipment investment on June 30, 1956, and $13,719 for additional equipment. Equipment complement for new positions and books for the medical library are the major additional items.

GENERAL ANALYSIS

Number of positions	*6.4*	*14.4*	*47.3*	*32.9*

The Neuropsychiatric Institute is to be built as a part of the Medical School of the University of California at Los Angeles. The institute is now housed in temporary quarters assigned by the University pending construction of permanent buildings.

In order to meet the teaching needs of the school of medicine a limited program including operation of an outpatient clinic was authorized in the 1956-57 Budget. During the current fiscal year the increasing teaching needs of the University have required additional funds, which have been provided by the University, for further expansion of the outpatient clinic operations.

For 1957-58 it is proposed that the Department of Mental Hygiene assume full support of the expanded outpatient clinic program to meet the teaching needs of the medical school and in preparation for the ultimate opening of the Neuropsychiatric Institute.

For this purpose 33 additional positions costing $161,682 are proposed, operating expenses are increased in the amount of $22,281, and $21,019 for additional equipment is related to the new positions.

GENERAL ANALYSIS				
Number of positions	*1,096*	*1,187.4*	*1,266.1*	*78.7*
POPULATION AND UNIT COSTS				
Average population	4,285	4,110	4,050	—60
Per capita cost	$1,414	$1,716	$1,830	$114 (6.6%)

The net increase is due primarily to:

Proposed new positions, 80, totaling $315,630 (summarized below).

Increase net cost of authorized positions, $46,471, resulting from increases totaling $93,637 due to improved employment conditions and salary adjustments; less the amount of $47,166 budgeted in operating expenses for special repairs and maintenance projects in 1956-57.

Operating expense net increase of $33,660 resulting primarily from a reduction in care and welfare, and support and subsistence of $14,280 due to population and price changes; reduction in special repairs and maintenance of $13,600; increase in recurring maintenance of $12,900; plus the $47,166 budgeted in special repairs and maintenance projects for 1956-57 and subsequently transferred to salaries and wages.

Equipment decrease of $600. The requested total of $80,857 is composed of $53,667 for replacement and $27,190 for additional; of which, the principal additional items are for new positions, medical books and medical and rehabilitation items.

PROPOSED NEW POSITIONS (For summary by department-wide program, see page 536)

1 Administrative assistant to superintendent—Proposal is based on an organizational study recommendation to strengthen top administration of the hospital due to the growth and increased complexity of operations.

1 Service and supply assistant—Recommended in the organizational study to strengthen the hospital supply and services functions.

6 Psychiatrist II—1 position for increased work load and 5 to provide a 10 percent improvement in the psychiatrist staffing standard.

1 Clinical psychologist II—To provide a 5 percent increase in the staffing standard for this class.

1 Nurse-anesthetist—To have a qualified anesthetist available to meet the needs of the surgical and dental treatment programs.

19 Psychiatric technician trainee—19 additional positions together with 20 presently authorized positions are proposed to provide a 4½ percent improvement in ward nursing personnel standards. The 20 authorized positions are available for an improvement in service as a result of population estimate adjustments and ward reclassifications for patient care.

2 Recreation therapist } For a proposed 8 percent increase in the staffing standard for these members of the treatment
1 Occupational therapist } team.

1 Supervising psychiatric social worker I } For increasing the staffing standards for improving social services at the hos-
3 Senior psychiatric social worker } pital level.

3 Intermediate typist-clerk—To meet the clerical work load of the new professional positions.

4 Intermediate typist-clerk—To increase the complement in order to provide 1 position for clerical duties at each area nursing office.

---

[a] Composed of savings in salaries and wages, $17,051; operating expenses, $26,497; equipment, $3,613; and gain in reimbursements, $2,339.

POPULATION AND UNIT COSTS				
Average population	1,156	1,128	1,150	22
Per capita cost	$1,700	$2,042	$2,176	$134 (6.6%)

Analysis

The net increase is due primarily to:

Proposed new positions, 30, totaling $110,328 (summarized below).

Increased net cost of authorized positions, $67,394, due to improved employment conditions and salary adjustments.

Operating expenses net increase of $6,388, resulting primarily from increases in recurring maintenance costs, $6,958, and farming and processing, $7,100; with the increase for farming operations offset by a decrease in support and subsistence of $8,761, based on additional local production to be consumed.

Equipment increase of $10,841. The requested total of $26,251 is composed of $3,500 for replacement and $22,751 for additional; of which the principal additional items are for new positions, medical books, medical care and rehabilitation equipment, maintenance items, and farming and dairy equipment.

PROPOSED NEW POSITIONS (For summary by department-wide program, see page 536)

1 Administrative assistant to superintendent—Proposal is based on an organizational study recommendation to strengthen top administration of the hospital due to growth and increased complexity of operations.

1 Psychiatrist II—1 position together with 1 presently authorized position are proposed for a 10 percent improvement in the psychiatrist staffing standard. The 1 authorized position is available for an improvement in service as a result of population estimate adjustments.

1 Physical therapist—To provide a position for physical therapy treatments as an integral part of the total treatment program for which a medical need and work load has developed.

1 Industrial therapist—For a proposed 8 percent increase in the staffing standard of these members of the treatment team.

18 Psychiatric technician trainee—7 positions for increased work load resulting from population estimate adjustments and ward reclassifications for patient care; and 11 positions to provide a 4½ percent improvement in ward nursing personnel standards.

3 Senior psychiatric social workers—2 positions for increased work load based on revised estimated annual admissions and 1 for increasing the staffing standards for improving social services at the hospital level.

1 Intermediate typist-clerk—To meet the work load of the new professional positions.

1 Intermediate typist-clerk—For clerical assistance in the superintendent of nurses office.

1 Intermediate typist-clerk—Provides 1 position for the basic clerical work load in the nursing education section to relieve nursing personnel of these duties.

1 Janitor—For work load increase on an area basis and to perform janitorial duties and supervise patient help engaged in cleaning operations.

1 Cook—Proposed on a work load basis to complete required post assignments for the cook staff.

---

[a] Composed of savings in salaries and wages, $6,413; operating expenses, $10,329; equipment, $1,821; and loss in reimbursements, $4,903.

[b] Composed of savings in salaries and wages.

POPULATION AND UNIT COSTS				
Average population	6,939	6,938	6,850	—88
Per capita cost	$1,224	$1,434	$1,543	$109 (7.6%)

Analysis

The net increase is due primarily to:

Proposed new positions, 125, totaling $513,258 (summarized below).

Increased net cost of authorized positions, $143,870, resulting from increases totaling $159,590 due to improved employment conditions and salary adjustments; less the amount of $15,720 budgeted in operating expenses for special repairs and maintenance projects in 1956-57.

Operating expense net increase of $6,511 resulting primarily from decreases in care and welfare, $2,358; support and subsistence $39,920; farming, $4,925; and increases for recurring maintenance, $20,300; light, heat and power, $9,120; special repairs and maintenance projects, $8,050, plus the amount of $15,720 budgeted in special repairs and maintenance for 1956-57 and subsequently transferred to salaries and wages.

Equipment decrease of $3,766. The requested total of $89,151 is composed of $55,062 for replacement and $34,089 for additional: of which the principal additional items are office equipment for new positions, housekeeping and laundry equipment medical books, medical, nursing, rehabilitation and maintenance equipment items.

PROPOSED NEW POSITIONS (For summary by department-wide program, see page 536)

1 Administrative assistant to superintendent
5 Chief of service (psychiatric)
1 Chief of service (medical and surgical)
} Proposal is based on organizational study recommendations to strengthen top administration of the hospital due to growth and increased complexity of operations.

5 Psychiatrist II—5 positions together with 2 presently authorized positions are proposed for a 10 percent improvement in the psychiatrist staffing standard. The 2 authorized positions are available for an improvement in service as a result of population estimate adjustments.

1 Nurse-anesthetist—To have a qualified anesthetist available to meet the needs of the surgical and dental treatment programs.

1 Psychiatric technician—As an assistant to the chiropodist for work load of scheduling and preparing patients for treatment and assisting with treatment.

2 Recreation therapist
3 Occupational therapist
} 5 additional positions together with 1 presently authorized position are proposed for an 8 percent increase in the staffing standard of these members of the treatment team. The authorized position is available for an improvement in service as a result of population estimate adjustments.

3 Assistant superintendent of nursing services—To provide additional assistance to the superintendent of nurses for overall planning and direction of hospital nursing services. Work load has increased along with the growth of the hospital and increased complexity of operations.

1 Supervising psychiatric nurse—To provide a position in the area nursing office for the added work load of supervision of nursing services in the Juvenile Unit.

(–) Clinical psychologist II—1 presently authorized position is available for a 5 percent increase in the staffing standard for this class. The position is available as a result of population and admissions estimate adjustments.

47 Psychiatric technician trainee—47 additional positions together with 17 presently authorized positions are proposed to provide a 4½ percent improvement in ward nursing personnel standards. The 17 authorized positions are available for an improvement in service as a result of population estimate adjustments and ward reclassifications for patient care.

(–) Supervising psychiatric social worker
2 Senior psychiatric social worker
} 2 additional senior positions together with 1 supervising and 3 senior psychiatric social worker positions, presently authorized, are proposed to increase the staffing standard for improving social services at the hospital level. The 4 authorized positions are available for an improvement in service due to revisions in annual patient admission estimates.

1 School teacher—Proposed for increased teaching work load of the juvenile unit school program.

6 Intermediate typist-clerk—To meet the work load of the new professional positions serviced from the central clerical pool.

4 Intermediate typist-clerk—To increase the complement in order to provide 1 position for clerical duties at each area nursing office.

---

[a] Composed of savings in salaries and wages, $24,682; operating expenses, $77,047; equipment, $758; and excess reimbursements, $6,243.

[b] Composed of savings in salaries and wages.

Department of Mental Hygiene

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57

GENERAL ANALYSIS—Continued

PROPOSED NEW POSITIONS—Continued

2	Intermediate stenographer-clerk—For increased work load of clinical conference reporting.
1	Intermediate typist-clerk—For increased work load in the personnel section based on 1 clerk for each 250 positions.
1	Intermediate typist-clerk—For increased work load of procurement section. Growth of the hospital has resulted in corresponding increases in volume of transactions for procuring materials, supplies and equipment.
1	Storekeeper I—Proposed for increased work load in the stores division due to population increase and hospital growth.
1	Supervising hospital police officer } To provide a basic police force with 1 officer on duty at all times for property protection, traffic control, and general security.
4	Hospital police officer
1	Groundsman—For maintenance of increased landscaped areas around the juvenile unit, employees' homes, physicians' apartments, and visitors' picnic area.
1	Electrician—For increased work load of maintaining the electrical facilities of this large hospital.
2	Housekeeper } Proposed for increased work load of 6 new nurses homes and the rehabilitation center.
1	Janitor
1	Institution food administrator I—Proposed to provide an effective level of supervision over the various units of the food service activity.
20	Food service assistant—16 positions are proposed to increase the level of service for supervision of working patients and handling and serving of food in congregate dining rooms. 3 positions are for assignment to kitchen duties of prefood preparation and sanitation and 1 position is for assistance to the butcher-meat cutter in preparing meat for the kitchen.
6	Assistant cook—Proposed on a work load basis to complete required post assignments for the cook staff.

Per capita cost	$1,369	$1,577	$1,629	$52 (3.3%)

Analysis

The net increase is due primarily to:

Proposed new positions, 47, totaling $200,628 (summarized below).

Increased net cost of authorized positions, $11,206, resulting from increases totaling $68,006 due to improved employment conditions and salary adjustments; less the amount of $56,800 budgeted in operating expenses for special repairs and maintenance projects in 1956-57.

Operating expense net increase of $66,900 resulting primarily from an increase in care and welfare, $3,314; support and subsistence, $18,567; recurring maintenance costs, $14,900; and a reduction in special repairs and maintenance of $27,000; plus the amount of $56,800 budgeted in special repairs and maintenance projects for 1956-57 and subsequently transferred to salaries and wages.

Equipment increase of $20,626. The requested total of $98,086 is composed of $63,069 for replacement and $35,017 for additional; of which the principal additional items are for new positions, kitchen and bakery equipment, medical books, and medical, nursing, and rehabilitation items.

PROPOSED NEW POSITIONS (For summary by department-wide program, see page 536)

1 Administrative assistant to superintendent—proposal is based on an organizational study recommendation to strengthen top administration of the hospital due to growth and increased complexity of operations.
4 Psychiatrist II—2 positions for increased work load and 2 to provide a 10 percent improvement in the psychiatrist staffing standard.
1 Clinical psychologist II—To provide a 5 percent increase in the staffing standard for this class.
1 Clinical laboratory technician—To provide a 5 percent increase in the staffing standard for laboratory workers.
1 Physical therapist—For increased work load in the physiotherapy department at the hospital.
1 Psychiatric technician—As an assistant to the chiropodist for work load of scheduling and preparing patients for treatment and assisting with treatment.
1 Recreation therapist }
1 Industrial therapist } For a proposed 8 percent increase in the staffing standard of these members of the treatment team.
16 Psychiatric technician trainee—16 additional positions together with 7 presently authorized positions are proposed to provide a 4½ percent improvement in ward nursing personnel standards. The 7 authorized positions are available for an improvement in service as a result of population estimate adjustments and ward reclassifications for patient care.
3 Senior psychiatric social worker—To provide for an increase in the staffing standards for improving social services at the hospital level.
2 Intermediate typist-clerk—To meet the clerical work load of the new professional positions.
2 Intermediate typist-clerk—To increase the complement in order to provide 1 position for clerical duties at each area nursing office.
1 Intermediate typist-clerk—For clerical assistance in the superintendent of nurses' office.
1 Intermediate typist-clerk—To provide a clerical position for the rehabilitation therapies office and 10 therapist positions.
1 Intermediate typist-clerk—For basic clerical work load of the clinical laboratory.
1 Intermediate typist-clerk—Provides 1 position for the basic clerical work load in the nursing education section to relieve nursing personnel of these duties.
1 Supervising hospital police officer }
2 Hospital police officer } To provide a basic police force with 1 officer on duty at all times for property protection, traffic control, and general security. 2 existing watchmen will provide the balance of positions required for round-the-clock coverage.
1 Assistant seamstress—Proposed for increased work load of supervision of patients in the sewing rooms. This activity is beneficial both for patient therapy and salvage and mending operations.
1 Institution food administrator I—To be in charge of and supervise the special diet kitchen and preparation of special meals.
1 Food service supervisor I—Proposed to increase the level of service for supervision of employees and patients working in congregate dining rooms.
3 Cook—To staff the special diet kitchen. There is a medical need for this service at the hospital.

---

[a] Composed of savings in salaries and wages, $1,321; operating expenses, $77,960; equipment, $4,012; and loss in reimbursements, $2,272.

MENDOCINO STATE HOSPITAL

A hospital for mental patients, located at Talmage, Mendocino County.

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriation	$3,489,692	$3,813,007	$4,183,837	
Transfers to other mental hospitals	—78,712	—41,205	–	
Allocations from Salary Increase Fund	–	251,201	–	
Total Available	$3,410,980	$4,023,003	$4,183,837	
Unexpended balance, estimated savings	—155,586[a]	—130,739[b]	–	
TOTALS, SUPPORT	$3,255,394	$3,892,264	$4,183,837	$291,573
Contributions to State Employees' Retirement Fund	202,461	242,674	260,047	17,373
TOTAL EXPENDITURES FOR SUPPORT	$3,457,855	$4,134,938	$4,443,884	$308,946 (7.5%)
GENERAL ANALYSIS				
Number of positions	*642.6*	*690.4*	*745.8*	*55.4*
POPULATION AND UNIT COSTS				
Average population	2,260	2,404	2,530	126
Per capita cost	$1,530	$1,720	$1,756	$36 (2.1%)

The net increase is due primarily to:

Proposed new positions, 64, totaling $222,816 (summarized below).

Increased net cost of authorized positions, $62,479, resulting from increases totaling $74,529 due to improved employment conditions and salary adjustments; less the amount of $12,050 budgeted in operating expenses for special repairs and maintenance projects in 1956-57.

Operating expense net increase of $56,072 resulting primarily from increases in support and subsistence, $22,396; recurring maintenance costs, $9,000; special repairs and maintenance projects, $12,050; plus the amount of $12,050 budgeted in special repairs and maintenance for 1956-57 and subsequently transferred to salaries and wages for like purposes.

Equipment increase of $15,215. The requested total of $88,905 is composed of $61,267 for replacement and $27,638 for additional; of which the principal additional items are office equipment for new positions, kitchen and shoe repair equipment, medical books, medical, nursing, and rehabilitation items, and building maintenance and farming equipment.

PROPOSED NEW POSITIONS (For summary by department-wide program, see page 536).

1 Administrative assistant to superintendent—Based on an organizational study recommendation to strengthen top administration of the hospital due to growth and increased complexity of operations.

1 Psychiatrist II—1 position together with 1 presently authorized position are proposed for a 10 percent improvement in the psychiatrist staffing standard. The 1 authorized position is available for an improvement in service as a result of population estimate adjustments.

1 Clinical psychologist II—To provide a 5 percent increase in the staffing standard for this class.

1 Nurse-anesthetist—To have a qualified anesthetist available to meet the needs of the surgical and dental treatment programs.

1 Psychiatric technician—As an assistant to the chiropodist for work load of scheduling and preparing patients for treatment and assisting with treatment.

1 Recreation therapist—1 additional position together with 1 presently authorized position are proposed for an 8 percent increase in the staffing standard of these members of the treatment team. The authorized position is available for an improvement in service as a result of population estimate adjustments.

3 Senior psychiatric social worker—For increasing the staffing standards for improving social services at the hospital level.

(–) Psychiatric technician—24 presently authorized positions are available for a 4½ percent improvement in ward nursing personnel standards. These positions became available as a result of population estimate adjustments and ward reclassifications for patient care.

1 Intermediate typist-clerk—To meet the work load of the new professional positions.

1 Intermediate typist-clerk—To provide a clerical position for the rehabilitation therapies office and 10 therapist positions.

1 Intermediate typist-clerk—For basic clerical work load of the clinical laboratory.

1 Intermediate typist-clerk—Provides 1 position for the basic clerical work load in the nursing education section to relieve nursing personnel of these duties.

2 Intermediate typist-clerk—To increase the complement in order to provide 1 position for clerical duties at each area nursing office.

1 Intermediate clerk—For increased work load in the marking, linen and clothing room operations.

1 Supervising hospital police officer
4 Hospital police officer
} To provide a basic police force with one officer on duty at all times for property protection, traffic control, and general security.

1 Locksmith—For work load of replacement and repair of approximately 3,200 locks at this hospital.

2 Automotive equipment operators—For increased work load of transporting patients and materials based on post assignments required for adequate performance.

1 Canning assistant—For cannery operations work load and to provide a complement of 2 positions for the cannery.

1 Housekeeper—For additional work load based on area assignments and supervision of patient help.

1 Food service supervisor I
36 Food service assistant
} 1 food service supervisor and 32 food service assistant positions are proposed to increase the level of service for supervision of working patients and handling and serving of food in congregate dining rooms. 3 food service assistants are for kitchen assignments and the remaining position is for assisting with meat cutting duties.

1 Groundsman—For maintenance of increased landscaped areas around remodeled wards and other buildings.

---

[a] Composed of savings in salaries and wages, $67,644; operating expenses, $81,409; equipment, $593; and excess reimbursements, $5,940.

[b] Composed of savings in salaries and wages, $130,041; and operating expenses, $698.

POPULATION AND UNIT COSTS				
Average population	2,190	2,354	2,580	226
Per capita cost	$1,650	$1,949	$2,119	$170 (8.7%)

Analysis

The net increase is due primarily to:

Proposed new positions, 342, totaling $627,634 (summarized below).

Increased net cost of authorized positions, $90,918, resulting from increases totaling $123,222, due to improved employment conditions and salary adjustments; less the amount of $32,304 budgeted in operating expenses for special repairs and maintenance projects in 1956-57.

Operating expense net increase of $125,765, resulting primarily from an increase in administration, $6,976; care and welfare, $8,333; support and subsistence, $47,259; recurring maintenance costs, $10,500; special repairs and maintenance, $9,900; light, heat, and power, $11,493; plus the $32,304 budgeted in special repair and maintenance projects for 1956-57 and subsequently transferred to salaries and wages.

Equipment decrease of $9,576. The requested total of $47,731 is composed of $21,260 for replacement and $26,471 for additional; of which the principal additional items are for office equipment for new positions, medical books and nursing and personal care items.

PROPOSED NEW POSITIONS (For summary by department-wide program, see page 536).

1 Administrative assistant to superintendent—Proposal is based on an organizational study recommendation to strengthen top administration of the hospital due to growth and increased complexity of operations.

5 Psychiatrist II—2 positions for increased work load and 3 to provide a 10 percent improvement in the psychiatrist staffing standard.

1 Clinical laboratory technician—To provide a 5 percent increase in the staffing standard for laboratory workers.

1 Nurse-anesthetist—To provide a qualified anesthetist available to meet the needs of the surgical and dental treatment programs.

5 Supervising psychiatric technician—To provide 24-hour coverage for the establishment of an additional nursing area because of increased population.

16 Senior psychiatric technician II
32 Senior psychiatric technician I
227 Psychiatric technician trainee
275

Of the 275 proposed new positions, 205 are for staffing new ward buildings, 29 are for staffing existing wards where adjustments have occurred in patient classifications and population estimates, and 41 are proposed to provide a 4½ percent improvement in ward nursing personnel standards.

1 Recreation therapist
1 Occupational therapist

For a proposed 8 percent increase in the staffing standard of these members of the treatment team.

3 Senior psychiatric social worker—1 position for increased work load based on revised estimated annual admissions and 2 for increasing the staffing standards for improving social services at the hospital level.

1 Psychiatrist III
2 Psychiatrist II
1 Clinical Psychologist II
1 Senior psychiatric social worker
3 Intermediate stenographer-clerk
8

The 8 proposed positions represent the establishment of an after-care facility to be located at Metropolitan. The after-care facilities are needed as an integral part of a complete and fully balanced treatment program. The facilities will provide necessary psychiatric, medical, and therapy treatment at periodic intervals as necessary to patients who could be placed in the program. Such patients would receive their treatments during the day, being released to return home at night. The program would also provide appropriate assistance to relatives or friends which is an essential element of the complete and lasting rehabilitation of mental patients.

1 Intermediate stenographer-clerk—For increased work load of clinical conference reporting.

5 Intermediate typist-clerk—To meet the clerical work load of the proposed new professional positions which are serviced from the central clerical pool.

2 Intermediate typist-clerk—To increase the complement in order to provide 1 position for clerical duties at each area nursing office.

---

[a] Composed of savings in salaries and wages, $10,678; operating expenses, $38,157; equipment, $1,066; and loss in reimbursements, $10,549.

[b] Composed of savings in salaries and wages.

Department of Mental Hygiene

METROPOLITAN STATE HOSPITAL—Continued

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FRO 1956-57

MODESTO STATE HOSPITAL

ospital for mentally ill and mentally retarded patients, located near Modesto, Stanislaus County.

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
General Fund				
SUPPORT				
Budget Act appropriation	$4,493,894	$4,716,815	$5,306,882	
Transfers from other mental hospitals	–	14,111	–	
Allocations from Salary Increase Fund	80,000	293,825	–	
Total Available	$4,573,894	$5,024,751	$5,306,882	
Unexpended balance, estimated savings	—83,558[a]	—109[b]	–	
TOTALS, SUPPORT	$4,490,336	$5,024,642	$5,306,882	$282,240
Contributions to State Employees' Retirement Fund	270,398	308,156	322,362	14,206
TOTAL EXPENDITURES FOR SUPPORT	$4,760,734	$5,332,798	$5,629,244	$296,446 (5.6%)
GENERAL ANALYSIS				
Number of positions	*875.4*	*888.8*	*921.6*	*32.8*
POPULATION AND UNIT COSTS				
Average population	3,447	3,344	3,464	120
Per capita cost	$1,381	$1,595	$1,625	$30 (1.9%)

The net increase is due primarily to:

Proposed new positions, 34, totaling $145,632 (summarized below).

Increased net cost of authorized positions, $80,414 due to improved employment conditions and salary adjustments.

Operating expense net increase of $73,030 resulting primarily from increases in care and welfare, $4,177; support and subsistence, $29,343; recurring maintenance cost, $10,220; and special repair and maintenance projects, $32,600.

Equipment increase of $33,628. The requested total of $74,220 is composed of $41,541 for replacement and $32,679 for additional; of which the principal additional items are for new positions, laundry equipment, medical books, and medical, nursing and rehabilitation items.

PROPOSED NEW POSITIONS (For summary by department-wide program, see page 536)

1 Administrative assistant to superintendent—Proposal is based on an organizational study recommendation to strengthen top administration of the hospital due to growth and increased complexity of operations.
3 Psychiatrist II—1 position for increased work load and 2 to provide a 10 percent improvement in the psychiatrist staffing standard.
1 Clinical laboratory technician—To provide a 5 percent increase in the staffing standard for laboratory workers.
1 Psychiatric technician—As an assistant to the chiropodist for work load of scheduling and preparing patients for treatment and assisting with treatment.
1 Recreation therapist
1 Occupational therapist
2 additional positions together with 1 presently authorized therapist position are proposed to provide an 8 percent increase in the staffing standard of these members of the treatment team. The authorized position is available for an improvement in service as a result of population estimate adjustments.
3 Senior psychiatric social worker—1 position for increased work load and 2 positions for increasing the staffing standards for improving social services at the hospital level.
12 Psychiatric technician trainee—12 additional positions together with 18 presently authorized positions are proposed to provide a 4½ percent improvement in ward nursing personnel standards. The 18 authorized positions are available for an improvement in service as a result of population estimate adjustments and ward reclassifications for patient care.
1 Intermediate typist-clerk—To meet the clerical work load of the new professional positions.
2 Intermediate typist-clerk—To increase the complement in order to provide 1 position for clerical duties at each area nursing office.
1 Intermediate typist-clerk—For clerical assistance in the superintendent of nurses office.
1 Intermediate typist-clerk—For basic clerical work load of the clinical laboratory.
1 Intermediate typist-clerk—Provides 1 position for the basic clerical work load in the nursing education section to relieve nursing personnel of these duties.
1 Supervising hospital police officer
2 Hospital police officer
To provide a basic police force with 1 officer on duty at all times for property protection, traffic control, and general security. 2 existing watchmen will provide the balance of positions required for round-the-clock coverage.
1 Institution food administrator I—To be in charge of and supervise the special diet kitchen and preparation of special meals.
1 Food service supervisor I—Proposed to increase the level of service for supervision of employees and patients working in congregate dining rooms.

---

[a] Composed of savings in salaries and wages, $1,875; operating expenses, $81,722; equipment, $1,633; and loss in reimbursements, $1,672.

[b] Composed of savings in operating expenses.

Per capita cost	$1,317	$1,574	$1,657	$83 (5.3%)

Analysis

The net increase is due primarily to:

Proposed new positions, 142, totaling $551,674 (summarized below).

Increase in net cost of authorized positions, $166,178, resulting from increases totaling $188,678 due to improved employment conditions and salary adjustments; less the amount of $22,500 budgeted in operating expenses for special repairs and maintenance projects in 1956-57.

Operating expense net increase of $121,846 resulting primarily from increases in care and welfare, $5,696; support and subsistence, $45,070; recurring maintenance costs, $13,200; special repairs and maintenance projects of $28,740; plus the amount of $22,500 budgeted in special repairs and maintenance for 1956-57 and subsequently transferred to salaries and wages; and light, heat, and power, $5,787.

Equipment increase of $39,409. The requested total of $97,896 is composed of $59,513 for replacement and $38,383 for additional; of which the principal additional items are office equipment for new positions, kitchen and housekeeping items, medical books, and rehabilitation therapy items.

PROPOSED NEW POSITIONS (For summary by department-wide program, see page 536)

1 Assistant superintendent—treatment
3 Chief of service (psychiatric)
1 Chief of service (medical and surgical)
1 Chief of service (tuberculosis)
1 Administrative assistant to superintendent
1 Service and supply assistant
} Proposal is based on an organizational study recommendation to strengthen top administration of the hospital due to growth and increased complexity of operations.

3 Psychiatrist II—3 positions together with 2 presently authorized positions are proposed for a 10 percent improvement in the psychiatrist staffing standard. The 2 authorized positions are available for an improvement in service as a result of population estimate adjustments.

1 Clinical psychologist II—To provide a 5 percent increase in the staffing standard for this class.

1 Nurse-anesthetist—To have a qualified anesthetist available to meet the needs of the surgical and dental treatment programs.

1 X-ray technician—To meet the increased work load due to the activation of the new tuberculosis center at this hospital.

1 Rehabilitation therapist
2 Occupational therapist I
} 3 additional positions together with 1 presently authorized therapist position are proposed to provide an 8 percent increase in the staffing standard of these members of the treatment team. The authorized position is available for an improvement in service as a result of population estimate adjustments.

2 Supervising psychiatric nurse—To provide assistance to the area offices which have the juvenile and tuberculosis units within their areas.

4 Senior psychiatric social worker—For increasing the staffing standards for improving social services at the hospital level.

95 Psychiatric technician trainee—37 positions are for increased staffing of existing wards resulting from population estimate adjustments and ward reclassifications for patient care; 58 positions are proposed to provide a 4½ percent improvement in ward nursing personnel standards.

1 Intermediate stenographer-clerk—For increased work load of clinical conference reporting.

6 Intermediate typist-clerk—To meet the clerical work load of the new professional positions which are serviced from the central clerical pool.

3 Intermediate typist-clerk—To increase the complement in order to provide 1 position for clerical duties at each area nursing office.

1 Intermediate typist-clerk—For the personnel section in accordance with the work load standard of 1 personnel clerk per 250 authorized positions.

---

[a] Composed of savings in salaries and wages, $3,321; operating expenses, $75,374; equipment, $1,545; and loss in reimbursements, $15,749.

[b] Composed of savings in salaries and wages, $28,915; and loss in reimbursements, $1,642.

TOTAL EXPENDITURES FOR SUPPORT	$6,376,201	$7,328,725	$7,614,300	$285,575 (3.9%)
GENERAL ANALYSIS				
Number of positions	*1,215.3*	*1,279.1*	*1,338*	*58.9*
POPULATION AND UNIT COSTS				
Average population	4,330	4,258	4,275	17
Per capita costs	$1,484	$1,721	$1,781	$60 (3.5%)

Analysis

The net increase is due primarily to:

Proposed new positions, 64, totaling $240,120 (summarized below):

Increased net cost of authorized positions, $110,833, resulting from increases totaling $130,278 due to improved employment conditions and salary adjustments; less the amount of $19,445 budgeted in operating expenses for special repairs and maintenance projects in 1956-57.

Operating expense net increase of $2,728, resulting principally from increases in administration, $739; care and welfare, $1,769; support and subsistence, $7,525; and a reduction of $7,555 in maintenance and operation of plant; plus the amount of $19,445 budgeted in special repairs and maintenance projects for 1956-57 and subsequently transferred to salaries and wages.

Equipment net reduction of $3,521. The requested total of $84,228 is composed of $57,190 for replacement and $27,038 for additional; of which the principal additional items are office equipment for new positions, kitchen equipment, medical and nursing items, and building maintenance and farming equipment.

PROPOSED NEW POSITIONS (For summary by department-wide program see page 536)

1	Chief of service (tuberculosis)	These positions are based on an organizational study recommendation to strengthen top administration of the hospital due to growth and increased complexity of operations.
1	Administrative assistant to superintendent	
1	Service and supply assistant	
3	Psychiatrist II—3 positions together with 1 presently authorized position are proposed to provide a 10 percent increase in the psychiatrist staffing standard. The 1 authorized position is available for an improvement in service due to adjustments of the population estimate.	
(–)	Clinical psychologist II—1 presently authorized position is available for an improvement of 5 percent in the level of service. This position will become available as a result of adjustments of the population and patient admissions estimates.	
(–)	Supervising psychiatric social worker	1 supervising and 3 senior psychiatric social worker positions presently authorized become available for increasing staffing standards for improving social services at the hospital as a result of an adjustment in the population estimate.
(–)	Senior psychiatric social worker	
1	Supervising psychiatric nurse—To provide for additional work load in the tuberculosis unit.	
1	Nurse-anesthetist—To provide a qualified anesthetist for surgeons and dentists in connection with surgical and dental procedures.	
1	Recreation therapist	To provide for a proposed 8 percent increase in the staffing standard of these members of the treatment team.
2	Occupational therapist	
41	Psychiatric technician trainee—41 additional positions together with 3 presently authorized positions are proposed to provide a 4½ percent improvement in ward nursing personnel standards. The 3 authorized positions are available for improvement in service as a result of population estimate adjustments and ward reclassifications for patient care.	
2	Food service supervisor I	2 food service supervisors are proposed to increase the level of service for supervision of employees and working patients in the handling and serving of food in congregate dining rooms. 1 food service assistant is proposed on a post assignment basis to assist the butcher-meat cutter positions.
1	Food service assistant	
1	Groundsman—For increased work load of maintaining large landscaped areas.	
1	Steamfitter—To maintain and properly repair the various components of a heating system which serves 53 buildings from a central plant.	
1	Intermediate stenographer-clerk—For increased work load of clinical conference reporting.	
2	Intermediate typist-clerk—To provide for the increased work load in connection with the proposed new professional positions which are serviced from the central clerical pool.	
3	Intermediate typist-clerk—To increase the complement in order to provide 1 position for clerical duties at each area nursing office.	
1	Intermediate typist-clerk—To provide for the increased work load in the personnel section.	

---

[a] Composed of savings in salaries and wages, $5,697; operating expenses, $12,860; equipment, $1,466; and excess reimbursements, $6,478.

[b] Composed of savings in salaries and wages.

Analysis

The net increase is due primarily to:

Proposed new positions, 109, totaling $424,326 (summarized below).

Increase in salary savings estimate, —$101,542.

Increased net cost of authorized positions, $87,224, resulting from increases totaling $103,204 due to improved employment conditions and salary adjustments; less the amount of $15,980 budgeted in operating expenses for special repairs and maintenance projects in 1956-57.

Operating expense net increase of $15,567, resulting primarily from decreases in support and subsistence, $6,439; recurring maintenance costs, $4,760; special repairs and maintenance projects, $2,650; plus the amount of $15,980 budgeted in special repairs and maintenance for 1956-57 and subsequently transferred to salaries and wages; and the increase for light, heat, and power of $13,745.

Equipment increase of $15,165. The requested total of $97,044 is composed of $58,813 for replacement and $38,231 for additional; of which the principal additional items are office equipment for new positions, kitchen, and housekeeping items, medical books, medical, nursing and rehabilitation equipment.

PROPOSED NEW POSTIONS (For summary by department-wide program, see page 536):

1 Administrative assistant to superintendent—Proposal is based on an organizational study recommendation to strengthen top administration of the hospital due to the growth and increased complexity of operations.

1 Service and supply assistant—Recommended in the organizational study to strengthen the hospital supply and services function.

5 Psychiatrist II—To provide a 10 percent improvement in the psychiatrist staffing standard.

1 Nurse-anesthetist—To have a qualified anesthetist available to meet the needs of the surgical and dental treatment programs.

(–) Clinical psychologist II—1 presently authorized position is available for a 5 percent increase in the staffing standard for this class as a result of patient admission and population estimate adjustments.

1 Recreation therapist
1 Occupational therapist
2 positions together with 1 presently authorized position are proposed for an 8 percent increase in the staffing standard of these members of the treatment team. The authorized position is available for an improvement in service as a result of population estimate adjustments.

36 Psychiatric technician trainee—36 additional positions together with 12 presently authorized positions are proposed to provide a 4½ percent improvement in ward nursing personnel standards. The 12 authorized positions are available for an improvement in service as a result of population estimate adjustments and ward reclassifications for patient care.

1 Psychiatrist III
2 Psychiatrist II
1 Clinical psychologist II
1 Senior psychiatric social worker
3 Intermediate stenographer-clerk
—
8

The 8 proposed positions represent the establishment of an after-care facility at Stockton. The after-care facility is needed as an integral part of a complete and fully balanced treatment program. The facility will provide necessary psychiatric, medical, and therapy treatment at periodic intervals as necessary to patients who can be placed in the program. Such patients would receive their treatments during the day, being released to return home at night. The program would also provide appropriate assistance to relatives or friends which is an essential element of the complete and lasting rehabilitation of mental patients.

1 Supervising psychiatric social worker
5 Senior psychiatric social worker

1 senior psychiatric social worker for increased work load based on revised estimated annual admissions, and 1 supervising and 4 senior positions to increase the staffing standards for improving social services at the hospital level.

4 Intermediate typist-clerk—To meet the work load of the new professional positions which are serviced from the central clerical pool.

4 Intermediate typist-clerk—To increase the complement in order to provide 1 position for clerical duties at each area nursing office.

1 Intermediate stenographer-clerk—For increased work load of clinical conference reporting.

1 Groundsman—For increased work load of maintaining large landscaped areas.

1 Locksmith—For work load of replacement and repair of the large number of locks at this hospital.

---

[a] Composed of savings in salaries and wages, $320; operating expenses, $76,331; equipment, $1,109; and excess reimbursements, $4,369.

[b] Composed of savings in salaries and wages, $28,972; and operating expenses, $468.

GENERAL ANALYSIS

Number of positions	–	*114.4*	*182.5*	*68.1*
Average population	–	–	158	158

The budget for Fairview State Hospital is predicated on activation of the hospital, with a capacity of 200 beds, in July, 1957, and the receiving of patients starting in September, 1957.

Positions are now authorized on a staggered basis from January 1, 1957, in order that the initial hospital programs can be established and functioning when patients are received, and to accept responsibility for maintenance of the physical plant effective April 1, 1957.

Additional positions are proposed in this budget in the areas of medical and nursing care, social service, food preparation and service, and laundry service. Of the total 81 positions proposed, 51 are effective May 1, 1958, and relate to additional units to be activated in July, 1958. The establishment of these positions on May 1, 1958, will provide the necessary period for recruiting and training prior to activation of the related units.

The complement of employees budgeted for all of the various activities of this hospital is in accordance with that of other hospitals approved staffing standards.

Per capita cost	$1,588	$1,946	$2,022	$76 (3.9%)

Analysis

The net increase is due primarily to:

Proposed new positions, 135, totaling $455,040 (summarized below).

Increased net cost of authorized positions, $322,128, resulting from increases totaling $334,428 due to improved employment conditions, salary adjustments, and full-year cost of new positions authorized in current budget, less $12,300 budgeted in operating expenses for special repairs and maintenance projects in 1956-57.

Operating expenses net increase of $144,365 resulting primarily from increases in care and welfare, $16,190; support and subsistence, $83,511; recurring maintenance, $10,100; and special repairs and maintenance, $13,700; plus the amount of $12,300 budgeted in special repairs and maintenance for 1956-57 and subsequently transferred to salaries and wages.

Equipment decrease of $18,157. The requested amount of $76,762 is composed of $49,623 for replacement and $27,006 for additional; of which the principal additional items are office equipment for new positions, kitchen and housekeeping items, medical books and trucks for maintenance and operations.

PROPOSED NEW POSITIONS (For summary by department-wide program, see page 536.)

1 Administrative assistant to superintendent—Based on an organizational study recommendation to strengthen top administration of the hospital due to growth and increased complexity of operations.

1 Psychiatrist II—1 additional position together with 1 presently authorized position is proposed to provide a 10 percent improvement in the psychiatrist staffing standard. The 1 authorized position is available for an improvement of service due to adjustment of the population estimate and ward reclassifications for patient care.

1 Clinical psychologist II—1 position is proposed for an improvement of 5 percent in the level of service.

1 Public health nurse I—A position is proposed to perform public health nursing services to assist with the prevention and control of communicable diseases and instruct in public health procedures.

1 Nurse-anesthetist—To provide a qualified anesthetist for surgeons and dentists in connection with surgical and dental procedures.

1 Recreation therapist
1 Occupational therapist
} To provide for a proposed 8 percent increase in the staffing standard of these members of the treatment team.

66 Psychiatric technician trainee—22 positions are proposed for increased work load on existing wards due to adjustments of population estimates and ward reclassifications for patient care: 44 positions are proposed to provide a 4½ percent improvement in ward nursing personnel standards.

1 Psychiatrist III
2 Psychiatrist II
1 Clinical psychologist II
1 Senior psychiatric social worker
3 Intermediate stenographer-clerk
—
8

} The 8 proposed positions represent the establishment of an after-care facility. This facility is needed as an integral part of a complete and fully balanced treatment program. The facility will provide necessary psychiatric, medical, and therapy treatment at periodic intervals as necessary to patients who can be placed in the program. Such patients will receive their treatment during the day, being released to return home at night. The program would also provide appropriate assistance to relatives or friends which is an essential element of the complete and lasting rehabilitation of mental patients.

1 Intermediate typist-clerk—To provide for the clerical work load of the new professional positions which are serviced from the central clerical pool.

1 Intermediate typist-clerk—To provide clerical assistance in the superintendent of nurses' office.

1 Intermediate typist-clerk—To provide clerical assistance for the rehabilitation therapies office and 10 therapist positions.

1 Intermediate typist-clerk—To provide for the basic clerical work load of the clinical laboratory.

1 Intermediate typist-clerk—To provide for the basic clerical work load in the nursing education section to relieve nursing personnel of these duties.

3 Intermediate typist-clerk—To increase the complement in order to provide 1 position for clerical duties at each area nursing office.

---

[a] Composed of savings in salaries and wages, $66,905; operating expenses, $127,530; equipment, $6,175; and excess reimbursements, $1,811.

[b] Composed of savings in salaries and wages.

Department of Mental Hygiene

PACIFIC STATE HOSPITAL—Continued

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57

GENERAL ANALYSIS—Continued

Proposed New Positions—Continued

1 Intermediate typist-clerk—To provide for increased receptionist and clerical duties for the new Receiving and Treatmen Unit and the new hospital annex.

1 Intermediate clerk—To provide for a complement of 2 positions to handle the marking, linen and clothing roo function.

5 Laundryman
12 Laundry helper
These positions are necessary due to: (a) enteric and other communicable diseases which have bee difficult to control because of the use of patient help in the laundry, (b) decrease in patient help avai able because of change in program emphasis, and (c) increases in the quantity of laundry processed.

1 Assistant seamstress—Proposed for increased work load of supervision of patients in the sewing rooms. This activity beneficial both for patient therapy and salvage and mending operations.

1 Supervising hospital police officer
3 Hospital police officer
To provide a basic police force with 1 officer on duty at all times for propert protection, traffic control, and general security. 1 existing watchman will provide th balance of positions for round-the-clock coverage.

1 Automotive equipment operator—To provide an additional position in order to properly staff the required shifts.

1 Cook—1 additional position is proposed to complete the staffing of the special diet kitchen on a shift basis. There is medical need for this type of service at the hospital.

1 Food service supervisor I
19 Food service assistant
1 food service supervisor position and 7 food service assistant positions are proposed t increase the level of service for supervision of working patients and handling and servin of food in congregate dining rooms. 9 food service assistants are to assist with food prepara tion in the kitchens and the remaining 3 positions are to assist in the bakery in order t eliminate the use of patient help in food preparation as a step toward better control an prevention of communicable diseases among the patients and employees.

Per capita cost	$1,908	$1,912	$1,934	$22 (1.2%)

Analysis

The net increase is due primarily to:

Proposed new positions, 59, totaling $198,406 (summarized below).

Increased cost of authorized positions, $119,955, resulting from improved employment conditions and salary adjustments.

Operating expense increase of $86,508 resulting primarily from increases in care and welfare, $7,319; support and subsistence, $56,320; recurring maintenance costs, $7,900; special repairs and maintenance projects, $3,000; and light, heat, and power costs of $10,000.

Equipment increase of $10,658. The requested total of $31,729 is composed of $6,281 for replacement and $25,448 for additional; of which the principal additional items are office equipment for new positions, kitchen and food serving items, medical books, and maintenance type items.

PROPOSED NEW POSITIONS (For summary by department-wide program, see page 536).

1 Administrative assistant to superintendent—Proposal is based on an organizational study recommendation to strengthen top administration of the hospital due to the growth and increased complexity of operations.

1 Psychiatrist II—1 position together with 1 presently authorized position are proposed for a 10 percent improvement in the psychiatrist staffing standard. The 1 authorized position is available for an improvement in service as a result of population estimate adjustments.

1 Nurse-anesthetist—To have a qualified anesthetist available to meet the needs of the surgical and dental treatment programs.

1 Psychiatric technician—To assist the chiropodist in the scheduling and preparing of patients for treatment.

35 Psychiatric technician trainee—2 positions for increased work load resulting from population estimate adjustments and ward reclassifications for patient care. 33 additional positions are proposed to provide a 4½ percent improvement in ward nursing personnel standards.

1 Public health nurse I—To provide a specialist trained in public health procedures in order to assist the physician in charge of the hospital public health team.

1 Recreation therapist
1 Occupational therapist } For a proposed 8 percent increase in the staffing standard of these members of the treatment team.

1 Intermediate typist-clerk—For clerical assistance in the superintendent of nurses office.

1 Intermediate typist-clerk—To provide a clerical position for the rehabilitation therapies office and 10 therapist positions.

1 Intermediate typist-clerk—For basic clerical work load in the clinical laboratory.

1 Intermediate typist-clerk—To provide 1 position for the basic clerical work load in the nursing education section to relieve nursing personnel of these duties.

1 Intermediate typist-clerk—To increase the complement in order to provide 1 position for clerical duties at each area nursing office.

1 Intermediate typist-clerk—For increased work load in the marking, linen, and clothing room operations.

1 Assistant seamstress—To provide more help in the sewing and mending operation in order to meet the work load of repairing clothing, sheets and other items used by the patients.

1 Supervising hospital police officer
1 Hospital police officer } To provide a basic police force with one officer on duty at all times for property protection, traffic control, and general security. These 2 positions together with 3 existing watchmen will provide the required number of positions for round-the-clock coverage.

1 Mason—To provide a craftsman of this kind in order to take care of the continuing work load of repair and maintenance of the concrete structures and plastered surfaces at this hospital.

1 Automotive equipment operator—For increased work load of transporting patients, materials, and equipment based on post assignments required for adequate service.

1 Food service supervisor I—Proposed to increase the level of service for supervision, handling and serving of food in congregate dining rooms.

2 Food service assistants—To be assigned to the special diet kitchen on a post assignment basis.

3 Assistant cook—To provide additional cooking staff to meet the increased work load on a post assignment basis.

---

[a] Composed of savings in salaries and wages, $66,912; operating expenses, $111,889; equipment, $4,813; and loss in reimbursements, $768.

[b] Composed of savings in salaries and wages.

Department of Mental Hygiene

Replacement of Fire Loss:				
Allocations from Emergency Fund (expenditures)	$8,474	–	–	–
TOTAL EXPENDITURES	$5,486,098	$6,435,898	$7,011,758	$575,860
GENERAL ANALYSIS				
Number of positions	*1,078.9*	*1,144.7*	*1,474.8*	*330.1*
POPULATION AND UNIT COSTS				
Average population	3,119	3,188	3,204	16
Per capita cost	$1,759	$2,019	$2,188	$169 (8.4%)

Analysis

The net increase is due primarily to:

Proposed new positions, 370, totaling $570,779 (summarized below).

Increased net cost of authorized positions, $72,666, resulting from increases totaling $98,533, due to improved employment conditions and salary adjustments; less the amount of $25,867 budgeted in operating expense for special repairs and maintenance projects in 1956-57.

Operating expense net increase of $61,305 resulting primarily from increases in support and subsistence, $6,444; recurring maintenance, $20,000; special repairs and maintenance projects, $6,330; plus the $25,867 budgeted in special repairs and maintenance projects for 1956-57 and subsequently transferred to salaries and wages.

Equipment decrease of $10,085. The requested total of $55,134, is composed of $27,357 for replacement and $27,777 for additional; of which the principal additional items are office equipment for new positions, kitchen equipment, medical books, nursing, medical, and rehabilitation items, and educational equipment.

PROPOSED NEW POSITIONS (For summary by department-wide program, see page 536)

1 Administrative assistant to superintendent—Proposal is based on an organizational study recommendation to strengthen top administration of the hospital due to growth and increased complexity of operations.

2 Psychiatrist II—To provide a 10 percent improvement in the psychiatrist staffing standard.

1 Clinical psychologist II—To provide a 5 percent increase in the staffing standard for this class.

1 Nurse-anesthetist—To have a qualified anesthetist available to meet the needs of the surgical and dental treatment programs.

4 Senior psychiatric nurse
19 Psychiatric nurse
279 Psychiatric technician trainee
302
—Of the 302 proposed new positions, 11 are for increased staffing of existing wards resulting from population estimate adjustments and ward reclassifications for patient care, 235 are for staffing the 6 new wards of 700 patient capacity and 56 are proposed to provide a 4½ percent improvement in ward nursing personnel standards.

1 Public health nurse I—A position is proposed to perform public health nursing services to assist with the prevention and control of communicable diseases and instruct in public health procedures.

1 Recreation therapist
1 Occupational therapist
—2 additional positions together with 1 presently authorized therapist position are proposed to provide an 8 percent increase in the staffing standard of these members of the treatment team. The authorized position is available for an improvement in service as a result of population estimate adjustments.

1 Intermediate typist-clerk—To meet the clerical work load of the new professional positions which are serviced from the central clerical pool.

1 Intermediate typist clerk—For clerical assistance in the superintendent of nurses' office.

3 Intermediate typist-clerk—To increase the complement in order to provide 1 position for clerical duties at each area nursing office.

1 Intermediate typist-clerk—For the personnel section in accordance with the work load of 1 personnel clerk per 250 authorized positions.

2 Telephone operator—To provide coverage of the new 2-position PBX board in accordance with standard staffing for this function.

2 Groundsman—For maintenance of increased landscaped areas. Approximately 30 acres have been landscaped at the hospital in recent years with no augmentation of the groundsman staff.

1 Carpenter
1 Painter
1 Building maintenance man
—To meet the anticipated work load increases due to the activation of six new ward buildings of 700 patient capacity.

---

[a] Composed of savings in salaries and wages, $10,612; operating expenses, $96,274; equipment, $2,681; and loss in reimbursements, $851.

[b] Composed of savings in salaries and wages, $86,701; and loss in reimbursements, $679.

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57

GENERAL ANALYSIS—Continued

Proposed New Positions—Continued

1 Automotive equipment operator—For increased work load of transporting patients and materials based on post assignments required for adequate service.

17 Laundry helper—These positions are necessary due to: (a) enteric and other communicable diseases which have bee difficult to control because of the use of patient help in the laundry, (b) decrease in patient help available because o change in program emphasis, and (c) increases in the quantity of laundry processed.

1 Food service supervisor I
26 Food service assistant

1 food service supervisor position and 9 food service assistant positions are proposed t increase the level of service for supervision of working patients and handling and servin of food in congregate dining rooms. 12 food service assistants are to assist with foo preparation in the kitchens, 2 positions are to assist the butcher-meat cutter positions, an the remaining 3 positions are to assist in the baking in order to eliminate the use of patien help in food preparation as a step toward better control and prevention of communicabl diseases among the patients and employees.

2 Cook—To provide additional cooks to meet the work load on a post assignment basis.

GENERAL ANALYSIS				
Number of positions	5	8.1	7.9	—0.2

The current program is proposed to be continued, including clinical and laboratory research, treatment, surveys, and an information program. Total expenditures of $709,548 proposed for 1957-58 will provide an increase of $152,878 over the current year.

The net amount for salaries and wages is increased $1,262 for salary adjustments.

The $153,622 increase in operating expenses is primarily due to expansion of the causation survey project from $50,000 to $100,000; hospital pilot treatment program, $15,000; and $82,300 due to planned full-year operation during 1957-58 of the community alcoholic treatment clinics; plus an additional amount of $5,000 for tabulation of follow-up data on clinic patients.

The $881 for additional equipment is for purchase of a calculator, technical books and book shelves needed for staff operations.

Provision is made to project the program at the current level with adjustments due to work load changes. 23 additional positions ar proposed of which 18 are custodians and laborers required due to new facilities. The changes in installation status include a mov to new office quarters in Sacramento and the completion of 6 armories during the 1956-57 Fiscal Year. Completion of 2 armories is anticipated during the 1957-58 Fiscal Year.

ADJUTANT GENERAL'S OFFICE						
Analysis						

This function provides for the immediate office of the Adjutant General. The reduction is primarily due to printing. The 1956-5 Fiscal Year provided for printing the biennial report in accordance with Section 172 of the Military and Veterans Code

MILITARY DEPARTMENT—Continued

HEADQUARTERS STAFF

Headquarters Staff contains the following organizational entities: Executive; Army Division—Personnel, Operations and Training, Armory Management and Operations, and Armory Construction and Repair; Air Division—Personnel and Administrative, Operations and Training, and Installations; Comptroller; Logistics; Information and Recruiting; Policy and Liaison; and Administration. This staff administers the affairs of the California National Guard, California National Guard Reserve, and provides services for the California Cadet Corps.

Analysis

4 new positions are proposed due to work load increases and are to be assigned as follows: 1 for the Army Personnel Section, 1 for the Air Personnel Section, and 2 for the Armory Construction and Repair Section.

The reduction in operating expenses is primarily due to the elimination of the provision made during the 1956-57 Fiscal Year for microfilming personnel records and expenses in connection with moving the headquarters office to new quarters.

This function provides for the maintenance and operation of state-owned and leased armories and ground installations licensed fro the Federal Government.

Analysis

17 new positions are proposed, 15 of which are required for new armories expected to be completed during the 1957-58 Fiscal Yea 2 positions are proposed to augment the staff at Camp San Luis Obispo and are required for the water and sewage plant whic has been maintained by the Federal Government.

The increase in operating expenses is due to reflecting a full year's operation of new armories completed during the 1956-57 Fisca Year and to the anticipated completion of 21 armories during the 1957-58 Fiscal Year.

MAINTENANCE AND OPERATION OF INSTALLATIONS—AIR

This function provides for the maintenance and operation of California Air National Guard bases and aircraft control and warning facilities.

Analysis

2 additional positions are proposed due to a new installation at Pleasanton and additional facilities at Fresno.

The additional costs for operation and maintenance of air bases are proportionally offset by increased reimbursements from the Federal Government.

FIELD ORGANIZATION—NATIONAL GUARD

This function provides for expenses of field units of the National Guard which are not paid by the Federal Government. It includ administrative help for headquarters units, expenses for recruiting, medical examinations, officers' uniform allowances, weeken field exercises, and Officer Candidate Schools.

Analysis

The increase reflects the increase in strength of the National Guard.

CALIFORNIA CADET CORPS

The California Cadet Corps provides a military training program for high schools and junior colleges not in the R. O. T. C. pr gram. Periodic inspections of each school are made by supervisors from the Adjutant General's Office. Equipment, includi uniforms and rifles, is furnished by the State. Leadership schools, rifle matches, and a field training encampment are provi each year.

Analysis

The program is continued without change in level of service. The increase is based on participation by 163 schools with 12,8 cadets. The additional position is based on the additional schools in the program.

EXPENSES OF FLOOD EMERGENCY

Analysis

These expenditures resulted from the activities of the National Guard in connection with the emergency which ocurred as the result of floods during the winter of the 1955-56 Fiscal Year.

	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Salaries and Wages	$23,639	–	–
Operating Expenses	11,361	–	–
Totals, Flood Emergency	$35,000	–	–

REVENUES	ACTUAL 1955-56	ESTIMATED 1956-57	ESTIMATED 1957-58
GENERAL FUND			
Rentals and miscellaneous income	$13,115	$14,000	$14,000

DEPARTMENT OF MOTOR VEHICLES

Registers and licenses motor vehicles and maintains registration records, tests and licenses operators of motor vehicles, licer driving schools, administers the provisions of the Financial Responsibility Law, which relate to vehicle accidents; and coll the "in lieu" tax on motor vehicles.

The Motor Vehicle Fund finances the major portion of the activities of the department.

The Motor Vehicle License Fee Fund finances that portion of the activities connected with the collection of the "in lieu"

The General Fund finances the information service to the Aid to Needy Children Program.

GENERAL ANALYSIS

Number of positions	*3,060.9*	*3,415.2*	*3,807.3*	*392.1*

Provision is made for 402.1 additional positions, at a cost of $1,513,895, and an increase of 99.6 man years in temporary help, at a cost of $331,080, in order to meet work load and program increases. The additional positions are detailed as follows:

1. Increased work load—264.6 additional positions, and 99.6 man years in additional temporary help	$1,266,449
2. Increase in number of dealer and wrecker investigations—41 additional positions	164,622
3. Expanded driver improvement activities—21 additional positions	93,450
4. Increase in effectiveness of driver license examinations—50 additional positions	214,800
5. Additional branch offices—25.5 additional positions	105,654

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 55-56 (Filled)	56-57 (Auth.)	57-58 (Auth.)	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58

DIVISION OF ADMINISTRATION

This function includes the office of the director, general administration, fiscal, personnel, service, supply and building maintenance, procedures and analyses, traffic safety education, and the reciprocity commission.

Analysis

Increases in the function are due primarily to the following:

1 assistant information officer position is provided to assist the information officer due to the increased work load in the information section.

3 clerical positions are provided for the suspense slip unit, 1 for the inventory control unit, and 1 for the dishonored check unit to meet the anticipated work load in the Accounting Section.

2 clerical positions are provided for the Personnel Section due to increased work load resulting from the increases in staff.

2 positions are provided for the Service and Supply Section due to the increased work load. 1 is proposed for the supply room and 1 for the outgoing mail room.

1 audio-visual specialist position is proposed for the Traffic Safety Education Section in order to provide additional assistance in the statewide safety program.

$30,000 is included in the 1957-58 Fiscal Year to provide for a comprehensive survey of operations and procedures. The purpose of the survey is to recommend ways of streamlining operations and reducing work load.

The increase in operating expense is primarily due to printing Motor Vehicles Codes and Summaries following a general session of the Legislature.

DIVISION OF REGISTRATION

This function provides for the registration of all motor vehicles, and for the processing of all transactions related to such registration.

Analysis

Provision is made for an additional 51.8 man years of temporary help in the amount of $168,868 to meet the anticipated increases in work load brought about by the estimated increase in registrations and related transactions in the Vehicle License and Title Section.

An additional 22 motor vehicle investigator positions plus 19 clerical positions are proposed to provide for additional investigations of licensed dealers and wreckers.

An additional 20 positions plus temporary help are proposed due to increased work load in the Automation Section.

27 additional positions plus temporary help were established during the current year in the Automation Section to meet additional work load caused by the unexpected increase in registrations and sale of registration lists.

DEPARTMENT OF MOTOR VEHICLES—Continued

DIVISION OF FIELD OFFICE OPERATIONS

This function includes the operation of branch offices and performs the following services: Registers motor vehicles, issues drivers licenses, furnishes information regarding the Financial Responsibility Law, and regulates automobile driving schools and driving instructors under Sections 445 to 445.5, inclusive, of the Motor Vehicle Code.

Analysis

An additional 179.5 positions plus temporary are proposed to meet anticipated work load in existing branch offices. The staff for field operations includes 37 positions that function as relief for positions giving driver examinations. Relief is provided for all offices and travel crews and is based on 15 days vacation and 5 days sick leave per year. The computation provides that 40 days of each of the relief positions be devoted to vehicle registration activities during the renewal period.

Provision has been made for an additional 5 clerical positions in the Los Angeles files to handle increased work load.

An additional 25.6 positions are proposed to staff new branch offices in 8 locations as follows: North—Dinuba, Mount Shasta, Petaluma, and Santa Clara; South—Hemet, Oxnard, Reseda, and Twentynine Palms.

1 motor vehicle representative III position is proposed for the drivers license examiner training school in Fresno.

A motor vehicle representative V position is provided as supervisor of the additional district proposed in the 1957-58 Fiscal Year.

An additional 50 drivers license examiner positions are proposed to increase the effectiveness of drivers license examinations.

LAND AND BUILDINGS

This function includes the maintenance, operation, and repair of all office buildings owned or leased by the Department of Motor Vehicles.

Analysis

The increases are mainly due to additional rentals for 8 new offices, $30,000 to lease additional space in Sacramento, and an increase of $10,000 for repairs and alterations in the Sacramento headquarters building.

GENERAL ANALYSIS

Number of positions	*822*	*858.9*	*854.4*	*—4.5*

The budget as presented provides for approximately the same general level of services being provided in the current year, but does reflect the proposed closing or placing in custodial status of certain small uneconomical installations.

Units for which closure or custodial status is recommended	*Staff reduction provided*	*Estimated annual savings*
Prairie Creek Hatchery	3	$16,000
Madeline Plains Waterfowl Management Area	1	5,000
Tahoe Hatchery	2	11,000
Yosemite Hatchery	2	14,000
Eastside Reservoir	–	3,000
Porterville Game Farm	–	1,000
Los Banos Game Farm	1	4,000
Valley Center Game Farm	1	3,000
Castaic Game Farm	1	3,000
Totals	11	$60,000

During the current fiscal year it became necessary to provide for the replacement of the vessel *Yellowfin*, a marine research unit. This was accomplished by leasing the vessel *Alaska* from the U. S. Fish and Wildlife Service. A substantial portion of the current year deficiency is requested for this purpose. In addition the deficiency recognizes increased costs for fish food, traveling—in-state, and certain equipment items such as motor vehicles.

FUND CONDITION: The Fish and Game Preservation Fund expenditures of $8,644,034 proposed for 1957-58 Fiscal Year, although $171,367 less than estimated for the 1956-57 Fiscal Year, will exceed by $929,004 the $7,715,030 estimate of revenue available for departmental activities for 1957-58. Because annual expenditures have exceeded annual revenues for the past several years likewise, the unbudgeted surplus in the fund is estimated to be reduced to $1,496,114 by June 30, 1958. This is dangerously low and therefore requires special legislative consideration. Unless a balance between current revenues and expenditures is effected, the fund will be overdrawn in 1958-59.

DEPARTMENT OF FISH AND GAME—Continued

COMMISSION

The commission establishes policy for guidance of the Department of Fish and Game.

Analysis

Direct expenses and staff assistance are proposed to be continued at the current level.

DEPARTMENT OF FISH AND GAME—Continued

MARINE FISHERIES

Analysis

Marine Fisheries conducts research on fish life in the Pacific Ocean and compiles statistics on the commercial fishing industry. N change in the current program is proposed.

The current year budget provides for approximately $93,000 not previously appropriated. Purpose of the additional funds is to recondition the vessel *Alaska* which is being leased from the U. S. Fish and Wildlife Service to replace the vessel *Yellowfin*. A periodi maintenance survey revealed that the vessel *Yellowfin* has such a serious dry rot condition that it must be taken out of stat service.

REGION I—HEADQUARTERS

Analysis

The budget proposes continuation of existing programs. In Inland Fisheries the closing of the Prairie Creek Hatchery is reflected in the budget year. The Game Management budget reflects the fact that the Madeline Plains waterfowl management area has been placed on a custodial basis.

Headquarters at Redding

DEPARTMENT OF FISH AND GAME—Continued

REGION II—HEADQUARTERS

Analysis

The budget proposes continuation of existing programs. In Inland Fisheries the closing of the Tahoe Hatchery is reflected in the budget year.

Headquarters at Sacramento

REGION III—HEADQUARTERS

Analysis

The budget proposes continuation of existing programs. In Inland Fisheries the closing of the Eastside Reservoir is reflected in the budget year.

Headquarters at San Francisco

REGION IV—HEADQUARTERS

Analysis

The budget proposes continuation of existing programs. In Game Management the closing of the Los Banos Game Farm and the Porterville Game Farm is proposed.

Headquarters at Fresno

REGION V—HEADQUARTERS

Analysis

The budget proposes continuation of existing programs. In Game Management the closing of the Valley Center Game Farm and the Castaic Game Farm is proposed.

Headquarters at Los Angeles

History and Management of the Ring-necked Pheasant

The function of this project is to make a detailed study of the life history of the ring-necked pheasant with emphasis on status and effect of controlled hunting programs; the harvest taken and the maximum harvest allowable for cocks and hens; sources and distribution of hunting pressure; and the effects of agricultural changes. Evaluation of present management programs, cooperative hunting areas, habitat improvement and pheasant stocking, will be included.

Expenditure Detail by Project—Continued

Waterfowl Studies

The purpose of this project is to make a detailed survey and evaluation of waterfowl migration, breeding areas, and wintering areas. This data is necessary for efficient management of waterfowl. Water manipulation techniques will be developed to manage waterfowl marshlands properly, used to improve waterfowl habitat on private lands, and to increase waterfowl food production on the marsh areas of the State's waterfowl management areas.

Big Game Investigation

The purpose of this project is to study deer, antelope, elk, and mountain sheep populations and compile data needed to determine seasonal and bag limits; make herd composition counts, range surveys and forage checks, and productivity and mortality checks; manage controlled hunts, operate checking stations, gather kill data, and assist in disease, depredation, and predator control activities. Studies of methods of increasing and restoring desirable browse species on game ranges will be made under agreement with the California Forest and Range Experiment Station. Data from studies of brush management procedures will be used to formulate sound methods for management of brush areas for improvement of wild life habitat. The study will be made by the University of California under agreement.

Wild Life Investigation Laboratory

The purposes of this project are as follows: (1) to make detailed studies of diseases of known importance to wild life and which offer possibilities of field control by management practices, (2) to obtain information as to the food preferences of game and predatory species through stomach analyses, (3) to determine the nutritive value of big game food plants in order to evaluate their importance, and (4) to determine the effect of pesticide chemicals on wild life species in order to recommend safe use practices of these chemicals. These investigations are an integral part of wild life management studies now in progress. Such information is essential to formation of sound game management procedures.

Sacramento-San Joaquin River Salmon and Steelhead Study

This project has 4 objectives: to evaluate the fish loss occurring at water diversions in the Central Valley; to devise effective means for reducing the loss; to test the economic justification for stocking hatchery-raised steelhead trout in rivers, as compared with natural reproduction in streams; and a program to reduce fish loss through improvement of natural habitat. The project also includes a study of the life history of steelhead trout in the Sacramento River to enable the formulation of a sound management plan for the area.

Sturgeon and Striped Bass Study

Fishing for sturgeon was permitted in 1954 for the first time since 1917. Although it was believed the sturgeon population had increased sufficiently for an open fishing season, little information was available. This project was set up to provide such information, to make basic studies on striped bass, and to follow trends of abundance for proper management.

Coastal Stream Anadromous Trout and Salmon Study

The objective of this project is to determine the most effective methods of maintaining and increasing runs of salmon, steelhead, and trout in coastal streams. Phases include determining the survival of these fish from both natural spawning and artificial propagation, the present take by anglers, and the maximum take which may be permitted without damaging the resource.

MARINE RESEARCH COMMITTEE

search in the development of commercial fisheries of the Pacific Ocean and of marine products susceptible to being made available to the people of California is authorized by Chapter 808, Statutes of 1955. A privilege tax of five cents ($0.05) per 100 pounds on sardines, pacific and jack mackerel, squid, herring, and anchovies finances the research.

The board is responsible for the allocation of funds for acquisition of land and construction of facilities suitable for conservatio propagation and utilization of the fish and game resources of the State.

The budget provides for the continuation of existing program which places emphasis on numerous warm-water fishing projects an the fishing access facilities. The board budget was modified during the 1955-56 Fiscal Year to provide the necessary funds fo the changed program.

GENERAL ANALYSIS

SUPPORT

Number of positions	*74.6*	*78.2*	*85.7*	*7.5*

Provision is made for the continuation of present services to the operating divisions of the department and to the state and regional water pollution control boards.

The budget for the 1957-58 Fiscal Year provides for the following changes:

1. An in-service training program is established at the departmental level. The positions of training officer I and intermediate stenographer-clerk are provided for this program. Major work will be with the program of the Division of Beaches and Parks; however, other divisions of the department have need for assistance in organized training programs.
2. Personnel management of the Department of Natural Resources is further strengthened by recognition of a proposed reorganization of the personnel section. A junior staff analyst is proposed as a staff assistant to the personnel officer to assist in the heavy work load in the field. 3 clerical positions are added on the basis of anticipated work load created by proposed additions to the staff of the operating division.
3. Staff of the claims section is strengthened by the addition of a senior account clerk on the basis of anticipated work load increase as a result of program changes in operating divisions.
4. Staffing for the joint Department of Fish and Game—Department of Natural Resources library by addition of an intermediate typist-clerk position. In addition the budget provides sufficient funds to meet the department's share of the library operating expenses.

The budget also provides approximately $29,000 to cover the cost of installation of a tabulating equipment program required because of increased work load and need for adequate expenditure analysis information.

During the current year adjustment was made to reflect the establishment of an administrative service officer III position following retirement of the former deputy director. The new deputy director has assumed responsibilities under a revised concept of the functions of a deputy which places a lesser emphasis on administrative-fiscal responsibilities.

GENERAL ANALYSIS

Number of positions	*416.7*	*533*	*619.9*	*86.*

The budget as presented provides for operation of the growing State Parks System and recognition of the acquisition and development plan approved by the legislature in 1956. 3 positions are added to strengthen the administrative organization of the division: a material and equipment specialist and an information officer in administration, and the assistant land section superviso in the lands section. The first of these 3 positions will be responsible for the development of reasonable equipment standards The information officer will be responsible for the adequate consideration of the public inquiries into the program of the Stat Parks System. The assistant land section supervisor will provide a second level of supervision to this section to function i routine problems during the absence of the land planning and acquisition supervisor.

Additional positions are provided in the maintenance and operation section to adequately staff the existing district headquarter and individual parks in the system. The budget also provides staff for facilities expected to become operative during 1957-58

Department of Natural Resources

DIVISION OF BEACHES AND PARKS—Continued

ADMINISTRATION

This function includes expenses of the State Park Commission, administrative offices for business management, and conservation education.

Analysis

Additional positions with related operating expenses and equipment are proposed as follows:

1. Material and equipment specialist to coordinate equipment requirements and develop reasonable standards.
2. Administrative assistant I to relieve the administrative service officer of considerable detailed and excessive work load. The proposed position will also be responsible for a procedural manual and a more systematic method of making ranger assignments.
3. Information officer I to be responsible for various information problems related to the park system. This problem has been made critical by the Five-year Master Plan development.
4. 3 clerical positions are provided on the basis of work load.

Sufficient funds are made available in operating expenses to provide for geologic reports on state park areas, and for the investigation and interpretation of historical areas. The geologic reports will be provided by the Division of Mines under contract and the historic reports will be handled by contract with various universities.

During the current year a graphic artist and an accounting technician III were added to administration financed with funds provided for additional support. The positions added were related to the increased work load arising from the expanded acquisition and development program.

MAINTENANCE AND OPERATION

Provision is made in this function for operation and maintenance of beaches, parks, historical monuments, and riding and hiking trai in the State Park System.

Analysis

Additional positions with related operating expenses and equipment are proposed as follows:

1. District Headquarters for reasons listed:
   a. State park ranger III is proposed for the Stockton and San Francisco district offices to provide additional staff assis ance based on geographic area of the districts and upon work load.
   b. Forest technician is proposed for the north coast district to undertake studies of forest cleanup, fire hazard reductio forestry problems related to logging and other related problems.
   c. Assistant civil engineers are provided for each of the 6 state park districts to provide the necessary technical assis ance at the district level to accomplish various district construction programs.
   d. Carpenter is provided for the Stockton district to assist in the extensive maintenance program in this district.
   e. Highway equipment operator-laborer is provided in 4 districts, north coast, Stockton, San Francisco, and Monter to provide better utilization of existing equipment complement.
   f. Beach lifeguard supervisor is provided the Monterey district to supervise the seasonal staff of lifeguards in t district principally in Ventura and Santa Barbara Counties.
   g. 12 man months of seasonal craftsman and laborer are provided each of the 6 districts for miscellaneous constructi projects.
2. Existing facilities on basis of work load and expanded facilities:
   a. State park ranger II for Folsom Lake (1).
   b. State park ranger I for Petaluma Adobe (1), Folsom Lake (7), Twin Lakes (1), Carrillo Beach (1).
   c. Beach lifeguard supervisor is provided to work half-time at Huntington Beach and half-time at Salton Sea State Par
   d. State park attendant for Jedediah Smith (1), Folsom Lake (5), Sunset Beach (1), Pismo Beach (1), Carril Beach (1), Cuyamacho Rancho (1), Huntington Beach (1), Mitchells Cavern (1), Salton Sea (1), San Clemen Beach (1), and Silver Strand Beach (1).
   e. Clerical assistance provided for Richardson's Grove State Park (0.4).
   f. Seasonal man months are provided as follows:
      Beach lifeguard supervision at Emma Wood Beach (2), Carpinteria Beach (4).
      Beach lifeguard at Folsom Lake (40), Twin Lakes (8), El Capitan Beach (7), Emma Wood Beach (8.5 Carrillo Beach (24), Carlsbad (12), Doheny Beach (12), San Clemente Beach (12), and Silver Strand (12
      Park Aid at Armstrong (3), Castle Crags (3), Curry-Bidwell (3), Fort Ross (5), Clear Lake (9), MacKerrich Beach (3), McArthur-Burney (3), Russian Gulch (2), Sonoma Monuments (6), Sonoma Coast (6), Dimmi Memorial Grove (4), Shasta Monument (3), Folsom Lake (48), Big Basin (6), Capitola (4), New Bright (4), Seacliff Beach (4), Sunset Beach (4), Tomales Bay (4), Twin Lakes (4), Pfeiffer Big Sur (5), Carril Beach (18), Carlsbad Beach (4), Cuyamaca Rancho (4), Huntington Beach (10), and Mt. San Jacinto (12
      Park Naturalist's provide 15 man months to be allocated between Jedediah Smith, Richardson's Grove, V Damme Beach, S. P. Taylor State Park, and Palomar Mountain State Park.

DIVISION OF BEACHES AND PARKS—Continued

MAINTENANCE AND OPERATION—Continued

Analysis—Continued

3. Expansion of existing programs to new areas:
    - a. State park ranger II is proposed for the roadside rest and riding and hiking trails programs in Ventura County.
    - b. State park ranger I (2) for riding and hiking trails program. 1 for Contra Costa, Alameda, and Santa Clara Counties, and 1 for San Mateo, Santa Cruz, and San Benito Counties.
    - c. State park ranger I (5) and clerical position (1) at Anza and Borrego State Parks. These parks are to be operated as a consolidated facility. New positions will function as area patrol units. In addition, funds are provided for radio communications and housing of new employees in trailer units.
4. Placing of new facilities into operation:
    - a. Benicia Monument provided a state park ranger II and a state park ranger I.
    - b. Colusa-Sacramento River provided a state park ranger II, state park ranger I, and 9 man-months of park aid.
    - c. Caswell provided a state park ranger II and a state park ranger I.
    - d. Eureka Bowl provided a state park ranger III, state park ranger I, state park attendant, and 24 man-months of park aid.
    - e. Grover Hot Springs provided a state park ranger II, state park ranger I, and 23 man-months of park aid.
    - f. Lake Natoma (Folsom-Nimbus) provided a state park ranger II, state park ranger I (2), state park attendant (4), 24 man-months of beach lifeguard, and 24 man-months of park aid.
    - g. Butano Forest provided a state park ranger II and a state park ranger I.
    - h. Torrey Pines provided a state park ranger II, state park ranger I, state park attendant, 8 man-months of beach lifeguard, and 8 man-months of park aid.

During the current year basic staffing patterns are contemplated at Folsom-Nimbus and at Lake Millerton. These additions were financed with funds specifically provided for additional staffing in the Budget Act of 1956.

DIVISION OF BEACHES AND PARKS—Continued

DEVELOPMENT

This function surveys sites; prepares plans for construction projects, not exceeding $20,000 in cost, for the development and maintenance of beaches, parks, historical monuments, and riding and hiking trails; inspects construction; surveys property boundaries; prepares landscaping studies; and provides engineering surveys for projects to be constructed by the Department of Public Works.

Analysis

Additional positions with related operating expenses and equipment are proposed as follows:

1. Intermediate typist-clerk is added in the administration unit on the basis of work load.
2. Survey team is provided on the basis of work load.
3. Junior architectural draftsman is added on the basis of work load.
4. Assistant construction inspector will provide a new service; however, it will relieve work load now handled by others in the engineering staff.
5. Senior delineator is provided to support work load of the survey team added above.

During the current year, 5 positions were added in the development planning unit and 5 positions were added in the surveying unit. These positions were financed with funds specifically provided for additional staffing in the Budget Act of 1956.

LANDS SECTION

Negotiation for acquisition of beach and park property and acquisition of rights of way for riding and hiking trails is the funct of this section.

Analysis

Additional positions with related operating expenses and equipment are proposed as follows:

1. Assistant land section supervisor is proposed to relieve the section supervisor of a heavy office work load related to acquisition program, and in addition the proposed position would be in charge of the section during the absence of land planning and acquisition supervisor.
2. 2 associate real property appraiser are provided to do appraisal work in connection with the acquisition of proper in the current program. The position will be used in lieu of independent appraisers for certain smaller acquisitions.
3. 2 intermediate stenographer-clerk are proposed on the basis of work load. 1 is for the Los Angeles office and 1 for Sacramento office.

During the current year, 8 technical positions and 2 clerical positions were added to expedite the acquisition program approved the Budget Act of 1956.

RESERVOIR STUDIES

This section is responsible for the surveys of the potential for state park purposes of sites in the immediate vicinity of existing or proposed large reservoirs.

Analysis

Current activities and services are proposed to continue for 1957-58.

ROADSIDE RESTS

The maintenance and operation of the roadside rest project is an outgrowth of a program established by Item 405, Budget Act of 19

Analysis

By July 1, 1957, the division expects to have approximately 20 units in operation plus an additional 50 units placed in operati during 1957-58. The agency has had no previous experience in an operation of this type. Because of this a lump sum allotm is proposed until sufficient experience is developed to permit consideration as a part of the support program.

Department of Natural Resources

DIVISION OF FORESTRY

e Division of Forestry is responsible for prevention and suppression of forest fires occurring on all state and private lands having state-wide interest values; furnishing fire protection for rural areas on a reimbursable basis to counties; administration and enforcement of forest practice rules; forestry advisory services; range improvement programs; production of nursery stock for public plantings, windbreak, soil erosion control, and reforestation purposes; management of state forests; control of white pine blister rust and forest insect infestations in cooperation with federal and private agencies; and cooperation with the Federal Government on forest surveys.

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
GENERAL ANALYSIS				
Number of Positions:				
Regular	*481.6*	*511.6*	*579.2*	*67.6*
Seasonal—equivalent man years	*1,475.7*	*1,700.9*	*1,859.7*	*158.8*
Totals	*1,957.3*	*2,212.5*	*2,438.9*	*226.4*

The budget for the Division of Forestry for the 1957-58 Fiscal Year represents a partial implementation of the 1956 Fire Plan adopted by the State Board of Forestry, and in addition includes coverage of problems in forest management, range management, watershed management and other collateral natural resource management problems.

The 1956 Fire Plan and related programs contemplate an eventual increased expenditure of $6,000,000 for the fully balanced program of the division. A first-year implementation of $2,000,000 provides initial funds toward solving the following basic areas of deficiency:

1. An insufficient number of year-round foremen and forest fire truck drivers to function as trained crew leaders to obtain maximum efficiency from the manpower and equipment of initial attack fire crews.
2. Lack of sufficient initial attack manpower and equipment, related to the over-all crew strength during the fire season. (Augmentation of fire fighting equipment complement by the addition of specialized fire and servicing equipment is included here.)
3. Augmentations to the field services of the division requires consideration of added personnel needs at the administrative levels in Sacramento, in the district headquarters units and at ranger unit headquarters levels.
4. To provide a balanced program, the functions of training, fire prevention, forest management, and range improvement should be augmented.
5. A revision in the staffing pattern of forestry honor camps to provide closer supervision of inmate work crews and permit better utilization of heavy equipment.
6. Inconsistency in the division of protection responsibilities between the United States Forest Service and the State. In the 1957-58 Budget provision is made for the assumption of protection of acreage by the State which is now protected by the United States Forest Service under a contractual agreement. Modification of the method by which this contractual agreement is negotiated to insure more adequate protection of state responsibility areas now within the zone of protection of the United States Forest Service is proposed.
7. Expanded or new collateral programs in allotments to the contract counties, the problem of forest regeneration research, and the problems of forest fire research.

Details of the 1957-58 implementation are contained in each functional analysis.

ADMINISTRATION

The function of administration includes the office of the State Forester, business management, fire control, engineering section and the operation of the Davis Warehouse and Equipment Repair Shop.

Analysis

The budget for this function provides for strengthening of the Sacramento headquarters staff principally at the secondary administrative level by providing 4 positions at the assistant deputy state forester level. 2 of these positions are proposed as reclassifications and 2 are proposed as additional. Areas of responsibility for these 4 new positions are:

1. Forest fire research and equipment development and maintenance programs.
2. Agreements with other fire fighting agencies, fire dispatching, fire plans, facility evaluation, communications, and fire statistics.
3. Principal responsibilities are development of budgetary program and procurement procedures, and in addition other phases of fiscal management as a staff assistant to the deputy state forester.
4. Forestry honor-camp program and the development of standards for construction and maintenance of roads, fire breaks, and telephone lines.

A state forest ranger I is provided to assist in the coordination of the program of agreements with other fire control agencies, 2 clerical positions and a delineator are provided because of work load.

In addition a state forest ranger II is proposed to give direct assistance in coordinating and conducting the forest fire research program.

FIRE PREVENTION EDUCATION

This function provides for administration of the fire prevention, law enforcement, and information-education programs; and preparation and distribution of informational material for a state-wide public support program of forest fire prevention education.

Analysis

The budget for this function provides for a supervisor of law enforcement to direct and coordinate the civil and criminal law enforcement activities in the field. A state forest ranger I is added to assist in the development and distribution of fire prevention education aids. 1 clerical position is provided principally to assist the supervisor of law enforcement.

FOREST PROTECTION—DISTRICT HEADQUARTERS

The Division of Forestry is divided into 6 administrative districts with activities in each district coordinated through district headquarters. Personnel assigned full time to maintenance of Division of Forestry installations also operate on a district-wide basis from these headquarters.

Analysis

The budget for this function provides for additional personnel at the district headquarters level in the following areas:

1. Increased work load.
   6 state forest ranger I positions are added to be in charge of fire control activities, automotive management, construction and maintenance of field service facilities, communications, and coordination of honor camp programs where no position is provided at present. In addition approximately 6 clerical positions are provided to assist in the over-all work load.
2. Proposed training center program.
   2 state forest ranger I positions are proposed to be in charge of training centers in the Central Sierra and Southern California districts. 2 associate state forest rangers are proposed to assist at these centers.
3. Augmented fire prevention education and law enforcement program.
   7 associate state forest rangers, 2 in the north coast district and 1 in each of the other 5 districts, and 2 assistant state forest rangers in the Southern California district are proposed as assistant fire prevention officers to work directly with local residents in problems of fire prevention and law enforcement.

FOREST PROTECTION—FIELD SERVICES

This function provides for the operation of fire suppression camps, forest fire lookout stations, and county headquarters offices.

Analysis

The budget for this function provides for the following revision in program level:

1. 1 assistant state forest ranger to provide more adequate administration in southern Alameda County with headquarters at Sunol.
2. Conversion of 9 part time dispatcher positions to year-round coverage, requiring the addition of 3.3 man-years of dispatcher position.
3. A combination warehouseman and relief dispatcher in the largest ranger units measured by work load. For these positions a forest fire fighter foreman is added for each of 16 units.
4. Clerical positions are added to the ranger units on the basis of work load.
5. A sufficient number of trained year-round crew leaders and equipment operators for existing crews, requiring the addition of 1,164 man-months.
6. 86 man-months to establish the proposed Irvine Lake Forest Fire Station in Orange County.
7. 51 man-months to establish the proposed Morongo Forest Fire Station in San Bernardino County.
8. 149 man-months for the assumption of fire protection responsibility in the Calaveras area. This area is now being protected by the United States Forest Service. Additional cost will be partially offset by reduced payments to the United States Forest Service.
9. 9 man-months of forest fire lookout for the Quartz Hill Lookout in Siskiyou County proposed to be taken over from the United States Forest Service due to adjustments in the protection boundary.
10. 96 man-months of forestry equipment operator for operation of 5 medium bulldozer-transport units, which are being added by the 1957-58 Budget.

The Budget Act of 1956 provided an item of additional funds specifically to improve forestry fire protection. The following areas of concern were provided for:

A. Year-round employment for existing forest fire crew leadership	$404,501
B. Increase of fire crew strength to 1948 levels	230,310
C. Correction of specific staffing problems not of state-wide concern:	
a. North coast district	70,304
b. Northern district	28,810
c. Southern California district	48,890
Total Additional Support	$782,815

FOREST PROTECTION—FORESTRY HONOR CAMPS

Forestry honor camps for forest protection and fire suppression work are provided for 265 wards of the Youth Authority and 90 inmates from the Department of Corrections during 1957-58.

Analysis

As of July 1, 1957, 3 permanent camps and 3 "spike" or temporary camps will be operated for Youth Authority wards, and 1 permanent camps and 1 "spike" camp will be available for Department of Corrections inmates. It is estimated that the following camps will be placed in operation during 1957-58: Crystal Creek in Shasta County, Puerta La Cruz in San Bernardin County, and Pilot Rock in San Diego County.

The budget provides for the transfer to the support budget of 2 positions of forestry work project supervisor provided in th capital outlay program in 1956-57. The 2 facilities added at that time, Puerta La Cruz and Pilot Rock, are anticipated t be in full operation in the budget year. 216 seasonal man-months are required for these 2 camps during 1957-58.

In addition the 1957-58 budget provides 299 seasonal man-months for more adequate supervision of inmate work crews and t provide sufficient trained personnel for operation of heavy equipment.

FOREST MANAGEMENT

Forest Management includes administration of the Forest Practices Act to promote sustained productivity of forest lands, consultation service on farm forestry, and management of state forests.

Analysis

2 additional positions are provided for the following changes in program level: 1 forest technician to direct and coordinate the forest pest control programs, particularly in white pine blister rust control and in forest insect control. 1 assistant forest technician to provide technical forest management information to the small timberland owners in Butte and Plumas Counties under the service forestry program.

In addition, 1 assistant forest technician is provided for Mountain Home State Forest in Tulare County due to the enlarging of the forest. In addition, an intermediate typist-clerk is provided on a work-load basis for Jackson State Forest in Mendocino County.

STATE NURSERY

This function provides for operation of a nursery located near Davis and 3 district nurseries located at honor camps. Nursery stock for public planting, windbreaks, soil control, and reforestation purposes are produced.

Analysis

Current activities and services are proposed for continuation in 1957-58.

RANGE IMPROVEMENT

This function provides for range improvement programs in cooperation with private landowners; for experimentation and studies in brush land conversion and related problems; and for special standby brush-burning fire protection.

Analysis

The Division of Forestry proposes the establishment of an assistant deputy state forester by reclassification of a senior forest technician to provide coordination of the division's activities in watershed management and revegetation research, direction of the range improvement program, and administration to the forest and range management section in the absence of the deputy state forester.

In addition, the position of forest technician is added to provide direct supervision and coordination of the range improvement activities.

ALLOTMENTS TO COUNTIES FOR WATERSHED PROTECTION

This item provides payments to counties for the prevention and suppression of fires in areas of state responsibility.

Analysis

Additional funds are proposed to support a basic complement of fire crews and equipment equivalent to that which the State woul provide if it did the job directly under its proposed level of service for the 1957-58 Fiscal Year.

OPERATING EXPENSES			
Allotment to:			
Contra Costa County	$3,141	$3,287	$3,287
Kern County	227,878	253,596	293,149
Los Angeles County	295,549	324,767	395,700
Marin County	73,122	80,792	92,125
San Mateo County	75,461	84,328	91,879
Santa Barbara County	104,219	115,206	138,597
Ventura County	106,509	117,496	144,685
TOTAL EXPENDITURES	$885,879	$979,472	$1,159,422

PROTECTION OF PRIVATE LANDS WITHIN AND ADJACENT TO NATIONAL FORESTS

This item provides for payments to the United States Forest Service for the protection of state and private lands based upon acre ages of States' responsibility lands inside and outside the boundaries of national forests offset by national forest land protecte by the Division of Forestry.

Analysis

Additional funds are proposed to support a crew organization which, considering the fire problems, land ownership patterns, and th United States Forest Service force in being, will provide a level of fire protection to private lands inside national forests equiv alent to that provided on areas directly protected by the State under its proposed level of service for the 1957-58 Fiscal Year.

In addition the 1957-58 program provides for transfer of protection responsibility of the Calaveras area from the United States Fores Service to the Division of Forestry.

OPERATING EXPENSES			
Contract with United States Forest Service	$770,746	$813,677	$953,677

WATERSHED RESEARCH

This program began under Chapter 1415, Statutes of 1947. State funds supplement federal appropriations for the California Fores and Range Experiment Station of the United States Department of Agriculture in order to maintain the continuity of rainfall an stream flow records for San Dimas Experimental Station, and to publish results of research of value in watershed managemen in California. Continuation of the current program is proposed for 1957-58.

OPERATING EXPENSES			
Allotments to United States Department of Agriculture for watershed research	$24,000	$24,000	$24,000

WHITE PINE BLISTER RUST CONTROL

The expenditures for the control of white pine blister rust disease are matched by the United States Department of Agriculture for protection of the State's sugar pine resources. The current level of expenditures is proposed for 1957-58.

FOREST INSECT CONTROL

This program provides for the control of forest insect infestations, principally pine beetles, on state and private forest lands. State expenditures on private lands are on a cash or labor matching basis under rules established by the State Board of Forestry in accordance with Section 4455 of the Public Resources Code. The same amount as provided for the last 4 fiscal years is provided in 1957-58.

WILD LAND VEGETATION AND SOIL MAPPING

The University of California and California Forest and Range Experiment Station of the United States Department of Agriculture cooperate in mapping vegetation and soil types in wild land areas as recommended by the State Board of Forestry. This program was initiated under the provisions of Chapter 1875, Statutes of 1953.

The amount proposed continues the present program level.

DIVISION OF OIL AND GAS

The division supervises the method of drilling and maintenance of oil wells to prevent waste and damage to oil and gas deposits and to prevent contamination of fresh water resources. It is charged with enforcement of the law prohibiting unreasonable waste of natural gas. It is supported by an annual assessment against oil and gas producers based on the amount of oil produced and of gas produced and sold.

GENERAL ANALYSIS

Number of positions	*73.7*	*78.5*	*80*	*1.5*

Based upon present and anticipated work load in District No. 6 provision is made for 2 new positions. This district, which has not previously been activated, comprises roughly that area north of the San Francisco Bay region plus the Counties of San Joaquin, Calaveras, and Alpine. A third position for the new office will be provided by transfer from the Coalinga office.

DIVISION OF SOIL CONSERVATION

The division authorizes purchases from the Soil Conservation Development Fund of equipment for soil conservation work for rent or sale to soil conservation districts, assists in the organization and operation of soil conservation districts, and coordinates the planning of the "small watershed" program.

GENERAL ANALYSIS

Number of positions	*6.6*	*8*	*17*	*9*

The Division of Soil Conservation was created by Chapter 1680, Statutes of 1955, and was charged with the administrative functions of the Soil Conservation District Act. This responsibility includes the assisting of local interested groups in the formation and operation of soil conservation districts. At present the State has conservation needs to solve the problems of erosion, drainage, flood protection and flood prevention facility maintenance, soil limitation problems, and others.

Local soil conservation districts have provided a primary tool with which local landowners have been able to individually and collectively organize to solve their problems. Such organized soil conservation districts receive technical service from the United States Soil Conservation Service. This federal assistance is made available only where there is a local district. As of July 1, 1956, there were 122 soil conservation districts covering 37,697,019 acres in California. With the State taking leadership in the soil and water conservation program in California, it is the Division of Soil Conservation's best estimate that the number of districts will increase year by year to a total of 230 districts in 1962. At this time, all agricultural, range, and timber land of California will be in districts.

The 1957-58 Fiscal Year budget proposes the addition of sufficient field staff to provide a normal operational coverage of 10 soil conservation districts for each soil conservationist. The positions will assist in administrative problems of the local districts. In addition the soil conservationist will be concerned with assisting interested persons in formation of new districts. The budget also provides for additional Sacramento headquarters staff to assist the field staff.

DEPARTMENT OF PUBLIC HEALTH

The State Department of Public Health provides consultative services to local health departments in the fields of maternal and child health, tuberculosis, public health nursing, medical social service, nutrition, vector control, and dental health.

The department administers the crippled children program, maintains a registry of births, deaths, and marriages and compiles statistics on the general health of California's population.

Health education is fostered by the development of educational media and consultation to local agencies.

Field research studies and consultation is provided on industrial diseases, chronic diseases, and water and sewage sanitation. Enforcement is performed as necessary for the detection and prevention of adulteration of food and beverages.

A survey of the hospital needs and administration of the hospital construction subvention is contained within departmental responsibility and clinical public health laboratories are licensed and inspected by the department. The department also receives and administers grants for public health purposes from both federal and private sources.

GENERAL ANALYSIS

Number of positions	*861.4*	*899.6*	*923*	*23.4*

The total expenditure program for support and other current expenses in 1957-58 is $369,771 more than 1956-57. The increase is the result of proposed new programs and increasing work load in existing programs as well as adjustments for price increases.

Program changes totaling some $176,000 are included in this budget as follows:

Division of Local Health Services—to provide administrative and program analysis of local public health departments.

Morbidity Information Service—to provide more specific information regarding morbidity in California.

Bureau of Adult Health—to provide additional consultation and studies relative to industrial diseases.

Bureau of Vector Control—to provide better coordination of the research projects throughout the State and consultation on the mosquito aspects of water development projects.

Bureau of Hospitals—to increase the frequency of inspection of nursing homes.

Work-load increases accounting for most of the balance of the increased expenditures are included in the following areas:

Executive Office
Bureau of Business Management
Bureau of Records and Statistics
Division of Laboratories

An increase of $32,680 for the care of an increased number of recalcitrant tuberculers at the California Medical Facility is also provided.

Each of these increases is discussed in more detail in the budget for the individual unit.

Federal grants for the following programs are included in the support budget:

General health service	$530,990	$521,490	$521,490
Tuberculosis	105,350	114,285	114,285
Maternal and child health services	172,432	172,087	172,087
Crippled children's services	452,493	442,975	442,975
Cancer control	143,842	144,200	144,200
Heart disease control	49,816	108,200	108,200
Medical facilities survey	25,444	35,791	–
Special Project Funds:			
Children's Bureau	323,695	402,604	401,604
Polio	247,392	97,498	–
Chronic Disease	33,858	7,207	–
Current Morbidity	45,418	–	–
National Institutes of Health	31,156	37,005	26,460
Totals, Federal Grants	$2,161,886	$2,083,342	$1,931,301

Federal funds received as a reimbursement of expenditures made rather than an advance grant are included in the support budget as follows:

Army influenza project contract	$81,306	$107,772	$117,745
Department of Mental Hygiene contract	2,217	25,656	28,705
National Office of Vital Statistics contract	12,885	12,000	12,000
Communicable Disease Center polio contracts	46,385	34,404	34,404
Heart disease control	15,000	–	–
Totals	$157,793	$179,832	$192,854

DIVISION OF ADMINISTRATION

DIVISIONAL ADMINISTRATION

This unit is composed of the director's office and the office of the Division of Administration.

Analysis

Provision is made for a deputy director, medical, to assist the director in program analysis and review. He will assume direct resp sibility for a specific segment of the department and will assure the department of a continued level of administration during director's absence.

BUREAU OF BUSINESS MANAGEMENT

The Bureau of Business Management is the centralized service bureau for the entire department. The functions of the bure include general housekeeping services, stock room, mail and messenger service, operation of building and telephone switchboa accounting, budget preparation and control, personnel recruitment, and records, purchasing and maintenance of a car pool specialized vehicles.

Analysis

Provision is made for additional buildings and grounds maintenance as follows: 2 building maintenance men for recurring mai tenance of structure and equipment which is required because of the complex nature of the laboratory section of this departme An additional 1.8 janitors are required for routine janitorial duties. This unit was purposely minimized during initial operati of the building until positive need could be determined. The existing half-time groundsman is increased to full time as expe ence has demonstrated a full-time position is needed in this area. An additional typist position is necessary in office manag ment for processing the increasing number of purchase estimates, transfer forms, contracts, printing estimates, and misc laneous correspondence. A duplicating machine operator is needed to eliminate and prevent back logs. These increases a directly related to the growth of the department and the assumption of numerous special projects financed from outside sourc

BUREAU OF RECORDS AND STATISTICS—GENERAL HEALTH STATISTICS

The function of this unit is to provide direction and assistance as well as related processing services in the development of public he records and statistics. This unit renders service to local health agencies as well as to the various bureaus of the departm and includes preparation of special interpretive reports, analysis of statistical data relating to births, deaths, marriages, pop tion, and statistical consultation services to specific programs.

Analysis

An additional supervisorial position is included in the bureau to assist the bureau chief in the planning for special projects wh requires a considerable amount of participation by this bureau. After the initiation of a project considerable time is devoted general supervision of the statistical, analytical, and machine computations.

4 analysts are proposed for additional statistical planning and analysis in the fields of crippled children, sanitary engineering, laboratories. The existing analysts are unable to satisfy the many demands for their services in review of forms and their des regular reports, planning new studies, annual statistics, directories and new procedures and techniques.

A $4,184 increase in equipment rental is for additional machines and the modernization of presently used equipment. The increas partially offset by elimination of 1 clerk. 1 associate public health analyst (one-half time) is eliminated, due to the terminat of the survey program in conjunction with hospital construction.

BUREAU OF RECORDS AND STATISTICS—CURRENT MORBIDITY PROJECT

This was a federal research project for the study of measurements of morbidity, aimed at the evaluation of methods of securing current data, development and refinement of methods, and the development of a plan for establishing a current morbidity service which would be applicable to California as well as other states.

Analysis

The final phase of this project—state-wide measurement of morbidity—was completed during 1955-56.

BUREAU OF MATERNAL AND CHILD HEALTH

The function of the bureau is to provide a program of maternal and child health services in the State. This is accomplished by pr moting prenatal and child health services, and by consultation in the maternal and child health field to local health departmen maternity homes, hospitals, schools, local physicians, and other professional groups.

Analysis

No program or work load changes are reflected in this budget. 2 projects, Child Health Conference Evaluation and a study of Ment Retardation in Children, were added in 1955-56 and are continued through 1957-58 financed from federal special project funds no cost to the State.

BUREAU OF CRIPPLED CHILDREN SERVICES

The function of this bureau is the administration of a program for the care of handicapped children. The program includes the administration of a general crippled children program as well as cerebral palsy, hearing, and rheumatic fever programs. These programs are accomplished by:

1. Maintenance of a state file of all children reported with handicapping conditions.
2. Establishment of standards for care and consultation in the maintenance of such standards.
3. Provision of funds for expert diagnostic services and care.
4. Planning for necessary treatment and consultation in the provision of treatment and rehabilitation services.
5. Maintenance of statistical records of children receiving services.

Analysis

No program or work load increases are proposed in this budget. Word load changes for diagnosis, crippled children care, and physical therapist services are shown under their respective subvention items. An additional public health analyst is included for this bureau's statistical operation in the Bureau of Records and Statistics.

BUREAU OF TUBERCULOSIS CONTROL

This bureau provides: consultation in all matters pertaining to tuberculosis to local health agencies, state agencies and other unit of the Department of Public Health; inspection of tuberculosis sanatoria and hospitals; tuberculosis case findings in stat institutions; and, to a limited extent, local communities.

Analysis

No program or work load changes are included in this budget.

BUREAU OF ACUTE COMMUNICABLE DISEASES

This bureau provides clinical and administrative consultation to local health departments on problems pertaining to communicable diseases and venereal disease. Certain morbidity statistics with regard to communicable diseases are maintained to provide the basis for cooperation with local health departments in controlling these diseases.

Analysis

The decreased expenditures in this bureau represent the expiration of available federal funds for the polio vaccine program.

BUREAU OF CHRONIC DISEASE CONTROL

This bureau provides a chronic disease control program based on:

1. Consultation to local health agencies, hospitals, and private physicians with regard to preventive measures, early identification, and management of chronic diseases.
2. Demonstration and evaluation of specific chronic disease control services.
3. Epidemiologic investigation of chronic diseases.

Analysis

1 position of medical officer III is proposed to provide medical direction for the chronic disease epidemiology center which is currently conducting research in the fields of the medical aspects of air pollution, alcoholism, heart disease, and cancer. The position was established during the current year from increased federal funds and is shown in the budget year as a proposed new position for reporting purposes and for legislative authorization.

Additional clerical personnel are proposed in this bureau to augment the existing staff in order to form a core unit for processing and analyzing sample survey data on California morbidity. The data will be gathered by the U. S. Census Bureau in conjunction with the national health survey and will be particularly applicable to California. The increase in operating expense reflects contracts which will be entered into with the U. S. Census Bureau to provide expansion of the geographic coverage of the data collection within California as well as the provision of additional information peculiar to or of special interest to California. The total cost of this operation will be $112,404 of which $66,824 is a proposed increase. Certain morbidity information activities now being conducted in the Bureaus of Chronic Disease and Acute Communicable Disease will be discontinued with the activation of this new survey.

PREVENTION OF BLINDNESS PROJECT

This is a temporary project financed from Kellogg Foundation funds to investigate public health methods of preventing blindness.

Analysis

This project is conducted at no cost to the State. No work load or program changes are reflected in this budget.

BUREAU OF ADULT HEALTH

This bureau administers the departmental program in occupational health. The program is carried on by assisting in the development of local health department occupational health programs; aiding in the development of occupational health nursing programs; and consultation and educational services to professional, business, and other groups; and by direct services to industry which include making studies in occupational health hazards when other resources are not available.

Analysis

5 professional and 2 clerical positions are provided to meet the growing needs in the field of industrial hygiene due to the increasing industrialization and the use of new materials and processes which have created new problems and new health hazards to California's workers. The professional personnel will be occupied as follows:

1. Establish and increase local health programs as well as professional training—1½ positions.
2. Coordinate the collection and dissemination of information regarding industry-wide health problems—2½ positions.
3. Undertake technical studies in industrial health—1 position.

All of these activities are designed to assist industry and local health departments in meeting the industrial health problems.

The 2 clerical positions in this bureau and 2 chemists and 1 laboratory assistant in the Division of Laboratories will provide supporting staff for these professional positions.

BUREAU OF PUBLIC HEALTH NURSING

This bureau assists the other bureaus and services in the department in carrying out the nursing aspects of the various program and serves to coordinate the nursing activities within the department. Consultation services are provided to local agencies on th administration of nursing service. A recruitment, selection and training program is carried out to assist in filling the needs fo nurses in public health and in industry.

Analysis

No program or work load changes are included in this budget.

NUTRITION SERVICE

The major function of the nutrition service unit is to provide consultation to the professional staffs of the state and local health departments on the nutritional aspects of public health programs. In areas where there is no organized health program, services are provided to local public health workers in carrying out their nutrition activities. Service is provided to the Bureau of Hospitals for the review of architects' plans for the dietary departments, and to the resident schools operated by the State Department of Education.

Analysis

No program or work load changes are included in this budget.

MENTAL HEALTH SERVICE

The Mental Health Service unit provides an educational, consultative and advisory service to the staff of the department and to local health agencies to train them to meet the mental health problems associated with public health practice. This service is completely supported by a reimbursement contract with the Department of Mental Hygiene, which receives the federal grant as the Mental Health Authority. No state funds are expended in the program.

Analysis

No program or work load changes are reflected in this budget.

BUREAU OF HOSPITALS

The Bureau of Hospitals is responsible for administration of provisions of the Health and Safety Code which relate to minimum facilities for hospitals, clinics and establishments for handicapped persons, and for the administration of state and federal hospital survey and construction acts which provide grants for the assistance in the construction of hospitals and health facilities.

Analysis

Two hospital inspectors are provided to increase the number of inspections of nursing homes from 1 to 3 per year. 1 position is provided to permit 6 investigations per year of an estimated one-third of the nursing homes which require frequent inspections, to insure proper operation. The original inspectional pattern is adequate for hospitals, but has not been sufficient for nursing homes. These increases are offset by a reduction in positions due to the termination of the Medical Facilities Survey and special inspections of older hospitals.

DIVISION OF LABORATORIES						

This division provides the laboratory services of the department, including: water and sewage, industrial hygiene, food and drug, virus and rickettsial, bacteriological, and serological.

Diagnostic services are provided to rural areas of the State and in viral and rickettsial diseases.

Consultation is provided for clinical and hospital laboratories and local health departments.

Analysis

2 chemists and a laboratory assistant are proposed to provide laboratory services for the additional personnel in the Bureau of Adult Health as mentioned in that budget.

2 assistant microbiologists and 1 clerk are added to care for the increased work load in licensing laboratories and laboratory personnel.

A research microbiologist is proposed to streamline and standardize virus laboratory procedures and develop new methods of virus identification. This position is partially offset by the elimination of a medical officer who devoted part time to this function.

Temporary help in an amount of $4,678 is proposed to provide for work peaks in the sanitation laboratory and the licensing program.

DIVISION OF ENVIRONMENTAL SANITATION

DIVISIONAL ADMINISTRATION

This function consists of the office of the Chief, Division of Environmental Sanitation. The division consists of 3 bureaus and 1 special project as follows: Bureau of Sanitary Engineering, Bureau of Vector Control, Bureau of Food and Drug Inspection and Cannery Inspection, and Air Sanitation.

Analysis

No program or work load increases are included in this budget.

HOME SAFETY PROJECT

Analysis

This project was initiated during 1954-55 under a W. K. Kellogg grant to investigate the magnitude and nature of home accidents. This special project is concluded in the current budget year.

BUREAU OF SANITARY ENGINEERING

This bureau is responsible for the administration of the departmental program in the fields of sewage disposal, industrial waste disposal, water contamination and water supply, as well as certain aspects of general environmental sanitation including sanitation of bathing places and recreational areas.

Analysis

No program or work load changes are proposed in this budget.

BUREAU OF AIR SANITATION

This program includes investigation of the health effects of air pollution in California and assistance to local agencies in the measurement and control of air pollution and its effects. This assistance is in the form of advice in establishing procedures for measuring the extent, distribution and sources of air pollution, and in procedures for achieving control. Assistance is also provided to local agencies in establishing systems for the surveillance of illness from air pollution as the basis for emergency and long-range measures.

Analysis

No program or work load increases are proposed in this budget.

BUREAU OF FOOD AND DRUG INSPECTION

This bureau administers the program to insure the purity of foods and drugs in California. Manufacturing, wholesale, and retail outlets throughout the State are constantly inspected by the bureau working both independently and with local health departments. The work is designed not only to remove particular lots of unfit food from consumer channels but to bring about a long-range program of correction and prevention of unsatisfactory environmental conditions.

Analysis

No program or work load changes are proposed in this budget.

CANNERY INSPECTION

This section provides inspection of canneries for 2 purposes: the prevention of botulism and the maintenance of sanitation. It is partially self-supported since the individual canners are assessed for the inspection necessary to prevent botulism. Approximately 64 percent of the cost of this section is recovered as General Fund revenue under the assessment program.

Analysis

No program or work load changes are proposed in this budget.

BUREAU OF VECTOR CONTROL

This bureau is engaged in the evaluation and development of control measures pertaining to those diseases of man and animals in California which are conveyed, carried, or harbored by anthropods and certain mammals.

The program of the bureau is mainly of a field nature, designed for the development of adequate vector control programs to be conducted by local authorities. Activities include the following basic components:

1. Endemic survey to determine the existence and distribution of actual or potential vector-borne disease hazards.
2. Studies and demonstrations to establish and evaluate control techniques, methods, and equipment.

Analysis

1 of the new positions of specialist is provided to head the research unit of the bureau and assure maximum return from the many research projects applicable to vector control. The projects are being conducted at state and local levels and coordination of efforts will assure a more effective utilization of research moneys. The other specialist is proposed to provide expert consultation on the mosquito control aspects of water developments.

DIVISION OF DENTAL HEALTH

This division has responsibility for the administration of a program to protect and improve the dental health of the public. The program is implemented by advisory and consultative services to local health departments, community groups, agencies and educational institutions; studies of dental manpower; and promotion of training, clinical facilities, and fluoridation of water supplies.

Analysis

No program or work load increases are included in this budget.

DIVISION OF LOCAL HEALTH SERVICE

This division has the responsibility of integrating the policy and program objectives of the State Department of Public Health with those of the local health departments of the State, and for providing local health services under contract to areas without organized health departments.

Analysis

Two medical officers and a clerk are proposed to increase the medical administrative consultation given local health departments and adequately respond to local requests for program consultation and review. A health education consultant and a director of nursing are proposed to provide for work load increases resulting from the provision of local public health services under contract to small counties without health departments. The additional personnel necessitating this additional supervision are contained in the Public Health Subvention item "Aid to Counties Without Local Health Departments."

PUBLIC HEALTH TRAINING

There are 2 distinct activities under this general heading. 1 is the granting of stipends, tuition, or travel to trainees who attend universities, institutes, seminars, or receive field training. The second is the transmittal of special project grant funds to the University of California for special training projects.

Analysis

No program or work load changes are reflected in this budget. Out-of-state travel is increased to permit attendance at short institutes not available in California.

EXPENDITURES FOR THE CARE OF THE RECALCITRANT TUBERCULOUS

General Fund

Analysis

Since 1949 the Legislature has appropriated funds to the Department of Public Health to care for persons suffering from tuberculosis who violate the quarantine or isolation orders of the public health officers.

An agreement has been entered into with the Department of Corrections to care for a limited number of these persons. With the opening of the Medical Facility at Vacaville, additional beds have been made available for the increased demands for maximum security medical treatment. In 1957-58 a maximum of 65 beds is provided with the expenditure computed at an average annual occupancy of 50 beds, an increase of 15 over 1956-57. This represents the estimated number of recalcitrants the facility at Vacaville can accommodate during the budget year.

GENERAL ANALYSIS

Number of positions	*40.9*	*30*	*30*	–

The budget gives effect to the elimination of administrative and accounting work for water agencies due to the transfer of such activities to the Department of Water Resources. It also reflects elimination of the departmental accounting office function due to the transfer of the remaining accounting work to the Division of Architecture, since such work concerned only that division.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 55-56 (Filled)	NO. OF POSITIONS 56-57 (Auth.)	NO. OF POSITIONS 57-58 (Auth.)	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
ADMINISTRATION						
Analysis						

Administration includes the office of the director, staff officers, and assistants; and provides the over-all direction, coordination, and other staff services for the department. 90 percent of the cost of this function will be payable from the State Highway Fund during the budget year.

ADMINISTRATION						
Analysis						

The administrators of the division and their clerical assistants, and specific General Fund responsibilities are charged to administration. $30,000 is proposed to carry out a more complete program of materials and methods studies of a nonstructural nature; such funds will be transferred to the Division of Architecture Revolving Fund in accordance with letters of understanding approved by the construction analyst of the Department of Finance. A current year appropriation of $15,000 was made for this purpose in the Department of Finance Capital Outlay budget; however, the expense appears to be properly a support item of the Division of Architecture. $500 has been included for handling school plans which may be filed in accordance with the requirements of Chapter 1835, Statutes of 1955.

SUPERVISION OF PUBLIC SCHOOL BUILDING CONSTRUCTION

Division of Architecture Public Building Fund

This unit checks and approves plans and specifications for all new public school building construction and for all alterations or remodeling exceeding $4,000 in estimated cost. The unit inspects such buildings periodically during the course of construction to assure compliance with approved plans and specifications, as required by the Education Code. It is estimated that the work load of public school building construction will be increased from the current level of approximately $245,000,000 to $260,000,000.

Analysis

The current year program is continued with changes to meet the increasing volume of school plans. In order to relieve structural engineers of administrative detail, it is proposed to establish in each of the 3 area offices, an administrative assistant I. Also, to correlate and coordinate the program of structural research, as well as to prepare research findings for use in school structures, it is proposed to establish one supervising structural engineer position. Due to the difficulty of recruiting technical personnel and the existence of vacant positions, no other new positions are proposed. However, there is a need for several engineering positions to reduce the plan checking backlog and to provide for field inspection needs. The agency has attempted to meet this situation with proposed reclassifications for the purpose of utilizing the existing staff more effectively. However, if qualified personnel can be obtained, up to 6 additional positions will be provided, according to backlog needs, by an allocation from the Division of Architecture Public Building Fund. The materials and methods structural research program is continued with an increase for furtherance of knowledge relating to the effect of earthquake shock on buildings.
Provision is made for services of the State Fire Marshal by contract instead of by the former direct appropriation procedure.

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
SUMMARY				
CURRENT EXPENSES				
Administration:				
Headquarters Office	$3,140,019	$3,549,905	$3,611,457	$61,552
District offices	2,229,857	2,417,721	2,501,089	83,368
Contracts and rights of way	391,748	492,872	509,554	16,682
Public Works Administration	180,742	231,331	234,320	2,989
Pro rata general administrative charges	674,449	708,171	743,580	35,409
Totals, Administration	$6,616,815	$7,400,000	$7,600,000	$200,000
Maintenance of state highways	23,993,857	25,000,000	25,700,000	700,000
Highway planning	1,704,500	2,128,585	2,000,000	—128,585
Maintenance and repairs, San Francisco-Oakland Bay bridge	416,015	–	–	–
Supervision of outdoor advertising	86,850	91,508	92,573	1,065
TOTAL EXPENDITURES, CURRENT EXPENSES	$32,818,037	$34,620,093	$35,392,573	$772,480 (2.2%)
General Fund		*5,000*	–	*—5,000*
State Highway Fund	*32,818,037*	*34,615,093*	*35,392,573*	*777,480*
RECONCILIATION WITH APPROPRIATIONS				
General Fund				
Prior Year Balance Available:				
Special appropriation, Chapter 57, Statutes of 1956	–	$5,000	–	
Chapter 1540, Statutes of 1953	$10,000	10,000	$10,000	
Total Available	$10,000	$15,000	$10,000	
Balance available in subsequent fiscal year	—10,000	—10,000	—10,000	
Total Expenditures	–	$5,000	–	
State Highway Fund				
Continuing appropriations prescribed by Section 183, Streets and Highways Code	$31,164,406	$32,827,034	$33,573,898	
Continuing appropriations prescribed by Section 5323, Business and Professions Code (supervision of outdoor advertising)	82,128	86,260	87,222	
Special appropriation, Chapter 57, Statutes of 1956	–	5,000	–	
Contributions to State Employees' Retirement Fund	1,571,503	1,696,799	1,731,453	
Total Expenditures	$32,818,037	$34,615,093	$35,392,573	
TOTAL EXPENDITURES, ALL FUNDS	$32,818,037	$34,620,093	$35,392,573	
GENERAL ANALYSIS				
Number of positions	*3,758.6*	*3,811.9*	*3,848.9*	*37*

The current expense budget as shown herein and the Capital Outlay budget, which also contains the revenue and fund statements, are presented in accordance with Sections 143, 143.1, and 143.2 of the Streets and Highway Code.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58

	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
Number of positions	*4*	*3.8*	*5*	*1.2*

The current year program is continued with proposed staff increases of 1 assistant field representative and temporary clerical help for making recommendations on proposed school sites near airports, as required by Chapter 1451, Statutes of 1955. The replacement of an aircraft destroyed in a December, 1953, accident, as proposed, plus the agency's present Navion aircraft would provide a complement of 2 aircraft for the staff of 4 persons qualified as pilots. Since the present Navion is not capable of landing at many substandard airports another aircraft would enable the agency to carry out its responsibilities for checking these airports for safety, as well as its responsibilities for school sites.

Number of positions	*0.9*	*1*	*1*	–

The budget continues the currently authorized level of service. Provision is made for the salary of an executive secretary with other technical and clerical services being furnished by the State Lands Division on a reimbursable basis.

A preliminary report was rendered to the 1955 Session of the Legislature. The commission is continuing negotiations with the Arizona Commission toward refinement of the boundary line previously recommended. An interstate compact remains to be prepared for legislative consideration and submission to the Congress of the United States. Legal problems and methods of transfer of title records between states remain to be solved.

GENERAL ANALYSIS

Number of positions	–	2	–	–

No Budget Act item is proposed. Instead, the Los Angeles Metropolitan Transit Authority proposes to request amendments to Chapter 1668, Statutes of 1951, in order to carry out a program of engineering, financing, acquisition, construction, and operation of an integrated mass rapid transit system in the Los Angeles metropolitan area; and to request for concurrent action a special appropriation for support. Senate Resolution No. 112, 1955 Regular Session, recognizes that amendments were necessary in order that the authority could carry out the policy of the act to develop interurban rapid transit systems in metropolitan areas within the State.

The current-year program involves studies and the gathering of information needed for clarifying and solving metropolitan transit problems.

GENERAL ANALYSIS

Number of positions	*3*	*2.6*	*2*	*—0.6*

On January 5, 1956, the commission submitted to the Legislature a report covering a determination of the rapid transit facilities required by the Bay area together with estimates of the costs of providing them and financial analyses of their predicted revenues and operating costs. On March 15, 1956, the commission submitted to the Legislature a report covering investigations to determine practical methods of financing the costs of providing the rapid transit facilities. In progress are investigations to determine the legislation that is needed to set up a workable organization empowered to bring into being the rapid transit facilities required and to administer their operation.

Under existing law the life of the commission will terminate by December 31, 1957. The activities of the commission subsequent to June 30, 1957 will be directed toward maintaining continuity of the program for developing rapid transit in the Bay area by providing for an orderly turnover of information and records to the successor agency.

The program for the department will be substantially the same as that provided for in the current fiscal year. The $96,983 increase provides 1 associate counsel, and 3 clerical positions to handle an increased number of hearings, opinions and interpretations, and to assist in revising the rules and regulations of the department. 1 clerical position is required for 1 year to assist in the reorganization of the department's personnel program. A 2 man-year decrease in vacant positions is anticipated.

HORSE RACING BOARD

The board licenses, regulates, and supervises all horse racing meetings where there is pari-mutuel betting. The board also licenses trainers, jockeys, track officials and other persons employed by the racing associations. The main office of the board is at Los Angeles with branch offices at each of the tracks.

Department of Investment

BANKING DEPARTMENT

Examines and supervises operating banks and trust companies, grants or denies bank and branch applications and liquidates closed banks. Passes on legality of investments for savings banks and governs the deposit of securities with the State Treasurer by all trust departments and companies, both state and national, for the faithful performance of trust functions.

Revenue is derived primarily from an assessment of banks not to exceed .01 percent of total resources less secured deposits and bills payable.

LICENSE DIVISION

This division gives qualifying tests and issues licenses to insurance production agencies (life agents, insurance agents, brokers, solic tors, bail agents, bail permittees). It prepares training manuals, approves training courses and compiles written tests for licens applicants. License records are maintained and all changes in license status are processed in this division.

EXAMINATION AND FINANCIAL ANALYSIS DIVISION

This division examines by field visitations and by analysis of statements filed with the Commissioner the financial condition, practices, and procedures of insurers for the purpose of determining their solvency, financial status, and compliance with all applicable laws including those governing advertising and rates. It aids the Administration Division in handling California affairs of insurers in conservatorship or liquidation. The Examination Bureau makes field examinations of insurers. The Financial Analysis Bureau audits financial statements, computes the gross premium tax and surplus line brokers' tax, prepares an annual statistical report, and answers inquiries regarding insurance companies. The Rate Bureau enforces the fire and casualty rate regulation laws primarily by field visitation of insurance companies and rating organizations; it investigates and answers complaints and inquiries concerning rating matters; performs analytical work in connection with approval as adequate of minimum Workmen's Compensation Insurance rates.

Analysis

The increase in this function reflects the transfer of the Rate Regulation Division operation to this Division in order that the function may be performed under a single division chief.

Examination Bureau

GENERAL ANALYSIS

Number of positions	*143.4*	*173*	*183.8*	*10.*

The increase in 1957-58 is attributed primarily to the following:

1. Three technical and one clerical position with related equipment and expenses to handle increased work load, at $22,860.
2. Two technical and two clerical positions to develop a program of technical administration of problems relating to mortgage loa brokers, trust funds, and subdividers-home builders deposit funds, at $20,827.
3. $18,350 in the current year and $14,000 in the budget year for conversion to an electronic licensing system to facilitate licensin under the four-year license law passed by the 1956 Legislature.
4. Panel program of representatives of the Division of Real Estate to explain the division's operation, rules, and regulations to th licensees, at $5,000.
5. Installation of staggered license renewal, $16,500. Once this procedure is established, $25,000 temporary help for once-a-yea renewal will be eliminated.

GENERAL ANALYSIS

Section 1379 of the Harbors and Navigation Code provides that all revenues received by the board will be deposited in the General Fund rather than retained by the board.

The budget provides for 13 meetings of the board plus 1 extra day per month for the secretary to maintain the records of the board. Provision is made to replace borrowed equipment with state-owned equipment.

Department of Professional and Vocational Standards

DEPARTMENTAL ADMINISTRATION

erforms all accounting, personnel, and fiscal work for the 29 boards and commissions under the Department of Professional and Vocational Standards. Acts as a liaison with all governmental agencies, prepares the budgets and exercises budgetary control over all units within the department, and manages the Business and Professions Building and Annex.

Office at Sacramento

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
SUMMARY AND RECONCILIATION WITH APPROPRIATIONS				
Professional and Vocational Standards Fund [a]				
SUPPORT				
Continuing appropriation for expenses as prescribed by Sections 203 and 403, Business and Professions Code (expenditures)	$514,120	$485,446	$516,336	$30,890
Contributions to State Employees' Retirement Fund	10,978	11,537	13,786	2,249
TOTAL EXPENDITURES FOR SUPPORT	$525,098	$496,983	$530,122	$33,139 (6.7%)

GENERAL ANALYSIS

Number of positions	*26.8*	*27.8*	*34.5*	*6.7*

This budget provides for 7 additional positions based upon work load increase. The 2 investigator trainees will perform limited investigative services for the smaller boards which do not have their own investigators and for other agencies who do not have the work load to justify a full-time increase to their investigative staff. The 4 intermediate stenographer-clerks are for increased work load of the administration functions in the branch offices. The varitypist is proposed for 1 year to relieve the work load on composition and revision of forms which the various agencies use.

It is estimated that all the balances due the investing agencies for advances to construct the original Business and Professions Building will be repaid during the 1957-58 Fiscal Year. Net receipts from rentals for both the original building and the annex will be used to repay the funds advanced to construct the annex.

---

[a] Estimated on accrual basis. Actual repayments are made semiannually, after the close of the period in which net rentals have accrued.

[b] In accordance with the provisions of Sections 400 to 404 of the Business and Professions Code, the Business and Professions Building was constructed and is being operated by the Department of Professional and Vocational Standards as a self-sustaining enterprise. Out of the rentals received from state agencies occupying space in the building and fees paid by users of its parking facilities, are defrayed the cost of operating and maintaining the building. The remaining receipts are apportioned back to the agencies contributing to the cost of the building in proportion to their respective investments.

Department of Professional and Vocational Standards

DIVISION OF ADMINISTRATIVE PROCEDURE

The major functions of this division are: To furnish trained hearing officers when requested by any state agency conducting quasi-judicial disciplinary proceedings; to undertake a continuing study of administrative law and procedure and submit any suggestions for improvements to the Governor, the Legislature, and the various state agencies; to compile and publish rules and regulations for the various state agencies which are published as the California Administrative Code.

GENERAL ANALYSIS

Number of positions	*17.3*	*20.6*	*25.6*	*5*

The addition of 2 hearing teams are proposed to meet the estimated increase in hearings. The increased number of hearings results from reducing the waiting period between the time a case is ready for hearing and the time the case is heard to 45 days.

The estimated increase in reimbursements results from more efficient scheduling and the staff additions.

GENERAL ANALYSIS

	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
Number of positions	*10.2*	*10*	*9.8*	*0.2*

Provision is made to continue the same level of service as currently authorized. The reduction of expenditures is due to the completion in 1955-56 of a special boxing and wrestling investigation. For detail of expenditures see Departmental Administration budget.

FUND CONDITION: Annual expenditures will exceed annual revenues for the 1957-58 Fiscal Year by $25,183. The accumulated surplus will be reduced to the dangerously low balance of $8,218 by June 30, 1958. Special legislative consideration is necessary. Unless a balance between current revenues and expenditures is effected the fund will be overdrawn in 1958-59.

GENERAL ANALYSIS

	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
Number of positions	*17.8*	*19.4*	*21.7*	*2.3*

A position of assistant secretary is proposed to provide necessary assistance in providing proper supervision in both the educational program and the headquarters office. With the addition of this position a better realignment of the supervision of licensing, compliance and educational programs can be accomplished.

Provision is also made for the addition of 1 investigator position to assist in reducing the backlog of complaints.

PUBLIC UTILITIES COMMISSION—Continued

UTILITIES DIVISION

This function provides the technical and clerical staff to analyze and conduct studies relating to the regulation of rates, service, safety, valuation, and certificated matters of electric, gas, telephone, telegraph, water, steam-heat and pipeline companies.

Analysis

The additional positions and related expenses are required for sharply increased work caused by out-of-state natural gas requirements and requests for extended telephone and water service.

PUBLIC UTILITIES COMMISSION—Continued

UTILITIES FINANCE AND ACCOUNTS DIVISION

The Utilities Finance and Accounts Division is charged with the review of applications for authorization to issue securities, with participation in financial aspects of rate proceedings, with the obtaining of annual and financial reports of utilities and carriers for the use of the commission and the public and with supervising the application of the accounting procedures prescribed by the commission.

Analysis

3 of the additional positions are related to the increase and complexity of records maintained by the utilities and carriers. 2 positions are to audit tax reports submitted to the commission.

TRANSPORTATION DIVISION

The work of this division encompasses the regulation of rates, service, safety and certificated matters of privately owned for-hire carriers of persons and property by rail, highway and water and, to a limited extent, by air. The activities of this division are supported by both the General Fund and the Transportation Rate Fund.

Analysis

Provision is made for 5 engineering, 1 auditing, 6 rate and 5 clerical positions, and related expenses, to meet increased work load and to provide for an augmented safety program. Traffic engineering, passenger transportation and transportation of property require 2 technical and 1 clerical positions. Rate proceedings and tariff filings require 6 technical and 2 clerical positions. 4 technical and 2 clerical positions are provided to augment the enforcement of truck safety regulations.

LEGAL DIVISION

This function provides legal service to the commission. In addition, the function provides staff counsel representation in proceedings involving questions under the Public Utilities Act.

Analysis

4 counsels, 1 clerk, and related expenses are needed because of the increase in natural gas and carrier rate proceedings before the Federal Power Commission and Interstate Commerce Commission.

TRANSPORTATION RATE FUND ACTIVITIES

Activities supported by the Transportation Rate Fund are largely regulatory upon rail, truck, and water carriers engaged in the transportation of property. The Transportation Rate Fund revenue is derived from a fee of one-fourth of 1 percent of the gross operating revenue earned by carriers from the transportation of property and other related fees.

A plan of financial adjustment between the General Fund activities and the Transportation Rate Fund allocates the cost of certain functions which relate to either fund—the details of which are reflected in the General Fund activities budget and offset by estimated reimbursements from the Transportation Rate Fund. The portion of charges to be borne by the Transportation Rate Fund are shown herein as operating expenses. Functions which pertain entirely to the Transportation Rate Fund are budgeted entirely in this portion of the budget.

Analysis

3 additional rate experts and 2 clerks are provided to meet the increased surety bond and financial responsibility work loads. The intensified field enforcement program requires 6 technical and 4½ clerical positions.

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
GENERAL ANALYSIS				
Number of positions	*512.6*	*511.2*	*516.2*	*5*

The 18 proposed new positions are related to higher work loads, and the need for more intensive work in certain areas than has been possible with existing staff. These 18 positions are offset by a decrease of 12 existing positions resulting from procedural analysis and subsequent streamlining; further delegation to counties; and work load decreases.

AREA OPERATIONS

Analysis

This unit is responsible for the supervision of local agencies and the execution of departmental policies throughout the State. The State is divided into 3 areas, with area offices located at Los Angeles, San Francisco, and Sacramento. Each area office is headed by an area deputy who has full responsibility for all operations within the area, and who directs a staff of professional, technical, and clerical personnel. 2 professional positions are proposed for the licensing function, 6 for the adoptions function, and 2 clerical positions, all based on work load.

SALARIES AND WAGES				SALARY RANGE		
Administration:						
Area deputy	3	3	3	$782–950	$33,021	$33,531

Number of positions	*0.2*	*2*	*3*	*1*

Chapter 1730, Statutes of 1955, set up the Governor's Advisory Committee on Aging. The committee advises the Governor on the needs and problems of aging persons in California. Chapter 59, First Extraordinary Session, Statutes of 1956, provided for participation of legislative members on this committee. The function and staff personnel of the Interdepartmental Committee on the Problems of Aging were transferred to the Governor's Advisory Committee on Aging May 4, 1956. Members of the former committee will act in an advisory capacity to the Governor's Advisory Committee. The Executive Secretary's responsibilities include acting as consultant on aging to the communities and various groups of the State in the establishment of local committees for the development of programs aimed at the maximum utilization and integration of aging persons in the community. The additional position is needed to meet the requests for service by communities of the State.

GENERAL ANALYSIS

Number of positions	*62*	*64.6*	*68.6*	*4*

The 1957-58 Fiscal Year Budget for support is a continuation of the program previously authorized. 4 new positions are proposed on the basis of increased work load.

Educational assistance to veterans is expected to increase $113,000 due to a small increase in estimated enrollments and cost per student. There has been a recent increase in new enrollments which has not been completely offset by veterans dropping out of the program.

Contracts with veterans' organizations for assistance to veterans in pursuing claims against the United States arising out of war service is continued at the level established in the 1953-54 Fiscal Year.

Educational assistance to veterans' dependents is estimated to increase $8,800 due to an expected continuation of the increased rate of enrollments experienced in recent years. This increase will be almost completely offset by transfers to a new federal program of assistance for veterans' dependents.

DIVISION OF ADMINISTRATION

This division provides general direction and coordination of the other divisions and special programs.

Analysis

The increases in this division are primarily due to increased rent due to moving the main office to the new Veterans' Building in April, 1957, and the 2 proposed new positions. Additional equipment includes new furniture for the director's office, $1,899. The increases are partially offset by increased payments from the Veterans' Farm and Home Building Fund of 1943.

Proposed New Positions:

1 Personnel officer I	$7,008
This position is proposed to supervise the department's personnel functions. With almost 1,300 positions in approximately 150 classifications it is necessary to provide professional level supervision of the personnel activities of this agency. This position will also establish and supervise the in-service training program.	
1 Intermediate typist-clerk	3,294
This clerical position will be assigned to the personnel section to meet the increased work load created by positions added in recent years, especially in the Division of Farm and Home Purchases and Veterans' Home.

DIVISION OF EDUCATIONAL ASSISTANCE

This division administers the program of educational aid in the form of subsistence payments to veterans and veterans' dependents.

Analysis

The increase in this division is primarily due to salary adjustments, an additional automobile, and 2 proposed new positions. The General Fund cost budgeted will decrease due to a new method of allocating costs to the Veterans' Dependents Education Fund which recognizes a more realistic proportion of the share of the division's cost due to the veterans' dependents education program.

Proposed New Positions:

2 Intermediate typist-clerk positions are proposed for the district office to handle the work load created by the rapidly increasing number of new enrollments $6,588

DIVISION OF SERVICE AND COORDINATION

This division coordinates all of the State's veterans programs and provides informational and advisory services to agencies in contact with veterans and assistance to veterans in presenting claims against the United States arising out of war service. It also determines veterans eligibility for civil service examinations and the State's veterans programs.

Analysis

The increases in this division are primarily due to salary adjustments, minor increases in operating expenses, the replacement of office furniture, and additional furniture to meet work load increases and to more fully equip the main office in its new quarters.

OTHER CURRENT EXPENSES DETAIL	NO. OF POSITIONS 55-56 (Filled)	56-57 (Auth.)	57-58 (Auth.)	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58

GENERAL FUND

For Educational Assistance to Veterans, to Be Expended Under the Provisions of Article 2, Chapter 6 of Division 4 of the Military and Veterans Code

The assistance is limited to a total payment of $1,000 per California veteran. The subsistence is limited to $40 per month based on actual attendance in school, plus school books and supplies as are necessary, not to exceed a total of $50 per month. In addition, tuition costs are paid, provided the maximum of $1,000 per veteran is not exceeded.

Analysis

The amount proposed is based on a small net increase in enrollments and costs per student.

	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
OPERATING EXPENSES			
Tuition and fees	$1,272,793	$1,416,250	$1,675,040
Subsistence	906,025	1,358,750	1,212,960
Totals	$2,178,818	$2,775,000	$2,888,000

For Veterans' Claims and Rights Service, to Be Expended Under the Provisions of Section 699.5 of the Military and Veterans Code

Assistance in this service is continued at the expenditure level established in the 1953-54 Fiscal Year.

	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
OPERATING EXPENSES			
American Legion	$319,900	$574,000	$574,000
Veterans of Foreign Wars	137,400		
Disabled American Veterans	91,600		
AMVETS	25,100		
Totals	$574,000	$574,000	$574,000

VETERANS' DEPENDENTS EDUCATION FUND

The educational aid to widows and orphans is not limited as to total amount for each eligible; however, subsistence payments may not exceed $480 per year on the basis of school attendance. Payments are limited to $40 per month for college students, and $20 per month for high school students, and represent only amounts for subsistence, per Department of Veterans Affairs policy. Orphans over 16 years but not over 21 years of age may file for and receive assistance until the course is completed or until 27 years of age is reached, whichever occurs first. Assistance to widows is limited to not more than 4 years duration.

Analysis

Continuation of the increased rate of enrollments experienced in recent years is expected; however, this will be largely offset by transfers of dependents to a new program of federal assistance.

VETERANS' HOME OF CALIFORNIA

The Veterans' Home of California is for aged and disabled honorably discharged former members of the armed forces who served during a war period and are eligible for hospitalization or domiciliary care in a veterans' facility of the United States Veterans Administration and have been residents of California for 10 years preceding date of application for admission.

Located Near Yountville, Napa County

GENERAL ANALYSIS

	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
Number of positions				
Civilian	*510.7*	*572*	*634*	*62*
Member	*113.5*	*116.3*	*119.3*	*3*
POPULATION AND UNIT COSTS				
Average member population	1,825	1,946	2,003	57 (2.9%)
Cost per member	$1,709	$1,964	$2,092	$128 (6.5%)

The increase in per capita cost is primarily due to improvements in hospital staffing necessitated by the growth of the hospital in recent years and the increasing age and disabilities of the membership. No change in capacity is expected in the 1957-58 Fiscal Year. The 114-bed west wing of the hospital will be occupied in January, 1957. This increased total hospital and chronic and convalescent capacity to 857 beds.

SALARIES AND WAGES: The increase of $288,032 is due to the full-year cost of positions authorized in the 1956-57 Fiscal Year, proposed new positions and salary adjustments partially offset by increased salary savings.

Proposed New Positions:

1	Dietician	$3,996
3	Cook	11,430
3	Food service assistant	8,532

These positions are proposed to provide staff for the preparation and serving of restricted diets for 100 patients in 1 of the chronic and convalescent barracks. 3 basic diets will be served including smooth bland, diabetic, and low sodium. These special diets must be prepared in the main kitchen as the hospital kitchen capacity has been reached. The dietician, together with the 2 now authorized, will assist in the supervision of the special diet preparation which will take place at both the main and hospital kitchens, 2 shifts per day. The cooks are for the special diet preparation in the main kitchen with 1 on each of 2 overlapping shifts per day. The food service assistants will assist the other positions in the chronic and convalescent barracks dining room in serving the special diets. These 3 positions will permit the addition of 1 post on each of the 2 daily shifts.

---

[a] Composed of savings in salaries and wages, $32.387; operating expenses, $82,454; equipment, $2,479; loss in reimbursements, $68,142; and decreased contributions from Federal Government, $11,828.

[b] Contributions from the Federal Government are not included in the over-all budget totals, either as revenue or expenditures. For summary of federal aid funds, see Schedule 7.

Department of Veterans Affairs

VETERANS' HOME OF CALIFORNIA—Continued

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57

GENERAL ANALYSIS—Continued

SALARIES AND WAGES—Continued

Proposed New Positions—Continued

2 Janitor ---------- $6,276

These positions, together with 2 now authorized, will provide partial relief for 6 janitor posts in the hospital and 3 posts in the main kitchen and dining room. These posts all require full relief as they must be covered 7 days per week.

2 Laundress ---------- 6,276

These positions are proposed to meet increased laundry work load since the 1955-56 Fiscal Year when the last position was added.

2 Members of the guard, member ---------- 2,976

These 2 positions, together with member of the guard positions now authorized, will provide staff for 3 posts, 16 hours per day and double coverage on 2 posts on the night shift. The 2 locations to be covered are the entrance and the guardhouse. With the addition of these positions and the reclassification of another existing member position, it will still be necessary at times other than on the night shift to get assistance from off-duty guards. The guards are charged with the security of the institution and the maintenance of an ambulance service. It is necessary to transport members to the hospital an average of 4.4 times per day. 2 members of the guard are required for handling the stretcher.

1 Physician and surgeon III ---------- 12,600

This position will permit the departmentalization of the hospital staff into at least 2 departments of medical services and surgery with possibly further departmentalization in the future if feasible. This position will head the medical services department. It will consist of 7 wards in the hospital, the 2 chronic and convalescent units, and the admissions and domiciliary medical service. It will include 11 physicians and several contractual specialists. The proposed position will not have a specific ward assignment. It will, however, serve as a consultant in internal medicine. This makes possible the elimination of a contractual specialist costing $2,600. It is not anticipated that further departmentalization will require additional staff.

1 Physician and surgeon II ---------- 10,860

This position will be an assistant surgeon. The surgeon and this position will perform required surgery, supervise the surgical service and the new recovery room and central supply. They will also carry the surgical ward assignment. This ward has 33 beds. The need for more surgical staff is constantly increasing with the growth in the size of the hospital and the increasing age and disabilities of the membership.

1 Surgical nurse II ---------- 4,512

This position will be the operating room supervisor. This position will also supervise central supply. There are 2 surgeries at this hospital and 1 surgical team. 3 surgical nurses and a hospital aid are assigned to surgery. It is now necessary to borrow surgical nurses from other departments to assist during preparation, surgery, and cleanup. This position will permit the fixing of responsibility for the nursing service in this function and will replace borrowed assistance. The increase in hospital work load and the addition of an assistant surgeon will result in increased work load in the surgery department.

9 Graduate nurse (1 effective June 1, 1958) ---------- 33,893

These positions will provide 5 additional nurse posts for ward assignment, a surgical recovery room nurse, and an instructor position primarily for the training of new hospital aids. The new ward posts will permit the assignment of 1 nurse to each ward 24 hours per day with the exception of the acute medical ward which will have 1 shift of double coverage. At present, nurse coverage is budgeted on the basis of 1 nurse covering 2 wards during the 11 p.m.-7 a.m. shift and the same half-post coverage for 3 wards during the 2.30 p.m.-11 p.m. shift. A nurse assignment for the recovery room will be necessary when it is completed. The nurse proposed for hospital aid instruction will provide a training program for hospital aids, especially new employees.

1 Hospital aid ---------- 3,138

This position will permit the assignment of an additional hospital aid to the 34-bed chronic ward. This will provide 3 hospital aids, in addition to the position primarily for assistance for feeding and nourishment, during the busier hours of the day. This coverage is already budgeted for the other wards.

(1.6) Temporary help (hospital aid training) ---------- 5,000

This amount will permit the employment of hospital aids for an initial 1-month training period. Employee turnover in this classification averages over 6 per month. With the minimum staff provided for ward assignment, it is essential that new hospital aids be able to assume responsibilities as soon as possible without close supervision.

1 Occupational therapist I ---------- 4,404

This is the third occupational therapist for Veterans' Home. Present staff assignment includes 1 supervising the program and working with about 20 patients per day in the occupational therapy department and the other working with 50 to 60 patients per day in the hospital wards. This position will make it possible to extend the program to some of the patients not now receiving therapy, including the patients in the chronic and convalescent units and those in the new hospital wing.

1 X-ray technician ---------- 3,810

This position is proposed to meet increasing work load due to the increasing hospital population, increased disabilities of the membership, and added professional staff. In addition, the radiologist will require assistance in the operation of new X-ray therapy equipment which will be installed in the 1957-58 Fiscal Year.

1 Medical records librarian ---------- 4,740

1 Intermediate file clerk ---------- 3,294

The medical records librarian will review the records for completeness, index and code them by primary and secondary diagnosis, develop data for use in evaluating the over-all hospital treatment program and improving medical care, and direct the classification and filing of the records. These positions will also make it possible to bring all of the active medical records to a central location where they can be dispatched to the various wards, departments, and specialists as needed. At present, the records are kept in a number of locations making control difficult and availability a frequent problem.

EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	CHANGE FROM 1956-57
GENERAL ANALYSIS—Continued				
SALARIES AND WAGES—Continued				
Proposed New Positions—Continued				
1 Intermediate typist-clerk				$3,294
This position will be assigned to the nursing department. It is now necessary for a supervising nurse to handle clerical duties which will be assigned to the proposed position. This typist will check daily personnel attendance, maintain attendance reports, and complete other personnel documents, type correspondence, reports, work schedules and do filing in the supervising nurse's office.				
1 Caretaker-messenger, member				1,488
This position, together with one now authorized, will handle messenger and mail preparation and delivery duties in the hospital area. Increased work load brought about by the increased size and population of the hospital facilities and added staff make this position necessary.				
1 Building maintenance man				3,996
This position is proposed to fully implement a preventive maintenance zone program. This is intended to take care of all future preventive maintenance staff requirements for additional construction.				
1 Painter foreman				5,496
2 Painter				9,960
These positions, together with 4 painters now authorized, will provide sufficient staff to keep maintenance painting at a current level with an annual work load of 137,000 square feet per painter. This will permit the assignment of 1 position to operational painting (shopwork, furniture refinishing, etc.), 5 positions to maintenance painting, and the foreman for supervision and work load equivalent to approximately one-half of a maintenance painter's assignment.				
1 Groundsman				3,456
This position will provide staff for the maintenance of additional landscaped areas added in recent years and during the 1957-58 Fiscal Year.				

OPERATING EXPENSES: The increase of $55,595 is primarily due to additional population and facilities. The increase in special diets will cost $6,100, special medical consultant services includes an increase in pathologist service of $9,400 and other additional specialists at a total cost of $5,800.

EQUIPMENT: The total of $50,213 is an increase of $4,556 over the 1956-57 Fiscal Year. Major items include replacement of feeding equipment, $5,996, medical equipment, $9,993, motor vehicles, $4,150, and additional medical equipment, $18,019.

WOMAN'S RELIEF CORPS HOME

The home is for custodial, medical, and nursing care of the widows and dependent, destitute, unmarried daughters of Union Veterans who served honorably in the Civil War. Admissions to the home were closed in 1947 and, effective May 1, 1954, the facilities were leased to private persons for the purpose of conducting a nursing home for the aged. Under the terms of a contractual arrangement between the Department of Veterans Affairs and the private persons, the remaining members will be cared for in accordance with standards of care and service prescribed by the department.

Located near San Jose, Santa Clara County

DEPARTMENT OF WATER RESOURCES

he Department of Water Resources, created by Chapter 52, Statutes of 1956 (First Extraordinary Session), is charged with the responsibilities, duties, and powers of the former Division of Water Resources of the Department of Public Works, the Water Resources Board, and the Water Project Authority, except for the power to issue permits or licenses to appropriate water and matters related thereto. The administration of water rights is now vested in the State Water Rights Board which was created by the same act.

Net Total Positions, Departmental Support	*275.4*	*482.1*	*659.2*	*177.1*

This section of the budget includes departmental support and special activities.

Legislation passed at the 1956 First Extraordinary Session of the Legislature created the Department of Water Resources, charged with the responsibility of coordinating water development efforts in California and carrying out the State's responsibility in the planning and construction of water projects. The State Engineer's Office, the Division of Water Resources, the State Water Resources Board, and the Water Project Authority were abolished. In their stead were created the Department of Water Resources, the State Water Board and the State Water Rights Board, the latter having the responsibility for administration and adjudication of water rights.

Since July 5, 1956, a complete reorganization has taken place, in conformance with this legislation.

The immediate program of the department is:

(1) Legislative sanction of The California Water Plan as a master guide for future water developments;
(2) Adoption of a plan for financing state projects and state interest in local projects;
(3) Solving the counties of origin problem;
(4) Appropriations to move forward on the Feather River Project with relocation of the Feather River highway and the Western Pacific Railroad and other utilities scheduled to begin in the spring of 1957.

For principal program expansion and work load increase see divisional analysis.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 55-56 (Filled)	NO. OF POSITIONS 56-57 (Auth.)	NO. OF POSITIONS 57-58 (Auth.)	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58	

DEPARTMENTAL ADMINISTRATION

The director's office provides staff assistance in (1) legal matters; (2) water rights; (3) geology; (4) surveying and mapping; (5) supervision of dams; and (6) public information activities. This staff represents specialized fields in which the department will be continually involved, and the prime purpose is to coordinate, assist, and serve the operating divisions and Southern California District Office of the department which from time to time will require such services.

The legal activities of the department and the personnel of the legal staff are under the direction and supervision of the chief counsel for the department. To maintain effective supervision and to keep the legal staff flexible for maximum efficiency, it is anticipated that the individual members of the legal staff will not be assigned to separate operating units.

All water right activities, including watermaster service, are under the direction and supervision of a principal hydraulic engineer. These activities include presentations before the State Water Rights Board, administration of state filings, and the acquisition of water rights for state projects. Assistance and advice is available to both operating divisions and the Southern California District Office to assist in problems relating to these, as well as other water right matters.

Insofar as watermaster service is concerned, there are 17 watermaster service areas within the State where state watermasters are in charge of distribution of water in accordance with court decrees.

---

[a] An assessment fund. Not included in over-all budget totals.

DEPARTMENTAL ADMINISTRATION—Continued

The engineering geology staff provides technical guidance in all geologic studies, including both the planning and execution phases, and encompassing establishment of techniques and procedures. The staff will serve as technical consultants to the operating divisions, act as technical coordinators between the divisions and the Southern California District Office, supply geologic services to the Supervision of Dams function, and review all geologic reports prepared by the department prior to submission and release.

As with geology, each operating division will administer and control its own surveyors. The staff position of coordinator of surveying and mapping will have the same type of responsibilities as outlined above for engineering geology, and is available for consultation on methods to be employed, special procedures, basic data, and maps available, utilization of the California Coordinate System standardization of notekeeping and computation methods, and general coordination of surveying activities within the department. This function will also be responsible for contracts for aerial photography, surveying or photogrammetric mapping, and directly supervising the preparation of such contracts by division personnel, and is also responsible for the mapping program and priorities relative to the cooperative mapping program with the United States Geological Survey.

The supervision of dams staff of the department has the primary duty of supervising the design, construction, maintenance, repairs, alterations, and operation of all dams in the State, except those owned by the Federal Government, to the extent necessary for safety to life and property. The staff is directed by the principal engineer of dams. This staff will review plans for dam construction prepared by the Design and Construction Division of the department in the same manner as plans prepared by outside agencies. Most of the staff of this activity have had extensive field and office experience in the practical, as well as the theoretical aspects of dam design and construction, and will be available to consult with or advise the operating divisions in regard to problems related to dams. In the interests of maintaining uniform standards of safety in works being planned by the department with the standards required of outside agencies, the supervision of dams staff will review preliminary dam plans prepared by the Planning Division.

The public information functions of the department are under the supervision of the special representative of the director, with the information officer directly in charge of the public information and public relations program.

Section 153 of the Water Code as enacted by Chapter 52, Statutes of 1956, transferred from the Department of Finance to the Department of Water Resources the following:

a. Filing of applications by the Department of Water Resources with the State Water Rights Board required in the development and completion of the whole or any part of a general or coordinated plan looking toward the development, utilization or conservation of the water resources of the State.

b. Release from priority or assignment of any portion of any appropriation filed under Part 2, Division 6, of the Water Code when the release of assignment is for the purpose of development not in conflict with such general or coordinated plan.

c. Determination of the water required to be reserved at the time of release from priority or assignment for the county of origin under Section 10505 of the Water Code.

Analysis

Water Rights:	
Senior engineer	$8,112
Associate engineers (2)	14,016
Estimated operating expenses	5,532
	$27,660

At the present time there are 26 requests pending before the Department of Water Resources for disposition of state filings. Most of these requests were made to the Department of Water Resources.

The State Water Rights Board will schedule major hearings at about the rate of one a month throughout the State for the next several years. Some of these hearings will last for days or weeks. Under sections of the Water Code, the Department of Water Resources shall have an interest in said proceedings and must present to the State Water Rights Board the details of any general or coordinated plan prepared by the Department. Such presentations require extended preparation in the way of preparation of exhibits, expert testimony, and cross-examination of other parties. Advantage will be taken of the work being performed by the Planning Division of the Department, but there will of necessity be required the assembling of additional data and the coordination of all presentations.

The matter of securing water rights for the state projects will require presentations before the State Water Rights Board, similar to those being made by the Bureau of Reclamation in furtherance of projects under construction by the United States. The Bureau of Reclamation has a considerable staff of engineers engaged solely in this work. As the State gets into the construction of projects, this activity, although confined to the Feather River Project at present, will be expanded manyfold.

Safety of Dams:	
Senior engineer	$8,112
Associate engineer	7,008
Estimated operating expenses	3,780
	$18,900

New positions proposed in connection with work of supervision of safety of dams are necessitated by the gradual increase in number of dams coming under state supervision during recent years, as well as an increase in number of proposed new dams to be constructed and dams under repairs.

The majority of applications filed are for construction and enlargement and require detailed and often lengthy analyses. The more costly dams are more complex; of greater height and storage, and possess more complex appurtenances, such as spillway gates, structural walls, outlook towers; the office review required thus increases because of this complexity and because of the greater hazard potential. Since 1950, increase in the total number of dams has required division of the State into 5 field territories instead of the previous 4.

In addition the Supervision of Dams Unit shall exercise direction over preliminary design work performed by the Division of Water Resources Planning. The purpose of such direction will be to assure that the same standards of dam safety are exercised in state planning as are required of private dam constructors and to make available to the planning division the benefits of the experience on actual construction gained by personnel of the dam supervision activity.

Geology Section:	
Associate geologist	$7,008
Assistant geologist	5,772
Estimated operating expenses	3,195
	$15,975

This is to provide a basic minimum operating staff to the office of the Chief Geologist. This office administers and coordinates the geology program of the Department.

DEPARTMENT OF WATER RESOURCES—Continued

DEPARTMENTAL ADMINISTRATION—Continued

Analysis—Continued

Public Information:	
Audio Visual specialist	$6,672
Research writer	6,672
Assistant information officer	5,232
Motion picture	11,500
Miscellaneous short films and services	5,600
Estimated operating expenses	4,644
	$40,320

Proposed new positions concerning public information services are a necessary supplementation of the Public Information Section inaugurated as a part of the director's staff in 1956-1957. This section was created on the premise that only an informed public can make intelligent decisions regarding solution of California water problems which eventually will cost the people of the State billions of dollars. By 1957-1958 Fiscal Year the need for additional positions as proposed will be urgent. Time now spent by engineering personnel on preparation and presentation of material for public consumption will be substantially reduced by the public information personnel, thus freeing critically needed engineers.

Executive Office:	
Assistant director	$12,000
Estimated operating expenses	2,000
	$14,000

The expansion of the Department's entire program necessitates this additional "staff" position for increased work load in the executive office.

DIVISION OF ADMINISTRATION

The Division of Administration will provide all business management and nonengineering services for the department. These include financial, budgeting, property, and personnel management services, as well as filing, duplicating, stenographic, typing, and other clerical services.

All administrative personnel, including filing, stenographic, typing, and other clerical workers report to the Administration Division although the personnel are assigned to work with the engineering and other technical personnel of these divisions, the primary channel of authority is to the administrative assistant and through him to the chief of the Administration Division.

The Services and Supply Branch is composed of the Central Records Section, the Stenographic Section, and the Purchasing and Stores Section. As their titles indicate, these sections provide services to the department concerning library and general files activities, map files, mail receiving and coding, typing and stenographic services, purchasing, property records, automotive dispatching and record management, supplies, reproduction service, and related activities.

In addition to the 2 administrative service staffs for the other divisions, the organization of the Division of Administration includes 3 branches—Fiscal, Services and Supply, and Personnel.

The Fiscal Branch will have the responsibility for maintaining the records on real property acquired by the department and managing such property until required for construction, as well as the usual accounting, fiscal control, and budgeting functions.

DEPARTMENT OF WATER RESOURCES—Continued

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 55-56 (Filled)	56-57 (Auth.)	57-58 (Auth.)	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58

DIVISION OF ADMINISTRATION—Continued

The Personnel Branch will perform the functions of selection, placement, document processing, and cooperation with the State Personnel Board on classification, recruitment, and examining. Sections of the branch, in addition to the professional staff in the branch chief's office, are Personnel Records Section and a Training Section.

Intermediate Clerks (27)	$88,236
Property Clerks (3)	11,700
Photographer	5,496
Photocopyist	3,540
Accounting Technician (3)	11,700
Estimated Operating Expenses	18,000
	$138,672

The photographer and photocopyist are included to establish a photographic unit for public information services and to perform the work now under contract to private firms. The balance of the proposed new positions are directly related to program expansions throughout the Department. While this includes the Accounting technician positions they are primarily related to the expanded Feather River Capital Outlay program.

Total equipment needs for the Department are budgeted at $419,876. Of this amount $177,245 is for flood control project maintenance. The major portion of the remaining $242,631 is for additional equipment relating to new positions established in 1956-57 and proposed in 1957-58.

DIVISION OF RESOURCES PLANNING

The Division of Resources Planning of the Department of Water Resources is composed of the Engineering Data and Services Branch; the Special Activities Branch; and the Project Development Branch. The activities of each of the aforementioned branches are described in general as follows:

The Engineering Data and Services Branch is concerned with the collecting, assembling, developing, and analyzing of all state-wide basic water resources data and with providing the other branches and divisions of the department with technical assistance and supervision and the services of technical engineering specialists. To this end, the branch is divided organizationally into the following sections:

The Hydraulic Section is concerned with the measurement of stream flow; installation and operation of gaging stations; hydrographic studies of streams and tidal channels; administration of cooperative snow surveys program; collection and analysis of climatological and meteorological data for purposes of developing annual state-wide water crop forecasts; measurement of ground water levels throughout the State, including collection and assembling of well data; and other related activities having to do with the collection and analysis of hydraulic engineering data.

DEPARTMENT OF WATER RESOURCES—Continued

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 55-56 (Filled)	56-57 (Auth.)	57-58 (Auth.)	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58

DIVISION OF RESOURCES PLANNING—Continued

The Land and Water Use Section is engaged in classification of lands as to soil type, fertility, land form, and drainage; with the making of crop surveys; with the development of consumptive use requirements; and with the preparation of maps and reports related to the above for the purposes of supplying engineering personnel with specialized, technical information essential to water resources planning investigations and engineering reports resulting therefrom.

The Maps and Surveys Section administers the cooperative mapping program carried on with the Federal Government; continuously investigates the adequacy of topographical map coverage of the State and indicates priorities for new or revised mapping; coordinates mapping activities within the entire department and with outside agencies in order to avoid duplication of effort; and maintains an index of state maps and provides a central source of maps and mapping information for state, federal, and local agencies and other interested parties. This section also supervises the production of maps from aerial photographs by photogrammetric means.

The Geologic Investigations Section is engaged in geologic investigations in connection with the occurrence and movement of ground waters, with particular reference to quality of water; with relation to water well construction standards; and concerning field investigations relating to structural geology for the purposes of state-wide planning for the location and construction of major dams, tunnels, canals, and other hydraulic structures.

The Machine Computation and Control Section has been brought into being by the need to increase the output of work by available engineers who are now engaged in highly technical, but nonetheless repetitive manual computation procedures. The section is composed of a small, highly competent staff of engineers and technicians who will serve immediate additional work load demands of the department and who will develop and perfect a plan for a full staff and proper equipment to meet the growing demands for increasing efficiency by machine computing methods and machine recordation.

The primary activity of the Economic Section is to engage in studies of the economic aspects of state-wide water resources projects; to assemble and evaluate economic data pertinent to water development projects; to prepare special reports on economic management and financial matters; to review economic reports and develop conclusions and recommendations on financial and economic feasibility of projects; and to develop benefit-cost relationships. The section draws reports on the above and provides specialized services to the engineering groups as a necessary feature of engineering studies and reports on water resources developments.

The activities of the Power Planning Section are concerned with the planning of power phases of water resources developments, including types and sizes of generation equipment, types and sizes of pumping equipment, sizes and routes for transmission lines, and related electrical facilities. Studies are made relative to potential market for power and of alternative means of developing power. Reports are drawn concerning the above, and specialized technical information and services are furnished engineering planning and design groups.

The Special Activities Branch is concerned with conducting engineering investigations and the preparation of reports based thereon concerning activities that are not properly a part of the work of the other two branches of the division. Such activities are in part dictated by statute under various sections of the Water Code and specific sections of federal statutes, and in part by the need to secure and analyze data necessary in a variety of special investigations, including work for such agencies as the California-Nevada Interstate Compact Commission and the Klamath River Commission. The branch is divided organizationally into the following sections:

The activities of the Water Quality Section include federal cooperation and water analyses; investigations and formulation of plans for the reclamation of waste waters for beneficial uses; ground water studies and recommendations for minimum standards of well construction; investigations for state and regional water pollution control boards; investigation of the quality of all water, including saline water, as related to sources of pollution; monitoring of surface and ground waters; and all water quality studies required in connection with water resources investigations undertaken by the department.

The Special Investigations Section is concerned with engineering investigations which are broad in scope and which have as objectives making possible the orderly development of the State's water resources by promoting intrastate and interstate agreements on water rights, the determining of exportable water supplies from all watersheds of the State, and need for such supplies in areas of deficiency. An example of such investigations would be the work being done as requested by the 1956 Legislature to make an inventory by watershed of the quantities of water originating therein; the amounts needed in each watershed for use therein; and the amounts available for export. A further example would be the work being done on trial distribution of the waters of the Sacramento, Feather, and American Rivers, as well as the work being done for the intrastate compact commissions mentioned above.

The work of the Engineering Reports and Review Section involves the broad technical studies required by the department in acting on the numerous legal and engineering problems involved in representing the State in connection with operation and construction of the Central Valley Project and studies necessary in review of federal reports dealing with reclamation, flood control, and water conservation in California. Specifically, activities include analysis of construction plans and costs; preparation of an annual report on the status of the Central Valley Project containing recommendations to the Congress for appropriation of funds; and making operational studies to determine yields of water and power from the project.

Reports review activities result in recommendations by the State as to water requirements, water supply, design, operation, cost estimates, and economic and financial feasibility of proposed federal projects. Similar review reports are required for projects proposed under the Small Watershed Protection Act, Public Law 566, and under the Small Reclamation Projects Act, Public Law 984.

This section also discharges the department's obligation under the law to conduct studies as to the engineering and economic feasibility of proposed formation of irrigation districts, water storage districts, replenishment districts, resort districts, and other public districts. Also, this group conducts investigations required by law concerning operations of existing public districts, including inspection and supervision of construction activities of the various districts and preparation of reports of operations of all irrigation districts.

The Project Development Branch is assigned responsibility for planning studies leading to authorization of project construction. Such responsibility includes investigation and planning under the California Water Development Program; work in connection with cooperative water resources investigations with local agencies; and a large number of other major studies being made at the specific direction of the Legislature. For purposes of organization, the branch is divided into the following sections:

The Major Project Section is assigned responsibility for the investigation and development of plans for major water conservation projects in the North Coastal and Sacramento Valley areas. The work in each area has been assigned to a unit of the section. These projects will be designed to provide large quantities of water for transfer to areas of deficient supply within the State. Investigation in each of the 2 areas will entail studies and designs to a greater and more detailed extent than those originally made in connection with the Feather River Project.

The Local Project Section is assigned responsibility for 3 major functions, each of which is assigned to a unit. These units are: Local Projects Unit, Upper Feather River Unit, and Special Investigation Unit. Work of the Local Projects Unit includes investigation, planning and design of complete stream basin developments, particularly on those streams where the available water supply is not sufficient to provide surplus water for large-scale transfer between major hydrographic areas. Work of the Upper Feather River Unit is a continuation of a study to determine water needs and to develop water projects above Oroville Reservoir. The Special Investigation Unit conducts investigations and analyses, and prepares plans and reports on water resource investigations conducted in cooperation with local agencies.

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
		55-56 (Filled)	56-57 (Auth.)	57-58 (Auth.)			

DIVISION OF RESOURCES PLANNING—Continued

The California Aqueduct Section is assigned responsibility for 3 major functions, each of which is assigned to a unit. The Salinity Control Barrier Unit is doing work which is a continuation of that initiated by the Abshire-Kelly Salinity Control Barrier Act of 1955. Work of the Aqueduct Planning Unit includes detailed investigation and planning or works necessary for the large-scale transfer of water from areas of surplus in the north to areas of water deficiency in the south.

Analysis

All of the personnel and related costs of this division are included in the following schedules. As indicated above, this division is responsible for many activities, some of which are continuing functions of the department formerly reported in support section of the budget of the Division of Water Resources, while others are special studies and investigations. The costs related to the latter group will be recovered from the appropriations made for specific projects. The net costs after giving effect to this financial arrangement represent the expenditures for continuing activities such as water quality investigations, snow surveys, review of federal reports, Central Valley Project studies, and the program of collection and analysis of basic data initiated under the California Water Development Program.

Electronic Data Processing:	
Chief machine unit	$8,112
Associate electronic engineer	7,008
Associate mathematician	6,672
Associate engineering program analyst	7,008
Assistant engineering program analyst (2)	11,544
Engineering aide (4)	13,488
Associate statistician	6,672
Estimated operating expenses	11,000
	$71,504

This is the development staff proposed for the Electronic Data Processing Section. This section will continue to study the application of machine processing to the various activities of the department and will gradually convert selected phases of the department's methods and work to machine processing on a contractual basis during initial stage. Methods and procedures for the use of machine computing will be developed to the end that existing time-consuming manual processing can be reduced. This section is also commissioned to study and develop a comprehensive system of recordation of vast quantities of basic data related to the work of the department.

When this program reaches the operational stage, it will be necessary that there be available a means of being able to regulate water flow, reservoir levels, and power output.

Reports and Review:	
Senior engineer	$8,112
Associate hydraulic engineer (2)	14,016
Estimated operating expenses	5,532
	$27,660

These new positions are proposed as the result of new laws passed by the Eighty-fourth Congress. The first of these is Public Law 984, the Small Projects Act, approved by the President in July, 1956. The second is Public Law 1018, the Watershed Protection and Flood Prevention Act, approved by the President in August, 1956.

The law specifically provides that review by the states shall be as provided in the Flood Control Act of 1944, under which all reviews of federal reports by the Department of Water Resources are made.

Under Public Law 566, approved 2 years ago, the department cooperates with the U. S. Department of Agriculture and local agencies in development of small projects primarily concerned with flood control and soil conservation, and reviews the project plans finally developed. Certain features of the law have restricted activity thereunder. To alleviate such restrictions and to encourage greater activity under the law, the Congress has made several changes embodied in Public Law 1018. It is expected that an increase in present work load will result.

Hydrographic Contract—U. S. Bureau of Reclamation:	
Junior hydrographer	$4,672
Engineering aide	4,296
Hydrographic aide	4,296
Estimated operating expense	2,650
	$15,914

The Hydrographic contract between the U. S. Bureau of Reclamation and the Division of Water Resources was on a matching basis with an expiration date of March 30, 1956. The U. S. Bureau of Reclamation matched the amounts contributed by the State until 1954 when the U. S. Bureau of Reclamation began to put a ceiling on the amount of funds available under the contract. When the new contract, effective April 1, 1956, was negotiated, the terms of the contract were changed from matching to a reimbursable basis because the U. S. Bureau of Reclamation contribution was limited to $69,600 while the State share included in the budget was approximately $84,600, not including equipment and printing. The limit placed on federal funds required a reduction of 3 positions. 3 positions are necessary to maintain the level of accuracy achieved during the past years.

This project was originally initiated to provide basic information on water supply and utilization in connection with the Central Valley Project; however, the program now serves a far broader purpose in that it provides basic data for many phases of the department's operations.

Inventory of Local Water Supplies:	
Assistant hydraulic engineer (2)	$11,544
Junior civil engineer (2)	10,464
Engineering aide (2)	8,592
Estimated operating expenses	6,100
	$36,700

DEPARTMENT OF WATER RESOURCES—Continued

DIVISION OF RESOURCES PLANNING—Continued

Analysis—Continued

6 new positions are proposed for the acceleration of the program of making a detailed determination of the water supplies and ultimate water requirements by watershed. These studies were inaugurated under the provisions of Chapter 61, Statutes of 1956 (First Extraordinary Session), and at the time this measure was under consideration by committees of the Legislature it was understood that, as personnel could be recruited, these studies would be carried on at a more rapid pace. These positions are financed from Special Activities.

Special Activities:	
Senior hydraulic engineer	$8,112
Associate hydraulic engineer (2)	14,016
Assistant hydraulic engineer (4)	23,088
Junior civil engineer (5)	26,160
Junior hydrographer	4,740
Engineering aides (6)	25,776
Junior drafting aide	3,900
Assistant civil engineer	5,772
Associate soils technologist	7,008
Junior soils technologist	5,232
Junior hydrographer (2)	18,960
Geologic aides (2)	8,592
Senior drafting aides (2)	7,800
Estimated operating expenses	32,000
	$191,156

These remaining proposed new positions in this division are within the Engineering Data and Services Branch. These positions are all made necesary by increase in services that will be requested of the latter branch by other activities of the department. These services in turn are a result of increases in various special investigations and beginning of new investigations such as the previously mentioned Inventory of Water Supplies and Needs, the San Joaquin Valley Drainage Study, Salinity Control Barriers Study, Northeast Counties Investigation, Upper Feather River Reservoir Sites Investigation, the California Water Development Program, and trial distribution studies on the Sacramento, American, and Feather Rivers. 3 additional positions are necessary to supply the manpower required to offset that which of necessity will be devoted to the preparation of the department's presentation before the State Water Rights Board. These positions are all financed from Special Activities.

DIVISION OF DESIGN AND CONSTRUCTION

The Division of Design and Construction has responsibility for performing the detailed engineering design for construction of all projects within the jurisdiction of the department, including the necessary surveys, geologic and materials investigation, and preparation of construction plans and specifications. Projects include those delegated to the department directly and those performed for other state agencies; flood damage repair; San Joaquin River Flood Control Project; coastal engineering; development projects for Division of Beaches and Parks or Department of Fish and Game; the operation of the Sacramento River Flood Control Project, including the maintenance thereof, and water supply forecasting and flood hazard forecasting and warning.

The division is divided organizationally into 4 branches, each of which is described as follows:

The Design Branch has responsibility for preparing detailed engineering designs, drawings, and plans and specifications for the construction of all projects within the jurisdiction of the department. At the present time, the major design project is the Feather River Project, and this work is being done by 4 sections within this branch—Dam Design Section, Aqueduct Section, Electrical and Mechanical Section, and Exploration Section. Other design work on other projects is performed by the Special Services Section within this branch.

The Dam Design Section is concerned with the study and investigation of alternate designs of all dams proposed for construction on the Feather River Project.

The Aqueduct Section is responsible for the design of the aqueduct portion of the Feather River Project from the intake at the Delta to the aqueduct terminus in Southern California. Structures include canals, syphons, bridges, buildings for housing the pumping plants, and other physical features involved in the aqueduct, except those for the motors and pumps at the pumping plants.

The Electrical and Mechanical Section handles the work involving design and preparation of drawings and specifications for all the electrical and mechanical equipment at the power plants and pumping plants for the Feather River Project.

The Exploration Section is concerned with all subsurface geologic investigations necessary to determine the design criteria for structures on the Feather River Project.

The Special Services Section has responsibility for the work not normally of a design nature, such as hydraulic studies, including model studies; collection and analyses of hydrologic data; planning and designing of miscellaneous structures for other state agencies for flood control, beach erosion control, navigation channel control, and related works; and preparation of construction plans and specifications therefor.

The Hydraulic Engineering Laboratory Branch embraces the physical and chemical testing of all materials in which the Department of Water Resources is interested. The work is divided among 3 sections, each of which is described as follows:

The Chemical Section makes the chemical, biochemical and biological analyses of water in connection with State-wide Water Quality Investigations and the determination of water quality as involved in numerous other studies conducted by the department.

The Concrete Section is responsible for the determination of concrete mixes and the testing of concrete aggregates, as well as determining the physical character of concrete.

The Materials and Soils Section carries on the work involved in making the laboratory tests, both structural and physical, of materials and soils as they affect projects under consideration for construction by the department.

The Project Administration Branch is involved in the acquisition of properties and of rights of way, relocation of facilities, bidding and award of contracts, and marketing of water and power made available by the Feather River Project. The branch is divided into 3 parts as described below:

The Contracts Administration Section has the responsibility for preparing final specifications; for prequalification of contractors; opening of bids; awards of contracts; contract changes; and progress payments.

The Surveys and Acquisition Section has the responsibility of preparing maps; performing necessary surveying; making rights of way locations; and negotiating for acquisition of all properties required for the highway and railroad relocations and for aqueduct line and reservoir sites.

The Marketing Section is concerned with the collecting and evaluating of data affecting the marketing of water and power. Analyses and recommendations are made of rates to be charged for various classes of water and power by areas which are based on ability of the market to absorb and ability of consumer to pay. Contracts for the sale of water and power will be negotiated by the staff in this section.

The Construction Branch has responsibility for actual construction of any project being built under the supervision of the department, except the Feather River Project. Until such time as a Division of Operations may be activated, the Construction Branch will also have the responsibility for such items as flood forecasting and water supply, supervision of flood control projects, and the installation of communications systems.

Within the Construction Branch are 4 sections, described as follows:

The Special Projects Section is charged with the responsibility of supervising the construction of special projects authorized by the Legislature or transferred from other departments pursuant to the State Contract Act, such as work of flood damage repair; San Joaquin River Flood Control; coastal engineering; and development projects for Division of Beaches and Parks or Department of Fish and Game.

DEPARTMENT OF WATER RESOURCES—Continued

DIVISION OF DESIGN AND CONSTRUCTION—Continued

The Flood Control Projects Section is responsible for the operation and maintenance of the Sacramento River Flood Control Project; the supervision of local agency maintenance of other flood control project works in accordance with federal regulations and state law; cooperation with the Corps of Engineers, State Reclamation Board, and local agencies regarding flood control projects maintenance; review of applications to Reclamation Board; Yuba River Debris Control Project cooperation; investigations and plans for operation and maintenance of the Sacramento River Flood Control Project; flood control features investigation for Bay Barrier and California Water Plan; and review of federal reports relating to flood control and cooperative studies for formulation of rules for multipurpose reservoir operations.

Flood Control Projects Operations Section is concerned with water supply forecasting, flood hazard forecasting, and flood hazard warnings.

The Communications Section is organized for the purpose of designing and installing a communication system for use in flood forecasting and for use during flood emergencies. During the construction and subsequent operation of the Feather River Project, a communication network will be installed throughout the State for use in the operation of the project. The system will be designed, operated, and maintained by personnel within this section and within the State Division of Communications.

Analysis

Flood Control Project Maintenance:	
Construction equipment supervisor	$7,008
Engineering aid (2)	8,592
Levee maintenance men (22)	74,184
Estimated Operating Expenses	23,000
Equipment	177,245
	$290,029

As a result of the floods of December, 1955, many miles of levee, for which the State has immediate responsibility for maintenance and repair, have had to be reconstructed in order to meet safety standards. Following the floods, from 20 to 35 men were employed on a limited term basis to accomplish this work. In the interim, additional maintenance areas have come under state jurisdiction and more are anticipated by 1957-58. The 22 positions are to bring the State's forces up to the strength necessary to complete remaining flood damage repair and to provide necessary crews to accomplish maintenance work resulting from new maintenance areas constituting additional work load.

1 new position of construction equipment supervisor is requested to provide a person to supervise operation, maintenance, and repair of the department's heavy construction equipment. The State has many thousands of dollars invested in heavy construction equipment, such as truck-cranes, draglines, bulldozers, motor graders, earth drilling rigs, and heavy trucks. This equipment requires constant, specialized maintenance and operation supervision in order to maintain adequate service and to protect the State's investment. Such supervision is now being rendered in part by engineering personnel which is critically needed, for other work.

Flood Forecasting and Project Control:	
Senior Hydraulic Engineer	$8,112
Associate Hydraulic Engineer (2)	14,016
Assistant Hydraulic Engineer (2)	11,542
Estimated Operating Expenses	6,730
	$40,400

These new engineering positions are necessary to staff a flood control project operations unit of the department. This activity in turn is essential to the flood control operation and maintenance, flood protection, and flood fighting operations of the department, but primarily to bring up to date flood forecasting criteria and techniques and to render advice on the design of flood control features of hydraulic structures being designed.

CALIFORNIA WATER DEVELOPMENT PROGRAM

This group of projects is composed of special studies and investigations formerly budgeted as individual items of appropriation or a special appropriation measures. They all relate to the implementation of the California Water Plan and as such are properl included in the California Water Development Program.

State-wide Studies and Investigations

Analysis

The proposed program during the Fiscal Year 1957-1958 will embrace engineering and economic studies leading toward the selectio of major water development projects in the north coastal area and Sacramento River Basin to follow the Feather River Project The projects to be examined will consist of all of the various reservoirs, conduits, power plants, and other features required t insure full and comprehensive development of the water resources for local use and the export to deficient areas of the State.

In the north coastal areas, studies will include detailed consideration of works in the Klamath-Trinity area and on the Eel River.

In the Sacramento River Basin, detailed consideration will be given to major works in the Redding area and along the Yuba and Bea rivers.

The Local Projects Section of this division is engaged in the preparation of plans for projects to develop local water resources fo local needs. The program will continue studies of projects of local interest in Shasta Valley, Big Valley on the Pit River, wes side Sacramento Valley, and in the Sierra-San Joaquin, including the Consumnes and Mokelumne, Calaveras, Stanislau Tuolumne, and Merced River Basin. 4 dam sites are to be studied during the year and economic studies initiated. As basic infor mation becomes available, engineering studies will be refined.

The proposed work program for the aqueduct planning unit during the 1957-1958 Fiscal Year will include studies of an east side con duit route extending southward to the vicinity of Tulare Lake in the San Joaquin Valley and a conduit extending along th trough of the San Joaquin Valley from the vicinity of San Luis Creek to the south of Tulare Lake. The program will also includ the continuation of engineering and feasibility studies on service of imported water to areas of present water deficiency.

CALIFORNIA WATER DEVELOPMENT PROGRAM—Continued

San Joaquin Valley Drainage Study

Analysis

The lower San Joaquin Water Quality Investigation was begun in 1955 and will be completed in 1960. This cooperative investigation is a study of the water quality in the lower San Joaquin River and the effect of return waters in the river upon the water supplies of the 3 districts.

As a result of the above study and those made as a part of the State-wide Water Resources Investigation, a comprehensive study of the drainage problem in the San Joaquin Valley is considered to be necessary. Properly, such a study would involve a complete ground water investigation of the San Joaquin Valley requiring at least 6 to 8 years; however, the west side lands north of Mendota Pool are in need of an immediate solution to the drainage problem, precluding such a long investigation. Consequently, a 4-year investigation is proposed which would have the following objectives:

1. Formulation of a detailed master drainage plan for the San Joaquin Valley. This would involve review of the work done for Bulletin No. 3 and all other related work, and especially including recent work of the United States Geological Survey. Following such a review, a comprehensive study of all factors relating to drainage of the valley would be made, generally utilizing existing data to establish the location and details of the master drain as it should be constructed ultimately.
2. Intensive study of areas in present urgent need of drainage and the design of necessary works which would fit into the plan as determined in No. 1 above. This phase of the investigation would also include complete design of works, economic studies to determine feasibility in staging financing proposals, and all other studies leading to recommendations for construction of special local projects if the projects are found feasible.

Totals, San Joaquin Valley Drainage Study	–	–	$104,240

Northeastern Counties Ground Water Investigation

Analysis

Within the northeastern Counties of Modoc, Lassen, Plumas, and Sierra are 10 principal valley fill areas which may provide usable ground water storage capacity. Only small amounts of water are pumped from the basins, with the result that very little is known about the water-bearing or recharge characteristics. With development and use, these basins might provide a valuable economic source of water supply to the lower lying agriculture areas.

The investigational program would bring together by analysis, tabulation, and discussion the available geologic and archaeologic data that characterize the individual ground water basins of these counties.

The proposed work program is based on a 3-year investigation. The first 2 years would be devoted to field investigations, with the following year applied to interpreting data gathered and preparing studies for presentation, and writing, drafting, and the printing of the report. The first year's work program will include investigation of Lassen and Modoc Counties, and will include ground water level measurement, a limited well drilling program, and some initial geologic mapping and sample gathering.

Inventory of Water Supplies by Areas

Analysis

This is to continue the studies initiated by the special appropriation of $150,000 in Chapter 61, Statutes of 1956 (First Extraordinary Session). The bill directed the appropriate state department to conduct the investigations as to boundaries of the various watersheds, quantities of water originating in each, amounts required for beneficial use in watersheds, and the amounts, if any, available for export in the areas which could be served by such export.

CALIFORNIA WATER DEVELOPMENT PROGRAM—Continued

Upper Pit River Investigation

Analysis

The agricultural development in Big Valley in the vicinity of Bieber is greatly hampered due to the lack of late summer irrigation water supplies. It is proposed to investigate the possibility of construction of reservoirs at the Allen Camp site on the Pit River and at the Round Valley site on a tributary of Ash Creek for the purpose of determining the feasibility and practicability as sites for the conservation and storage of adequate water supplies; as recreational areas; and for the provision of controlled stream flow for the maintenance of fish and wild life. These reservoirs have been included in The California Water Plan for the purpose of upstream development in areas of local need.

Trial Distributions

Analysis

For the continuation of the collection and analysis of data on water supply, water utilization, water quality and water rights pertaining to the Sacramento, American, and Feather Rivers, so that orderly diversions and use of these waters may be accomplished by negotiation without recourse to litigation. The program is proposed to be continued, but at a reduced level of expenditure.

Salinity Control Barriers Study

Analysis

Chapter 1434, Statutes of 1955, appropriated funds for further investigation of the Chipps Island and Junction Points Barrier to develop complete plans of delivering fresh water to the San Francisco Bay County; to provide urgently needed flood protection to the Sacramento-San Joaquin Delta; to conduct subsurface exploration in the Delta; to design facilities appurtenant to a Cross-Delta Aqueduct; to obtain more complete information on the hydrology of the Delta; and to study integration of the proposed project with The California Water Plan. These studies will be continued during the 1957-1958 Fiscal Year.

A report submitted to the Legislature in March, 1957, will recommend the most desirable barrier plan; the probable elements of The California Water Plan which will best service the San Francisco Bay Counties during the next several years; and to make recommendations as to the desirability of immediate construction of a North Bay Aqueduct. Studies during the 1957-1958 Fiscal Year will consist entirely of completing the hydrology and design studies pertinent to the recommended barrier plan.

Upper Feather River Service Area Study

Analysis

This investigation is a continuation of one initiated in July, 1956, for which $385,000 was appropriated by Item 223.1, Budget Act of 1956. The objective is the completion of engineering and geological investigations, studies, and reports, with recommendations for a construction program for water development in the Upper Feather River service area. Included will be the investigation of 2 power projects on Union Creek and one on the Middle Fork of the Feather River; irrigation development for Sierra County multipurpose projects on the west branch of the North Fork Feather River and South Fork Feather River; and the evaluation of costs and accomplishments of the comprehensive power development on the Middle Fork Feather River.

DEPARTMENT OF WATER RESOURCES—Continued

WORK IN COOPERATION WITH THE FEDERAL GOVERNMENT

General Fund

Analysis

Through the Department of Water Resources, the State participates cooperatively with agencies of the Federal Government i various activities directed toward the accomplishment of mutual interest and to develop solutions to problems in which the is a common concern. State funds are matched by the expenditure of equal or greater amounts by agencies of the Feder Government.

The program proposed for the 1957-1958 Fiscal Year includes provision of the continuation of activities now in progress at approx mately the same level as authorized for the current fiscal year.

In addition, $25,000 is appropriated for the development of an ultrasonic device for the measurement of stream discharges an velocities. Mechanical methods of securing these data have apparently reached the peak of development and show little promis for the solution of problems for which they have not yet been adapted. The development of an ultrasonic instrument would pr vide more accurate results than can now be obtained and make possible the continuous measurement of stream flow unde conditions which prevent such measurement with existing equipment. The amount appropriated is 25 percent of a total estimate cost of $100,000 and is based upon the assumption that agencies of the Federal Government will furnish the balance. Howeve at this time only the United States Geological Survey has specifically expressed an intention to proceed with this work. In th event financial participation by the other agencies does not materialize, successful completion of this pilot installation woul require additional funds from both the State and the United States Geological Survey.

Also included are funds for the initiation of specific-yield studies to refine estimates of the storage capacity of California's groun water basins. Estimates now in use are based upon well-log examination and the assignment of specific-yield values derive from earlier work in the South Coastal Basin. Although these estimates are believed to be conservative, aquifer tests, fiel sampling, and laboratory tests are needed for improved accuracy of specific-yield values. This information is necessary t obtain reasonably accurate estimates of recoverable water from cyclic storage.

With the completion of the second phase of the Orange County Beach Erosion Control Investigation during the 1956-57 Fisc Year, a complete inventory of beach erosion problems along the California coast line from Santa Barbara to Mexico is propose

The program for the 1957-1958 Fiscal Year would be the beginning of a 3- to 5-year investigation by the United States Corps of Eng neers from Santa Barbara to the Mexican border. It is proposed that the 5 Counties of Santa Barbara, Ventura, Los Angele Orange, and San Diego would share approximately equally in the local part of the cost. The State has been informed that th United States Corps of Engineers will recommend an allocation of $15,000 in federal funds for this study, to be matched b the State of California under terms of the cooperative agreement executed in 1956. Following the practice of past investigations, the State would provide one-half the matching funds, which would amount to $7,500, and local interests would provide th other one-half, which would be turned over to the State, and a total of $15,000 would be allocated to the Corps of Engineer for the purposes of conducting the investigation.

The 1957-1958 Fiscal Year will be the second year of the 5 year research program in snowpack management conducted in cooperatio with the United States Department of Agriculture. These studies have as their objective, developing and testing ways of conserving the State's water supply through management of the mountain snowpack. About 40 percent of the State's stream flo comes from a belt of 9,000,000 acres of high elevation forest land on which snowpacks lie deep in winter and spring. This researc ties in closely with the current activities of the Department of Water Resources and is coordinated with state-wide studies fo full conservation development of water resources.

LOCAL COOPERATIVE INVESTIGATIONS

Analysis

The cooperative studies are a continuation of the local investigations formerly carried out by the State Water Resources Board under contract with the Division of Water Resources. These studies are jointly financed by the State and local areas and the purpose is to conduct a comprehensive investigation in local areas where the urgency of the water supply problems require more intensive study than that which can be provided by other water resources investigations. This proposal provides funds for the studies in Shasta County, Monterey County, San Joaquin County and the city of San Diego.

The second part of this proposal covers the printing of 4 bulletins which incorporate the results of cooperative water resource investigations with local agencies; 1 investigation which was undertaken as a result of legislative authorization; and 1 which incorporates the results of detailed basin planning under the statewide investigation directed by the former State Water Resources Board. It is necessary that these bulletins be printed in order that they may be made fully available to the citizens of the State. Basic data of vital importance to public agencies generally and specifically to local planning organizations, are found in these reports. The cooperative investigations were made under contracts with local agencies which provided for publication of a report. Due to various factors, including salary increases granted by the Legislature, available funds for these investigations were exhausted prior to publication of the final report.

STATE WATER RIGHTS BOARD

The State Water Rights Board was established by Chapter 52, First Extraordinary Session of 1956, as an independent state agency. The board consists of 3 members appointed by the Governor and is charged with the administration of Parts 1, 2, 3, and 5 of Division 2 of the Water Code.

GENERAL ANALYSIS

Number of positions	–	*53*	*69.6*	*16.6*

With the reorganization in 1956-57, 45 positions were transferred from the Division of Water Resources. Chapter 52, First Extraordinary Session of 1956, provides for 3 board members and an exempt assistant to the board. These positions, with necessary clerical staff and other related expenses will cost approximately $97,600 in 1957-58. The establishment of a separate department to carry out this activity requires at least 3 positions for work which was heretofore absorbed by the Division of Water Resources. These 3 positions and related expenses will cost an estimated $18,000 in 1957-58. The activation of the program for recordation of ground water extractions, requires the addition of about 6 man-years of staff time of all classifications to perform the work at an estimated cost of $40,000. However, these costs are recovered to the General Fund.

The remaining 10 positions reflect the new board's policy of expanding services. These services include establishment of a Los Angeles office, increased engineering work in the areas of field investigation of applications prior to permit action, inspection of permits, and licenses for compliance with the terms thereof and field investigation to collect information needed by the board when conducting consolidated basin-wide hearings.

Included in the deficiency appropriation for 1956-57 is $1,500 for the purchase of rugs for the offices of the board members.

RECLAMATION BOARD

Cooperates with the Corps of Engineers, United States Army, in construction of flood control projects through the acquisition of rights of way for such projects; acts as governing body for the Sacramento and San Joaquin Drainage District; approves construction on levee systems and flood channels; and fulfills such construction obligations as have been assumed by the State in its agreement with the Federal Government.

COLORADO RIVER BOARD

The Colorado River Board was created for the purpose of protecting California's rights pertaining to the Colorado River. The boar and its staff collects, compiles, and analyzes engineering and legal data on the existing and proposed utilization of the Colorad River water supply; appears before congressional committees and interested federal agencies; and confers with representative of other Colorado River Basin states regarding legislation and developments affecting California's rights and interests.

GENERAL ANALYSIS				
Number of positions	*17*	*21.5*	*21.5*	–

Increased salaries and wages reflect anticipated full employment of the presently authorized staff. Proceedings are now under way before the special master appointed by the United States Supreme Court in connection with litigation on rights to the waters of the Colorado River. The reduction in operating expenses is the result of a lesser need for special consultants; however, an additional $39,000 will be required for this service during the 1956-57 Fiscal Year.

CALIFORNIA KLAMATH RIVER COMMISSION

This commission was created by Chapter 1473, Statutes of 1953, for the purpose of cooperating with a similar commission representing the State of Oregon in formulating and submitting to the legislatures of both states, for their approval, an interstate compact relative to the distribution and use of the waters of the Klamath River.

TOTAL EXPENDITURES FOR SUPPORT	$36,518	$59,871	$45,485	—$14,386 (—24%)

GENERAL ANALYSIS

The California and Oregon Klamath River Commissions have drafted a compact which they expect to present to their respective legislatures for ratification during the 1957 legislative session. Following such ratification it will be submitted to the Congress of the United States with the request that the Congress consent to the compact. It is anticipated that during the next year the commission will be engaged in seeking legislative and congressional approval of the compact and making such revisions and changes as may be necessary to obtain such approval. The reduction of approximately $14,000 over estimated current year expenses is mainly due to the absence of any special studies to be made for the commission during the next fiscal year.

CALIFORNIA-NEVADA INTERSTATE COMPACT COMMISSION

he function of the commission, established by Chapter 1810, Statutes of 1955, is to cooperate with a similar commission representing the State of Nevada in formulating and submitting to the legislatures of both states and to the Congress of the United States for their approval an interstate compact relative to the distribution and use of the waters of Lake Tahoe, and the Truckee, Carson, and Walker Rivers.

GENERAL ANALYSIS

The California-Nevada Interstate Compact Commission began operations in November, 1955. The commission has initiated a detailed investigation of water supply and ultimate water requirements in the areas in California served by the Truckee, Carson, and Walker Rivers and has familiarized itself with the area and its water problems. A report on the investigations is scheduled for completion by the Department of Water Resources in September, 1957. In the meantime, various joint California-Nevada committees have been set up to explore the problems involved and develop basis for an equitable compact. Actual negotiation of compact terms during the 1957-58 Fiscal Year is anticipated following which public hearings will be held and the compact submitted to the respective state legislatures and to Congress for approval. During negotiations various questions are expected to arise which will require additional study and investigation.

A majority of the increase in the anticipated cost of services rendered by the Department of Water Resources is attributable to costs associated with publishing a report of investigations and a share in the cost of a joint commission report.

WATER POLLUTION CONTROL BOARD

The state board formulates state-wide policy for the control of water pollution; gathers, compiles, and disseminates data; and administers a program of financial assistance for water pollution control.

The regional boards coordinate programs of abatement and prevention of water pollution in local areas; recommend projects for financial assistance; and prescribe requirements for waste and sewage disposal systems.

SPECIAL ACTIVITIES

RESEARCH IN TECHNICAL PHASES OF WATER POLLUTION CONTROL

This is a basic research program to provide technical data to assist the boards to properly discharge their responsibilities under the law. This research is carried out through special projects under contractual arrangements with various outside organizations.

Analysis

In the 1956-57 Fiscal Year the study to gather background information on the effects of the submarine outfall disposal of sewage and sludge was expanded by $50,000 to a total program of $100,000. The expansion was financed through federal funds under Public Law 660.

The 1957-58 Budget provides for an augmented program in submarine outfall research. The total program will require about 5 years to complete at an estimated cost of $2,000,000. The amount of $379,808 is made up of 2 parts; the first being considered the basic and continuing program, and the second being the augmented program. The basic program is considered to be the minimum level necessary in order to effectively carry out this research. This is proposed as the state level of support for the next 5-year period.

The basic program is financed in the amount of $75,000 from the General Fund and $75,130 from Public Law 660 for the Fiscal Year 1957-58. The augmented program will be initiated in 1957-58 only upon the receipt of additional federal funds to totally finance its support.

The water quality criteria investigation is a continuation and revision of the program undertaken in former years. This program will be put into effect in 1957-58 only upon the receipt of federal funds to totally finance its support.

FIELD AND LABORATORY SERVICES BY OTHER AGENCIES

Analysis

To prevent duplication or overlapping activities, necessary field and laboratory work is performed for the boards by other state agencies best qualified to render the required technical services. Such service consists of studies of the pollution effects of sewage and industrial wastes; providing technical information necessary for prescribing discharge requirements; determining effect of drainage wells on ground waters; and special investigations as required.

The oil field studies of the San Joaquin Valley will be completed during the 1956-57 Fiscal Year. The program of services by other agencies will be carried on at a reduced level in 1957-58.

GENERAL ANALYSIS

Number of positions	*11*	–	–	–

The transfer of the powers and duties of the Water Project Authority to the Department of Water Resources, under the provisions of Chapter 52, Statutes of 1956 (First Extraordinary Session) is reflected in the budget of that department and the proposed expenditures for these activities during the 1956-57 and 1957-58 Fiscal Years are shown therein. The American and Feather Rivers Trial Distribution was initiated in the 1956-57 Fiscal Year. Expenditures for this program will be included in the Department of Water Resources.

STUDY OF SAN FRANCISCO BAY SALINITY CONTROL BARRIERS

Analysis

Under the provisions of Chapter 1104, Statutes of 1953, a study and investigation was made of the feasibility and economic value of construction by the State of barriers at several alternative locations across San Francisco Bay, San Pablo Bay, Suisun Bay, and the Sacramento-San Joaquin Delta for reclamation, salinity and flood control purposes, and to develop a supply of fresh water for domestic uses, irrigation, and other beneficial purposes.

Chapter 1434, Statutes of 1955, appropriated additional funds for further investigation and study of the Junction Point and Chipps Island barrier sites and related facilities and to develop plans for delivery of fresh water to the San Francisco Bay area; provide protection to the Sacramento-San Joaquin Delta; conduct subsurface exploration work in the Delta and design a Cross-Delta Aqueduct; to gather information on the hydrology of the Delta; and to study the integration of the project into the California Water Plan.

SACRAMENTO RIVER TRIAL DISTRIBUTION

Analysis

During 1954 this program was inaugurated to collect and analyze data on the water supply, water utilization, water quality and water rights related to the Sacramento River and Sacramento-San Joaquin Delta so that orderly diversion and use of these waters may be realized through negotiated agreements obviating the need for extended and expensive litigation.

ASSISTANCE IN CURRENT LITIGATION

Analysis

The purpose of this item was to provide assistance to the State Attorney General in litigation affecting the interest of the State in the Central Valley Project. Because of the broad and extensive experience of certain personnel of the authority with the operations and features of the Central Valley Project and the relationship of it to the California Water Plan it was possible to provide assistance which was considered essential to support the position of the State.

WATER RESOURCES BOARD

he Water Resources Board, prior to July 5, 1956, was the agency designated to study and make recommendations to the Legislature on water conservation and flood control matters; to investigate and recommend allocations from the Flood Control Fund of 1946 to local agencies to cover the cost of cooperation in flood control works constructed by the Federal Government; and to represent the State and local agencies in matters pertaining to federal authorizations and appropriations for flood control projects. In addition, the board conducted certain cooperative and special investigations authorized by the Legislature and the board.

GENERAL ANALYSIS

Number of positions	2	–	–	–

Under the provisions of Chapter 52, Statutes of 1956 (First Extraordinary Session), the Water Resources Board was abolished and its duties and powers were transferred to the Department of Water Resources. The State Water Board was established as an advisory body to the Director of Water Resources. The expenditures of the State Water Board for the 1956-57 and 1957-58 Fiscal Years are included in the budget of the Department of Water Resources.

STATE-WIDE WATER RESOURCES INVESTIGATION

General Fund

Analysis

This investigation involved a revision and completion of the State Water Plan adopted by the Legislature in 1941. Its objective was the preparation of a plan for the full conservation, control, and utilization of the State's water resources, underground and surface, to meet the present and future water needs for all beneficial purposes and uses in all areas of the State. The results of the investigation will be presented in 4 bulletins: Bulletin No. 1—Water Resources of California—a complete inventory of water resources for each of the 7 hydrographic units was published in July, 1951. Bulletin No. 2—Water Utilization and Requirements of California—was published during 1954-55. Bulletin No. 3—Plans for Development of Water Resources of California—was drafted in 1955-56 and is to be published during 1956-57. Bulletin No. 4—Summary Report on The California Water Plan—is to be drafted and published during 1956-57.

Expenditures by Project

Investigations, surveys, studies, preparation of plans and estimates, and preparation and publication of reports on state-wide water plan	$642,337	–	–

COOPERATIVE MINOR WATER RESOURCES INVESTIGATIONS

General Fund

Analysis

Comprehensive local investigations are conducted in areas where the acuteness of water supply problems require immediate and more intensive study than that provided by the state-wide investigation. This cost is shared equally by the State and local governments.

Expenditures by Project

Permanent Revolving Funds

Analysis

It is proposed to provide the means of adjusting the capitalization of the Correctional Industries Revolving Fund and the Purchasing Revolving Fund.

The amount proposed for the Correctional Industries Revolving Fund will provide a fund from which the Department of Finance can make working capital advances as the operations indicate need and to provide the additional capital required for expanded activities. Provision is made for the return of the advances upon demand of the Department of Finance.

The proposed activity in correctional industries contemplates expansion of cannery capacities at Folsom and Chino and increased production in factories at Deuel, Folsom and Tehachapi. It is also proposed to increase inventories at several institutions to a satisfactory working level and to meet anticipated increased sales.

The augmentation of the Purchasing Revolving Fund will provide for the purchase of additional automotive equipment for use by the State Automobile Pool. The increased activities of agencies using the services of the pool require the purchase of more equipment which would otherwise have been budgeted in various agencies. Provision is made for the return of the funds advanced when no longer required.

GENERAL ANALYSIS

The State Personnel Board has recommended that funds be provided for a general salary increase of approximately 5 percent, and in addition that $2,500,000 be made available from the General Fund for special salary adjustments. A comparable amount is provided for employees paid from special funds and for those whose salary is set by other than the State Personnel Board.

Nonacademic salaries	13,385,277			669,264	
Salary costs reimbursed	1,603,712			–	
Provision for special salary adjustments				2,500,000	
Total for Salaries Set by the State Personnel Board				$12,416,822	
Number of positions	*42,389.7*				
Salaries and wages	$211,686,514				

---

[a] See list of detailed allocations in budget for Reserve for Contingencies.

[b] Savings due to use of excess salary savings. The University of California used other available funds in the amount of $1,543,744.

[c] Of the total savings $1,030,014 is due to the University of California program, $627,712 is due to use of excess reimbursements of the Board of Equalization and $659,102 is due to use of excess salary savings.

[d] Executive orders are issued by the Department of Finance to augment legislative appropriations from special funds in the amount required to provide for salary increases in accordance with the provisions of the Budget Act. Executive orders are not required from those funds with fixed or continuing appropriations. The amount for 1957-58 includes the estimated requirements from salary increase authorizations and from fixed and continuing appropriations.

[e] Federal, trust and other funds are excluded from over-all budget totals.

General Emergencies

The Emergency Fund is to provide for contingencies for which no appropriation or insufficient appropriation has been made by law. Amounts necessary are allocated to agencies by the Department of Finance upon finding of need.

SUMMARY AND RECONCILIATION WITH APPROPRIATIONS

General Fund

	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
General Emergencies:			
Budget Act appropriation	$1,000,000	$1,000,000	$2,000,000
Deficiency appropriation	220,234	–	–
Allocations to agencies	—879,777	—689,725	–
Unexpended balance, estimated savings	—340,457	–	–
Price Increases:			
Budget Act appropriation	534,213	–	–
Unexpended balance, estimated savings	—534,213	–	–
Flood Control:			
Special appropriation, Chapter 14, Statutes of 1956 (First Extraordinary Session)	1,000,000	–	–
Allocations to agencies	—860,953	–	–
Unexpended balance, estimated savings	—139,047	–	–
TOTAL EXPENDITURES	–	$310,275	$2,000,000

GENERAL ANALYSIS

The allocations for 1955-56 include extraordinary amounts of $127,234 for the Department of Agriculture for suppression of khapra beetle and $270,000 to the Division of Forestry for emergency fire suppression.

In addition a deficiency appropriation of $1,000,000 was provided for emergency expenditures incurred by state agencies in connection with the flood disaster of December, 1955, and January, 1956.

The allocations include $147,543 for the Department of Agriculture for detection of the Mediterranean fruit and melon fly.

The appropriation for price increases was authorized to provide for increased costs due to purchase of butter in lieu of margarine in accordance with Section 656 of the Agricultural Code. No purchase was required.

The requested appropriation for 1957-58 is greater than the amount necessary for the 1956-57 year to provide for unusual deficiencies which are met by deficiency appropriations during a regular session of the Legislature, whereas such deficiency appropriations may not be made at the budget session in 1957.

GENERAL ANALYSIS

These debt service charges do not include charges on bonds issued for construction at the San Francisco harbor, or charges on bonds issued for the veterans' farm and home loan program. They are general obligation bonds; however, the charges are primarily the obligation of the respective utility fund. The activity of these funds are reported in the appendix section of the budget.

Debt service charge on school building bonds are considered as assistance to local units of government and are reported under the Local Assistance Budget, Subventions for Education.

Chapter 1709, Statutes of 1955, provides for issuance of the State Construction Program bonds as funds are needed for construction of authorized projects. It is estimated that moneys will not be required before January 1, 1958, and interest on these bonds will not be due until the 1958-59 Fiscal Year.

Interest and redemption charges on highway bonds are withheld from motor vehicle license fee revenues.

Interest and redemption charges on bonds issued for construction of state and university buildings, and for acquisition of areas for state park purposes, are currently met from funds which were set aside from General Fund surplus and placed in the Bond Sinking Fund of 1943. Sufficient funds were set aside to meet all debt service requirements to final maturity; however, $5,000,000 was transferred to the Highway Fund to be used as a loan to the Golden Gate Bridge and Highway District, to be returned out of toll revenues after the bonded indebtedness of the district is retired in 1971. Available funds in the Bond Sinking Fund of 1943 will be exhausted in the 1956-57 Fiscal Year.

There has been transferred to the State Buildings Interest and Sinking Fund sufficient money to retire the outstanding Sacramento state buildings bonds, which will become due in 1965.

---

[a] Donated funds. Neither receipts nor expenditures are included in the budget totals.

Accumulated Surplus, June 30 [b]	$3,434,631	$3,530,801	$3,629,661

---

[a] Excludes $5,000,000 due from the State Highway Fund advanced as a loan for the Golden Gate Bridge and Highway District, to be repaid out of toll revenues after the bonded indebtedness of the district has been retired. There are sufficient funds to provide for part of the debt service charges for the 1956-57 Fiscal Year, thereafter funds must be entirely provided from the General Fund until the loan is returned.

[b] The accumulated surplus is in excess of the $3,000,000 required to retire the bonds, and will continue to increase by the amount of interest earned on investments until the bonds are redeemed on July 2, 1965.

STATE BUILDING PROGRAM

SUMMARY OF PROPOSED NEW CAPITAL OUTLAY APPROPRIATIONS FOR 1957-58

The following table summarizes the proposed new appropriations for the 1957-58 Fiscal Year for the State Building Program b departments. Detailed explanation and description of each project is contained in the following agency detail budgets.

AGENCY AND PROJECT	PROPOSED NEW APPROPRIATIONS		
	FROM CAPITAL OUTLAY AND SAVINGS FUND	FROM STATE CONSTRUCTION PROGRAM FUND [a]	FROM OTHER FUNDS
Department of Agriculture:			
Fruit and vegetable standardization station	$51,150	–	–
Minor construction and improvements	2,350	–	–
Totals, Department of Agriculture	$53,500	–	–
Poultry Improvement Commission:			
Minor construction and improvements	–	–	$16,600
Department of Corrections:			
Men's Colony—New medium security facility	–	$11,500,000	–
Men's Colony—Whale Rock Dam (partial cost)	$620,000	–	–
Institution for Men—Enlarge bakery	270,900	–	–
Institution for Men—Replace reservoir roof	84,750	–	–
Institution for Men—New incinerator	50,850	–	–
Institution for Men—Industrial warehouse	49,500	–	–
Institution for Men—Convert boilers for gas	83,650	–	–
State Prison at Folsom—Industrial warehouse	294,750	–	–
State Prison at Folsom—Extend telephone system	85,950	–	–
State Prison at Folsom—Roadway ramp to lower yard	83,300	–	–
State Prison at Folsom—Industries office building	63,175	–	–
State Prison at Folsom—Filtration plant	46,225	–	–
State Prison at San Quentin—Isolation and segregation unit	677,600	–	–
State Prison at San Quentin—Catholic chapel	397,300	–	–
State Prison at San Quentin—Maintenance warehouse	89,700	–	–
State Prison at Soledad—Water closets and lavatories	272,350	–	–
State Prison at Soledad—Expand dairy facilities	448,100	–	–
State Prison at Soledad—Additional boiler	80,200	–	–
State Prison at Soledad—Sewage disposal capacity	60,600	–	–
State Prison at Soledad—Sewage effluent basin and pipeline	78,100	–	–
Deuel Vocational Institution—Reception-guidance center	2,527,700	–	–
Minor construction and improvements	486,045	–	–
Totals, Department of Corrections	$6,850,745	$11,500,000	–
Department of the Youth Authority:			
Youth Training School—Chapel	$83,800	–	–
Northern California Reception Center—Alterations and additions	88,200	–	–
Northern California Reception Center—Equipment for alterations	4,400	–	–
Southern California Reception Center—Major alterations and additions	473,000	–	–
Southern California Reception Center—Equipment for alterations and additions	14,100	–	–
Fricot Ranch School—Athletic field improvements	23,355	–	–
Fricot Ranch School—Employee housing	28,100	–	–
Fricot Ranch School—Equipment for employee housing	1,300	–	–
Fred C. Nelles School—Site improvements	105,000	–	–
Fred C. Nelles School—Improve water system	130,630	–	–
Preston School of Industry—Boys' dormitory	187,400	–	–
Preston School of Industry—Equip boys' dormitory	9,000	–	–
Los Guilucos School—Alterations and additions	386,200	–	–
Los Guilucos School—Equipment for alterations and additions	11,000	–	–
Ventura School—Working plans for new institution	100,000	–	–
Minor construction and improvements	160,350	–	–
Totals, Department of the Youth Authority	$1,805,835	–	–
Department of Education:			
State Colleges:			
Chico—Equip classroom building No. 2	$90,000	–	–
Chico—Library addition	1,119,800	–	–
Chico—Site acquisition for new buildings	450,000	–	–
Chico—Site acquisition for farm	–	–	$500,000
Chico—Classroom building No. 3	728,200	–	–
Chico—2 residence halls	–	$1,589,240	–
Fresno—Equip art-homemaking building	140,000	–	–
Fresno—Equip engineering building	223,000	–	–
Fresno—Outdoor physical education facilities	107,700	–	–
Fresno—Speech-drama building	2,195,400	–	–
Fresno—Boiler	81,250	–	–
Fresno—2 residence halls	–	1,494,250	–
Humboldt—Equipment for outdoor physical education	7,000	–	–
Humboldt—Speech-arts building	1,965,400	–	–
Humboldt—Site acquisition for new buildings	172,500	–	–
Humboldt—Fieldhouse and pool	559,425	–	–
Humboldt—Administration and business education building	898,190	–	–
Humboldt—Residence hall	–	790,500	–

---

[a] Expenditures from bond fund not included in over-all budget totals.

[b] Fair and Exposition Fund.

[c] State College Fund.

GENERAL ANALYSIS

The 5-year building program of this department is designed to provide facilities that will meet the anticipated population growth and ultimately permit housing of inmates according to the following standards:

For cell buildings—1 bed and 1 prisoner per cell.
For dormitories—1 bed and 1 prisoner per 50 square feet of floor space.

The program also includes structural rehabilitation of the older prisons and elimination of unsafe facilities.

The rated capacities shown below are computed on the above standards with 25 percent of the hospital beds being included at all institutions, except Medical Facility and Men's Colony where all beds are counted.

The projected population is based on an anticipated court commitment rate of 50 per 100,000 population in the 15-64 age group for adult male felons and 2.8 per 100,000 in the same age group for adult female felons. Furthermore, a new program of intensive inmate treatment is expected to reduce the population 1,000 by June 30, 1959.

The 1957-58 major construction program is primarily directed toward an expansion in capacity to meet the needs of the increasing inmate population and to progress toward the goals set forth above. Additional construction to increase rated capacity by 1,200 at the Men's Colony and by 300 at the Deuel Vocational Institution is proposed. Initial funds for the Men's Colony project were provided in the 1956-57 Budget to prepare working drawings and bring utilities to the site. The 1957-58 Fiscal Year proposal includes housing units and certain basic service and treatment facilities, with other necessary auxiliary buildings to be proposed in the 1958-59 Fiscal Year. The Deuel Vocational Institution project will provide a 300-bed reception-guidance center for Youth Authority wards committed by the criminal courts. Other major construction projects provide for the razing of the old isolation-segregation building and captain's office at the State Prison at San Quentin and the construction on these sites of a new isolation-segregation facility and a chapel; for the construction of service and utility facilities at various institutions; and for expansion of industrial activities.

The 1957-58 minor construction program mainly proposes essential projects at the older institutions, and minor improvements and alteration projects at the newer institutions.

(See page 1010 for Summary of all Capital Outlay projects.)

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58

Departmental Administration

Funds have been allocated on a department-wide basis in the 1955-56 and 1956-57 Fiscal Years for preparation of preliminary plans for the capital outlay projects to be budgeted in the subsequent year. The allocations in the 1956-57 Fiscal Year include funds for revision of the institutions' master plans. Preliminary plans expenditures are reported in the respective institution budgets.

Medical Facility

This new permanent institution, with a rated capacity of 1,370, provides special custody of inmates who are mentally defective, chronically ill, narcotics addicts, sex offenders, or otherwise physically or mentally abnormal. Close custody will be provided in the reception-guidance center unit for observation and study of new commitments, prior to assignment to other institutions. This unit, with a rated capacity of 600, is now under construction and will be occupied in the 1957-58 Fiscal Year. Due to the type of inmates there is a limited training program and the emphasis is on treatment.

The institution is located in Solano County about two miles south of Vacaville and consists of 903 acres of land, of which approximately 100 acres are to be used for inmate and employee building areas.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58

Men's Colony

The present facility is located in the hospital section of Camp San Luis Obispo with a capacity for 1,200 inmates in army barracks.

Pursuant to Section 2046 of the Penal Code, it is planned eventually to build a 3,000 capacity medium security institution on this property which is owned by the State. Funds to start construction of the initial increment of 1,200 capacity are proposed in this budget. Additional increments will be added in the future as necessary with the barracks buildings now in use being replaced eventually.

Prior appropriations for the new medium security prison to secure a site and prepare working plans have been reverted as reflected in this budget.

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1957-58 EXPENDITURES*

	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
New Medium Security Facilities:			
Construction (partial cost)	–	–	$11,500,000
State Construction Program Fund:[a]			
Budget Act of 1957 Proposal			
Project provides for initial increment of 1,200 capacity to be financed in 2 phases. Phase 1 includes housing units and basic service and treatment buildings. Phase 2, will provide other auxiliary facilities and will require less time for construction. Phases 1 and 2 will provide an operable institution of 1,200 capacity. Ultimate development contemplates an institution of 3,000 capacity.			
Construct Whale Rock Reservoir and water distribution system	–	–	620,000
Budget Act of 1957 Proposal			
This is the Men's Colony portion of a joint project with the California State Polytechnic College and the City of San Luis Obispo. This project would provide a firm water supply for the proposed new medium security facilities.

Correctional Facility, Chino

A 1000-capacity institution was to have been established on the Chino property in accordace with the provisions of Section 6200 of the Penal Code. It would have housed partially physically incapacitated, chronically infirm, or those in need of special treatment because of advancing age. Most of the inmates in this specialized group are now being cared for at the Men's Colony. As this institution is not needed in the immediate future, funds for working drawings have been reverted.

Institution for Men, Chino

Analysis

This is primarily a minimum security prison with an extensive agricultural and industrial program. The institution is located in San Bernardino County about 2 miles south of Chino on 2,566 acres of land. It was opened in 1941 and consists of reinforced concrete permanent main buildings, semipermanent steel industrial buildings, frame farm buildings and temporary steel barracks buildings, and has a rated permanent type capacity of 828. Temporary barracks with a capacity of 350 are now in use, and the perennial state camps have a capacity of 510. The southern reception-guidance center is located on a 15-acre portion of the Chino site, and is reinforced concrete construction with a capacity of 408 inmates.

The Tehachapi branch, located at the former women's institution near Tehachapi, is administered by the main institution at Chino. It has a rated capacity of 300.

This budget proposes the replacement of the reservoir roof, the enlargement of the bakery to provide for the new Youth Training School to be constructed on the grounds, and construction of an incinerator. Also, an industrial warehouse is proposed for the Tehachapi Branch.

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1957-58 EXPENDITURES*

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Enlarge bakery	–	–	$270,900
Budget Act of 1957 Proposal			
To provide additional capacity made necessary by increased work load imposed by construction of the new Youth Authority institution on the Chino site.			
Replace reservoir roof	–	–	84,750
Budget Act of 1957 Proposal			
To replace a condemned roof on the domestic water reservoir including bypass plumbing during construction.			
Construct incinerator	–	–	50,850
Budget Act of 1957 Proposal			
To provide safe and sanitary disposal of burnable trash.			
Construct industrial warehouse (Tehachapi Branch)	–	–	49,500
Budget Act of 1957 Proposal			
To provide warehousing for the new industrial activities.			
Construct incoming and distribution natural gas lines and convert oil-fired burner equipment to natural gas operation	–	–	83,650
Budget Act of 1957 Proposal			
To permit the use of surplus natural gas in lieu of fuel oil to reduce the cost of heating the institution.

State Prison at Folsom

This is a maximum custody prison with a large industrial program. The permanent facilities are constructed of reinforced concrete. The institution is located 2 miles northeast of Folsom and was constructed in 1858. The rated capacity of this institution consists of permanent facilities for 1513 inmates, temporary structures housing 444 men, and 3 perennial camps with a total of 200 beds. This budget provides for additional warehouse space for the expanded cannery, an industries office building, and necessary service and utility projects.

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1957-58 EXPENDITURES *

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Construct industrial warehouse *Budget Act of 1957 Proposal* This project will provide the additional warehouse space required by correctional industries in the operation of the cannery, license plate plant and the furniture refinishing factory. The production capacity is being expanded in the 1956-57 Fiscal Year.	–	–	$294,750
Extend telephone system *Budget Act of 1957 Proposal* This project will provide for replacement of an inadequate telephone system.	–	–	85,950
Construct roadway ramp to lower yard *Budget Act of 1957 Proposal* This project will facilitate vehicular traffic to the lower yard and reduce custodial costs.	–	–	83,300
Construct industries office building *Budget Act of 1957 Proposal* This project will provide administrative quarters in the new industrial area.	–	–	63,175
Construct filtration plant *Budget Act of 1957 Proposal* The project will provide for the filtration of domestic water received from Folsom Dam.	–	–	46,225

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
State Prison at Folsom—Continued			
MINOR CONSTRUCTION, IMPROVEMENTS, REPAIRS, AND EQUIPMENT			
Complete repair of boilers 1 and 2	–	–	$19,475
Surface roadways in main yard area for movement of vehicles and inmates	–	–	11,000
Install screens in kitchen and mess hall to meet sanitation standards	–	–	2,000
Improve cell lighting (3d of 4 increments)	–	–	10,000
Install fluorescent lighting in offices and shops (2d of 4 increments)	–	–	6,500
Install acoustical improvements and floor covering in chapel	–	–	2,800
Construct hay storage barn for dairy	–	–	18,950
Replace inadequate count post and install plumbing at commissary gate to provide sufficient working space	–	–	3,000
Complete paving of valley roads, enlarge and improve parking lot (first increment of 4)	–	–	15,000
Provide bleachers for baseball diamond	–	–	3,200
Install additional emergency lighting in cell blocks	–	–	7,000
Relocate fence from Post No. 5 to Post No. 8	–	$3,330	–
Construct new chain link fence and sally port	–	17,990	–
Provide security lighting system between Posts No. 5 and No. 8 including sally port	–	10,030	–
Replace smokestack on No. 3 boiler	–	10,760	–
Install heating and ventilation of educational building and ventilate band room, handicraft room, print shop, and paint spray booth	–	5,560	–
Convert heating system at Honor Camp No. 8 to liquid petroleum gas	–	2,670	–
Install hot water tanks for cell buildings	–	19,580	–
Install equipment for preventive maintenance program	–	2,000	–
Improve cell lighting (2d of 4 increments)	–	10,000	–
Improve cell lighting (1st of 4 increments)	$8,169	1,831	–
Install selective locking devices in segregation building (1st and 2d increments)	22,555	21,765	–
Cell lockers and desks for segregation building	3,312	188	–
Construct vents and install forced air circulation equipment in segregation building	325	1,980	–
Install security fence on cell fronts in segregation building, second and third floors	1,972	433	–
Replace 4 presses, 2 washers, and 10 hand trucks, and provide 4 additional presses for laundry	18,062	9,238	–
Ground cover for recreation field	1,623	377	–
Install 6 evaporative coolers in offices	1,458	142	–
Construct industries offices and time check station, and fence industrial area	–	3,390	–
Install transformers and wiring to provide 220-volt electrical service for valley homes	3,149	—49[a]	–
Install fluorescent lighting in offices and shops (1st of 4 increments)	4,681	1,819	–
Alterations to and equipment for receiving warehouse	4,519	131	–
Curbing for all security fencing	3,711	539	–
Relocate 3 quonset huts	5,633	877	–
Install insecticide spray equipment in main kitchen, mess halls, and commissary warehouse	2,806	114	–
Install 13 refrigerated water coolers in working areas because of deactivation of ice house	3,522	—12[a]	–
Retube boiler	8,915	135	–
Capacitors for electrical distribution system	1,816	—16[a]	–
Custodial supervision for current projects undertaken by Division of Architecture	–	2,450	–
Improve roadways, sidewalks, and gutters	13,010	304	–
Install paint spray booth in auto body and fender shop	5,739	2,501	–
Improvements to sewage plant	875	7,365	–
Occupational therapy unit for segregation building	410	104	–
Relocate Guard Post 17 and construct control walkway—segregation area	24	1,504	–
Construct camp warehouse	85	87	–
Various completed projects	2,283	–	–

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58

State Prison at San Quentin

This is a general purpose prison with an extensive industrial program. The permanent facilities are constructed of reinforced concrete and have a rated capacity of 2,472. Temporary facilities have a rated capacity of 190, and the perennial camps will house 344. Conversion of the west cell block from a reception-guidance center to a regular housing unit will not alter the total capacity. The institution is located in Marin County 3 miles southeast of San Rafael on a 404-acre site with a very limited area suitable for buildings.

This budget provides for the construction of a new isolation and segregation building, a Catholic chapel and an addition to the maintenance warehouse. The old captain's office and condemned isolation and segregation building will be razed to provide space for the isolation-segregation building and the chapel.

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1957-58 EXPENDITURES*

	Actual 1955-56	Estimated 1956-57	Proposed 1957-58
Construct isolation and segregation building (100 capacity) *Budget Act of 1957 Proposal* Project consists of a 3-story cell building containing a dining room and 2 therapy rooms to care for seriously maladjusted inmates. A paved and fenced exercise yard will be provided adjacent to the cell block. The captain's office now on the site will be razed.	–	–	$677,600
Construct Catholic chapel *Budget Act of 1957 Proposal* Project provides a seating capacity of 348, and offices for the chaplains and inmate clerks. The old isolation-segregation building, which is condemned, is now on the site and will be razed.	–	–	397,300
Addition to maintenance warehouse *Budget Act of 1957 Proposal* Project provides for an additional 7,773 square feet to be added to the existing maintenance warehouse to consolidate, protect and permit establishment of control of maintenance materials now inadequately stored in various locations.	–	–	89,700

ESTIMATED 1955-56 AND 1956-57 EXPENDITURES*

	Source of funds 1955-56	Source of funds 1956-57	Actual 1955-56	Estimated 1956-57	Proposed 1957-58
Preliminary Plans for:					
Commissary, laundry and maintenance shops building			–	$6,000	–

State Prison at San Quentin—Continued			
MINOR CONSTRUCTION, IMPROVEMENTS, REPAIRS, AND EQUIPMENT			
Complete electrical distribution system	–	–	$14,900
Install cell shelving (first of 4 increments)	–	–	9,000
Alterations and additions to fire sprinkler system—cotton textile mill	–	–	8,730
Install fluorescent cell lighting—north block 415 cells (second of 3 increments)		–	15,000
Replace 20 fire hydrants (final increment of 2)		–	8,240
Erect steel bleachers for athletic field (500 seats)	–	$10,000	–
Provide radio control and public address system in construction dormitory	–	850	–
Install fluorescent lighting for print shop	–	1,600	–
Construct building and facilities for vocational landscape gardening courses	–	9,600	–
Construct chain link fence for industrial area	–	1,300	–
Construct extension to lumber storage area	–	6,400	–
Construct intensive treatment facilities	–	9,500	–
Custodial coverage to continue existing Department of Public Works projects	$10,791	18,829	–
Reroof west cell block	9,320	49	–
Replace old condensate pump system to eliminate flooding of basements	2,253	1,477	–
Reactivation of inside salt water pumping plant	–	8,520	–
Install print shop partitions and firewall	2,902	98	–
Install fluorescent cell lighting—north cell block (first of 3 increments)	1,039	–	–
Replace 20 fire hydrants (first of 2 increments)	5,962	438	–
Deferred maintenance projects	–	—6,909 [a]	–
Construct smokehouse for general mess to eliminate purchase of smoked meats		3,195	–
Level floor of meat cutting room and install stainless steel sheeting on walls	758	307	–
Replace air compressor in laundry to provide increased capacity	1,760	740	–
Provide central showers and screens for windows in gymnasium	755	45	–
Completion of road paving throughout the institution	13,100	1,900	–
Provide partitions in administration building and classification and parole offices	545	155	–
Provide security floodlights in cell block areas to eliminate custodial hazards	–	6,390	–
Provide hot water for 50 convalescent cells in south cell block	–	2,770	–
Extend fresh water mains and install a stand-by pump as a fire protection measure	–	6,920	–
Provide 2 additional showers for construction crew dormitory	332	68	–
Provide testing laboratory for sewage disposal plant	423	—23 [a]	–
Alter and equip existing quonset buildings for vocational education electrical shop	–	7,455	–
Install ventilation system in hospital surgery	364	666	–
Extend sewer collection system to service the entire reservation	9,675	2,934	–
Relocate vocational auto shop inside security area	898	15,340	–
Equip existing quonset building for vocational and related use	805	295	–
Construct ranch dormitory recreation hall and dayroom to provide 80 additional capacity	767	13,673	–
Replace roof supports and roofing—south cell block	981	545	–
Pave and resurface roads	1,619	9	–
Extend salt water mains for fire fighting and toilet flushing	600	2,105	–
Install mezzanine balcony over east end of furniture factory to be used as a clothing factory	3,273	–	–
Minor renovation in reception-guidance center	1,022	–	–
Construct building for storage of lumber adjacent to furniture factory to eliminate transportation from waterfront area	740	–	–
Erect 5 cooling towers and fresh water circulator to reduce high water usage	1,093	–	–
Various completed projects	651	–	–
TOTAL EXPENDITURES (Minor Construction) *(Capital Outlay and Savings Fund)*	$72,428	$127,241	$55,870

State Prison at Soledad

This is a medium security institution with an agricultural and vocational training program. Construction of permanent facilities reinforced concrete was completed in December, 1951, to house 1,552 inmates. A temporary unit with a rated capacity of 4 houses inmate farm workers in prefabricated steel buildings, and the perennial camps have a capacity of 150. The institution located in Monterey County about 4 miles north of Soledad on 936 acres of land of which approximately 100 acres are used f inmate and employee building areas. The remainder of the site is used for an extensive agricultural program. A currently finance satellite unit with an additional capacity of 1,200 is expected to be completed in 1958 and will permit deactivation of the temp rary unit. This will bring the rated capacity of the institution up to 2,752 in permanent facilities.

CAPITAL OUTLAY EXPENDITURES	Source of funds 1955-56	Source of funds 1956-57	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT					
PROPOSED 1957-58 EXPENDITURES*					
Install water closets and lavatories in existing cells (third increment)			–	–	$272,350
Budget Act of 1957 Proposal					
This proposal is the third increment of 4, which would eventually provide better security, and is a part of the expansion program at this institution.					
Expand dairy facilities			–	–	448,100
Budget Act of 1957 Proposal					
To provide additional facilities to permit expansion of the dairy herd. The expanded operation will provide additional inmate employment and milk production required when the new satellite institution is activated, as well as supplying milk to Agnews State Hospital.					
Additional boiler			–	–	80,200
Budget Act of 1957 Proposal					
This project will provide additional steam capacity for the new 1,200-capacity unit.					
Additional sewage disposal capacity			–	–	60,600
Budget Act of 1957 Proposal					
This project will provide additional capacity of present sewage plant for new 1,200-capacity unit.					
Construct sewage effluent holding basin and pipeline			–	–	78,100
Budget Act of 1957 Proposal					
To provide pumping facilities and a pond for disposition of additional effluent on institution property. This project is in lieu of an additional outfall line to the Salinas River.					
ESTIMATED 1955-56 AND 1956-57 EXPENDITURES*					
Preliminary Plans for:					
Installation of water closets (second and third increment)			$700	$650	–
Additional boiler			–	900	–
Additional sewage disposal unit			–	800	–
Additional dairy facilities			–	1,600	–
Cannery			900	2,800	–
Holding basin and pipeline for irrigation			–	325	–
Budget Act of 1956, Item 422		*$7,075*			
Budget Act of 1955, Item 398	*$1,600*				
Additional Cell Buildings:					
Construction			6,658,300	265,200	–
Equipment			–	610,000	–
Water Closets and Lavatories in Existing Cells:					
First increment			59,030	4,295	–
Second increment			–	109,350	–
Equip farm annex for additional capacity			1,194	6,216	–
Budget Act of 1956, Item 303		*609,350*			
Budget Act of 1955, Item 292	*5,633,330*	*22,895*			
Budget Act of 1954, Item 293	*1,085,194*	*116,216*

Deuel Vocational Institution

This medium security institution is located in San Joaquin County about 4 miles east of Tracy. It is primarily an agricultural-vocational training institution. It houses 1,227 inmates in reinforced concrete facilities. The site consists of 783 acres of land, of which approximately 80 acres are used for inmate and employee housing areas, with the remainder used for farming.

This budget proposes the construction of a 300-bed reception-guidance center to receive and process Youth Authority wards committed from the criminal courts. The reception process is currently performed in one of the cell blocks of the main institution.

[a] Includes $40,800 estimated expenditures from "carry-over" appropriations previously enacted by the Legislature.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

GENERAL ANALYSIS

The capital outlay program of the Department of the Youth Authority is planned to meet the capacity requirements resulting from the increasing California juvenile population. The demand for additional capacity is being alleviated to some extent by a program of encouraging improvements in juvenile law enforcement, increased use of probation, increased use of county juvenile homes and camps (subsidized by the State at one-half cost or not to exceed $95 per month per ward) and increased use of parole.

The major part of the capital outlay program for the 1957-58 Fiscal Year consists of projects for major alterations and additions at the two reception centers and Los Guilucos School for Girls to eliminate major operational difficulties. Also included is provision for working plans for the construction of the new Ventura School for Girls to replace the present institution and provide increased capacity for girls.

Projects related to added capacity for boys include a 50-boy dormitory for Preston School of Industry and a chapel for the new Youth Training School. This is part of the initial 400-boy capacity increment of construction.

2 projects to virtually complete the rehabilitation and modernization of Fred C. Nelles School for Boys are also proposed. These include improvements to the water supply and distribution system and fence, road, and site improvements to increase fire protection and custodial security.

A duplex for employee housing and completion of the athletic field are proposed for Fricot Ranch School for Boys.

(See page 1010 for Summary of all Youth Authority Capital Outlay projects.)

Departmental Administration

Funds have been allocated on a department-wide basis in the 1955-56 and 1956-57 Fiscal Years for preparation of preliminary plans for the capital outlay projects to be budgeted in the subsequent year. The allocations in the 1956-57 Fiscal Year include funds for revision of the institutions' master plans. Preliminary plans expenditures are reported in the respective institution budgets.

Youth Training School

Chapter 303, Statutes of 1949, added Section 1250 to the Welfare and Institutions Code which provides for "an institution for the confinement of males to be known as the Youth Training School." It will be located on the site of the Institution for Men, Chino. It is planned that this school will ultimately house 1,200 wards of the 18 to 21 age group. It will have a vocational and educational type program. The capacity of the initial development will be 400 beds plus 28 hospital and detention beds.

Northern California Reception Center and Clinic

This institution is located on a 17-acre site approximately 7 miles east of Sacramento, near Perkins. This facility receives all boys and girls from Northern California. The major purpose of this facility is to centralize intake and to make diagnostic studies and training recommendations on each case. Intensive medical, dental, psychological, and psychiatric treatment are given. Serious medical and psychiatric cases developing in the schools are also treated.

The new institution was completed in June, 1954, with a capacity of 141 dormitory beds and 26 hospital and detention beds. An additional 70 beds will be added in the 1956-57 Fiscal Year.

Forestry Camps for Boys

In cooperation with the Division of Forestry, 3 forestry camps for boys are being operated. These camps are located at Mount Bullion, Pine Grove, and Ben Lomond. The former main camp at Coarsegold will become a spike camp, and one of the present spike camps will be discontinued. In addition to the 3 main camps, 3 spike camps are operated on a year-round basis. With the exception of the new camp, structures in the camps are primarily of a temporary nature, either old CCC camp buildings or other wooden or Butler type buildings.

Fricot Ranch School for Boys

Fricot Ranch School for Boys is located in the foothills, 11 miles from San Andreas, at an elevation of approximately 1,700 feet. The general terrain of the country is mountainous. New construction is of concrete floor slab with radiant heating, frame walls and ceilings. Of the total of 1,090 acres, buildings are located on approximately 50 acres. Completion of the 20-bed segregation-administration unit in the 1956-57 Fiscal Year increases the capacity to 182, including 12 beds in the hospital and 3 dormitories housing 50 boys each.

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1957-58 EXPENDITURES*

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Athletic field improvements (partial cost)	–	–	$23,355
Budget Act of 1957 Proposal			
This project will permit completion of athletic field improvements including leveling, grass planting, sprinkler system, and drainage facilities.			
Duplex for Employee Housing:			
Construction		–	28,100
Equipment	–	–	1,300
Budget Act of 1957 Proposal			
This project will provide housing for 2 employees and their families. This institution is located in a mountainous region where housing for employees is difficult to obtain, resulting in recruiting and turnover problems.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

Fred C. Nelles School for Boys

Fred C. Nelles School for Boys was constructed in 1890 at Whittier, California. The institution is largely of brick construction with a capacity on June 30, 1958, of 354 including the hospital and detention units with a capacity of 37. The buildings are in good condition, except several buildings damaged by earthquakes are being replaced in the 1956-57 Fiscal Year.

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1957-58 EXPENDITURES*

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Roads, fence, and site improvements	–	–	$105,000
Budget Act of 1957 Proposal			
This project wil provide new fence and gates, relocate existing fences, widen and relocate roads, and relocate and enlarge the visitors parking area. This will result in increased security, improved fire protection, and all employee housing will be located outside the security area.			
Improve water supply and distribution system	–	–	130,630
Budget Act of 1957 Proposal			
This project is necessary for adequate fire protection and sufficient domestic water capacity. It includes new fire hydrants, replacement of part of the domestic water system, replacement of a well, water tank improvements, and other minor improvements, and a connection to the City of Whittier.

Paso Robles School for Boys

The Paso Robles School for Boys is located near Paso Robles, San Luis Obispo County. The school site covers 203 acres and the institution occupies an area of approximately 40 acres. The permanent facilities will have a capacity of 443 plus hospital and detention capacity of 40 when new facilities are completed in the 1957-58 Fiscal Year. All buildings at this institution are of single-story construction and are of reinforced brick construction with radiant heating. Each cottage houses 50 boys and is of dual type: single rooms and dormitories.

Preston School of Industry

Preston School of Industry was constructed in 1894 at Ione. A reconstruction program to replace and relocate many condemned and inadequate facilities is nearing completion. Upon completion of the proposed 50-bed dormitory, the dormitory and segregation capacity will total 732 plus 94 hospital and detention beds.

DEPARTMENT OF EDUCATION—Continued

GENERAL ANALYSIS

State Colleges: There are, at present, 11 established state colleges. A major portion of the capital outlay funds appropriat since 1946 for educational purposes has been used to construct 7 new college campuses in San Francisco, Fresno, S Dimas, Long Beach, Sacramento, and Los Angeles. San Francisco moved completely to its new campus for the 1954 f semester. Negotiation with the University of California is currently under way for transfer of the old state college campus si to the University. Fresno State College has occupied a considerable number of permanent buildings on its new campus a should complete its move before fall, 1958, after the construction of facilities financed in 1956-57. This will enable the Fres school district to purchase the old state college plant for use by the junior college. The California State Polytechnic Colle Kellogg-Voorhis campus moved into its first permanent structure in fall, 1956. Other buildings are currently financed. Bo Long Beach and Sacramento State Colleges are now occupying permanent facilities for the most part. Permanent sites for separate campuses for Los Angeles State College of Applied Arts and Sciences have been purchased. One contains 160 acr in the San Fernando Valley for a liberal arts college, and the other consists of approximately 95 acres off the San Bernardi Freeway near downtown Los Angeles with a program emphasis in the applied arts and sciences. In the spring of 1956, major part of the instructional program was moved from the rented City College campus to newly completed tempora facilities on the San Bernardino Freeway campus. The 1956-57 projects included sufficient permanent facilities to enable comple transfer from the rented campus by the 1958-59 school year. This will result in a large annual saving in rental costs of City College campus. Temporary facilities on the San Fernando Valley campus were completed in time for opening of class in fall, 1956.

Despite gains made by extensive new construction, many colleges are still seriously overcrowded due to unexpectedly large enro ment growth since 1945. In 1939-40, the highest prewar enrollment of the State College System was 10,376 students, while reg lar day enrollments for the current 1956-57 school year are 41,551 full-time equivalent students. Enrollment projections for buil ing program purposes indicate a comparable full-time equivalent regular student attendance of 61,200 in 1959-60. Enrollme trends have been estimated from actual statistics on high school graduates and include a compilation by county of origin whi permits reasonably accurate distribution of students by college or university area. Projections assume a continual increase the percentage of population attending college in tax-supported institutions. Enrollment of veterans under the Veterans Ed cational Assistance Acts is assumed to continue to increase through 1959-60.

The 1957-58 capital outlay program for the colleges totals $91,953,405 and is designed primarily to assure sufficient housing a instructional areas for needs in the fall semester, 1959.

The program is tabulated as follows:

Category	*Amount*	*Percent of total*
Classrooms and laboratories	$39,371,105	42.8%
Auxiliary Instructional Facilities:		14.8%
Physical education facilities	9,416,225	
Library facilities	4,236,950	
Administrative facilities	3,700,995	4.0%
Services to Students:		4.1%
Cafeterias	2,070,100	
Health centers	1,037,210	
Student activities center	650,900	
Residence halls	16,138,100	17.6%
Essential Site and Building Services:		16.7%
Site acquisition	3,680,000	
Site development (corporation yards, boilers, and utilities)	6,309,580	
Minor construction	838,770	
Equipment	4,503,470	
Total	$91,953,405	100.0%

The classrooms and laboratories proposed will provide additional capacity for 10,500 students (FTE) to meet the over-all capaci needs by the fall of 1959.

Residence halls are proposed for 9 of 13 state college campuses. The total capacity is 2,800 men and 1,400 women students. T provisions of the dormitory program are in accordance with a Report on the Desirability, Necessity, and Feasibility of the I nancing and Construction of Residence Halls in California State Colleges and the University of California prepared pursuant Senate Concurrent Resolution No. 10 of the First Extraordinary Session of the 1954, dated February 28, 1955.

As a matter of principle it is proposed that the State supply at reasonable rental adequate housing for those students who find necessary to leave home to attend one of the State institutions of higher education. Provision of residence halls is essential accomplish three purposes: to make progress toward equating higher educational opportunities for all youth of the State; maintain a minimum number of strong and carefully planned regional colleges throughout the State; and to supervise tho youths who live away from home while attending college.

This proposal to provide residence halls is predicated upon a set of operating principles of which the following are indicated:

1. All State College housing financed from governmental sources, existing or proposed, shall be included in an integrated financ program. The repayment of any debt will be undertaken as an obligation of all facilities from the net income realized.
2. A State-wide residence hall administrative office will be established to provide financial management and operational sistance. The costs of this administration should be charged against the net operating income received from the colleges.
3. In order to assure financial stability to the program, centralized financial as well as operational standards must be establish
4. All costs in connection with maintenance and operation shall be charged against the residence hall program.
5. Rates to be charged at the residence halls should be comparable among the colleges for comparable accommodations a services with some variation made for local conditions.
6. The kitchens in the cafeterias will be for campus-wide use including the preparation of food for the residence halls. The income from the meals served to students living in the residence halls shall be applied to the amortization of the costs the residence halls.

The residence hall program proposed herein for 1957-58 consolidates the first 3 years of the 5-year building program, at th colleges where additional sites are not required. The program has been accelerated to take advantage of large scale constructi and use of identical plans for each unit of 200 students.

The initial source of financing is proposed to be the State Construction Program Fund. It is anticipated that the State will be rei bursed from residence hall operating income by 50 percent of construction cost at a rate of interest and length of time eq to that at which the State Construction Program bonds are sold.

Additional physical education facilities are provided at 7 colleges to meet the enrollment growth. 2 library buildings are proposed initial complements on the new Kellogg-Voorhis and San Bernardino Freeway campuses. Administration building additions a included for 6 colleges to house administrative and clerical staffing incidental to enrollment growth and to an administrati reorganization which is proposed for partial implementation in the support portion of the budget. 2 cafeterias and 2 heal centers are proposed to provide minimum dining and health services to students in accordance with previously accepted star ards. The first student activities center is proposed at San Jose State College to meet student body office, and recreatior needs and alumni office needs. Because of lack of site at this school, no residence halls can be provided for several years.

DEPARTMENT OF EDUCATION—Continued

GENERAL ANALYSIS—Continued

Other projects included in the 1957-58 program are essential site and building services including site development, minor construction projects, and equipment for buildings primarily financed in 1956-57, at nearly all of the colleges. The major site and utility development item is the provision for a reservoir and water distribution system at San Luis Obispo with the cost to be shared by the city, the state college, and the California Men's Colony. Site acquisition proposals include the purchase of a farm at Chico State College to implement a new 4-year agriculture curriculum and the purchase of 6½ city blocks in San Jose to enable a planned growth of the college to 16,000 regular full-time equivalent students. Future planned facilities also require campus site purchases at Chico, Humboldt, and California Polytechnic State Colleges.

Special Schools: At present, residence schools for the deaf and blind exist at Berkeley, both housed in recently expanded or modernized quarters. The maximum capacity for the school for the blind will reach 200 students in 1957-58 with the completion of the new kitchen-dining hall and the conversion of the existing kitchen and dining room into dormitories. The school for the deaf at Riverside, which began operations in 1953 with 50 students, is estimated to accommodate 420 students in the 1957-58 year. The completion of 3 additional dormitories and accompanying classrooms is anticipated in the 1957-58 year at this school. Residential schools for cerebral palsied children have been established in permanent quarters in Northern California and temporary rented quarters in Southern California. The northern school has moved into newly constructed permanent facilities on the San Francisco State College campus. In addition, one residential orientation center for intensive training of the blind, and 3 nonresidential sheltered workshops for the blind are operated in permanent quarters in Los Angeles, Oakland, and San Diego. The shops in San Diego and Oakland are housed in older structures, while the Los Angeles shop is in quarters recently acquired by the State in 1949.

(See page 1010 for Summary of all Department of Education Capital Outlay projects.)

The following table outlines actual enrollments in the several state colleges and special schools for 1955-56 and estimated enrollments for 1956-57 through 1959-60:

Actual and Estimated Enrollments—Full-time Equivalent Regular Students

Chico State College

This college, established in 1889, provides courses in teacher training, general education, and industrial arts. The campus covers approximately 86 acres and includes the following permanent buildings: administration and classroom; library; music, science, and speech building; a laboratory school; and physical education facilities.

An applied arts and science building, a social science classroom building, and a cafeteria are now under construction. An enrollment of 2,900 regular students (FTE) is anticipated in 1959.

REAL PROPERTY ACQUISITION

PROPOSED 1957-58 EXPENDITURES *

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Purchase additional campus area	–	–	$450,000
Budget Act of 1957 Proposal			
To provide 5 acres of land for additional building site including the humanities building and classroom building.			
Purchase farm site	–	–	500,000
State College Fund:			
Budget Act of 1957 Proposal			
To purchase farm site to implement a new four year program in agriculture instruction.			
TOTAL EXPENDITURES (Real Property Acquisition)	–	–	$950,000
Capital Outlay and Savings Fund	–	–	*450,000*
State College Fund	–	–	*500,000*

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1957-58 EXPENDITURES *

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Equip social science classroom building	–	–	$90,000
Budget Act of 1957 Proposal			
To equip the social science classroom building which was funded in 1956-57			
Construct 2 residence halls	–	–	1,589,240
State Construction Program Fund: [a]			
Budget Act of 1957 Proposal			
To construct 2 residence halls for 200 women and 200 men			
Construct library addition	–	–	1,119,800
Budget Act of 1957 Proposal			
To provide 825 reading stations, stack area for 113,500 volumes and other related necessary facilities for 3,300 FTE			
Construct humanities classroom building	–	–	728,200
Budget Act of 1957 Proposal			
To construct a humanities classroom building containing classrooms, activity rooms, laboratories, with related faculty offices, to house programs in fine arts and language arts for 374 students (FTE)

DEPARTMENT OF EDUCATION—Continued

Fresno State College

This college was established in 1911. The new 880-acre campus includes 720 acres for the college agricultural program. Permanent facilities include: a laboratory school, men's gymnasium, library, music building, administration building, industrial arts building, education and psychology building, science building, agriculture classroom building, agriculture units, corporation yard, and cafeteria. The following buildings are financed but construction has not started: classroom building No. 2, art-home economics building, student health services building, and engineering building. The campus is partially occupied and further moves from the old campus are expected to occur in 1956-57 and 1957-58. However, the old campus cannot be entirely abandoned until the facilities and buildings financed in 1956-57 are constructed. The final move should occur by fall, 1958.

Humboldt State College

Humboldt State College offers 4-year programs in teacher education, liberal arts, wildlife management and selected 2-year vocational training.

Established in 1914, the campus now includes 75 acres and has 9 permanent buildings, including the main building, laboratory school, industrial arts building, gymnasium, women's dormitory, corporation building, library, science building, wildlife management classroom building, and fisheries building.

Currently under construction are the wildlife facilities addition, music building, art and home economics building, and men's physical education building.

An enrollment of 1,800 regular students (FTE) is anticipated in 1959-60.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58

Long Beach State College

This college was established in 1948 as an upper division liberal arts college, and beginning in the fall of 1953, the college was authorized to offer lower division courses. In the fall of 1951 it was moved to a permanent 320-acre campus site donated by the City of Long Beach. Temporary facilities were constructed to accommodate initial enrollment.

The following permanent buildings are under construction or financed: administration, cafeteria, music, faculty office, science building addition, fine arts building, swimming pool, men's physical education building, library addition.

An enrollment of 7,000 regular students (FTE) is anticipated in 1959.

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1957-58 EXPENDITURES*

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Equip science building addition	–	–	$574,000
Budget Act of 1957 Proposal			
To equip 2 science building units financed in the Budget Act of 1956.			
Equip library addition	–	–	152,500
Budget Act of 1957 Proposal			
To equip library addition financed in the Budget Act of 1956.			
Equip fine arts building	–	–	83,000
Budget Act of 1957 Proposal			
To equip fine arts building addition financed in the Budget Act of 1956.			
Construct home economics building	–	–	423,920
Budget Act of 1957 Proposal			
To construct a home economics building to house teaching laboratories in foods, home planning, and textiles. Building to contain offices for 6 faculty and laboratories to house 106 students (FTE).			
Construct classroom addition and special activity facilities	–	–	2,616,200
Budget Act of 1957 Proposal			
To construct additional classrooms and special activity facilities to accommodate approximately 2,500 students (FTE) and 210 related faculty in various divisions of the college, including education, psychology, language arts, and social sciences.			
Construct outdoor physical education facilities	–	–	388,800
Budget Act of 1957 Proposal			
To construct additional outdoor physical education field facilities to accommodate 8 teaching stations to include tennis courts, handball courts, turf game areas, and black-top game areas for the teaching of elementary school type games and recreations			
Construct residence hall	–	–	749,160
State Construction Program Fund;[a]			
Budget Act of 1957 Proposal			
To construct a residence hall for 200 men.			
Site development	–	–	150,000
Budget Act of 1957 Proposal			
To extend utility mains.

Los Angeles State College of Applied Arts and Sciences

This is an upper division college now offering classes on the campus of the Los Angeles City College under rental agreement with the Los Angeles City School District, on its own San Bernardino Freeway campus in East Los Angeles and in temporary buildings completed on the San Fernando Valley campus in September, 1956. The budget is based on the plan that the college will no longer maintain classes on the Los Angeles City College campus by the fall of 1958. Until that time, Los Angeles State College will be operating 3 separate campuses.

The enrollment is expected to reach 5,600 regular students (FTE) on the San Bernardino Freeway campus and 3,200 regular students (FTE) on the San Fernando Valley campus in 1959.

Sacramento State College

This college was established in 1947, and moved to its present 265-acre site in 1953. The following permanent buildings are available: administration, library, science, general classroom, cafeteria, boiler plant, men's gymnasium, music-speech, commercial, and general classroom, home economics and fine arts building. 12 temporary units are used as classrooms and laboratories, including the outdoor theater and physical education units. A life science building and another general classroom building are under construction and a library addition, health service and general classroom buildings were financed in the Budget Act of 1956. An enrollment of 4,100 regular students (FTE) is anticipated for 1959.

San Diego State College

The college was established in 1899 and moved to the present site in 1931. The campus covers approximately 250 acres. Courses in general education, teacher training, industrial arts and vocational education are offered.

Buildings currently financed or under construction include a library addition, cafeteria, music-speech building, home economics building, education building and a large classroom building.

An enrollment of 7,300 regular students (FTE) is anticipated in 1959.

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1957-58 EXPENDITURES*

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Equip library addition *Budget Act of 1957 Proposal* To equip library addition financed in the Budget Act of 1956.	–	–	$340,000
Construct science building addition *Budget Act of 1957 Proposal* To construct science building addition containing classrooms, laboratories and related faculty offices to house 520 students (FTE) in chemistry and geology.	–	–	3,110,400
Additional boiler and mechanical work *Budget Act of 1957 Proposal* To construct an additional boiler and perform mechanical work in the corporation yard to service additional buildings proposed through 1962.	–	–	276,700
Construct men's physical education building and swimming pool *Budget Act of 1957 Proposal* To construct men's physical education facilities including classrooms, activity rooms, swimming pool, and related faculty offices to house the men's physical education program.	–	–	2,731,900
Construct administration building addition *Budget Act of 1957 Proposal* To construct administration building addition containing offices for business management and student personnel functions.	–	–	1,042,600
Site development *Budget Act of 1957 Proposal* To provide utilities and other site developmental services to campus facilities.	–	–	314,600
Construct physical science building addition *Budget Act of 1957 Proposal* To construct physical science building addition containing classrooms, activity rooms, and laboratories with related faculty offices to house 405 students (FTE) in physics, physical science, and astronomy.	–	–	1,651,600
Equip music-speech building for television *Budget Act of 1957 Proposal* To equip music and speech building for television, including light control board and panel for music-speech building to implement a new occupational curriculum in television.	–	–	105,000
Construct 3 residence halls *State Construction Program Fund:*[a] *Budget Act of 1957 Proposal* To construct 3 residence halls to house 400 men and 200 women students.	–	–	2,300,350
ESTIMATED 1955-56 AND 1956-57 EXPENDITURES*			
Source of funds: 1955-56 / 1956-57			
Construct library addition *Budget Act of 1956, Item 336* — 1956-57: *$1,680,750* *Budget Act of 1955, Item 399* — 1956-57: *100,500*	–	$1,781,250	–
Working drawings for science building addition *Budget Act of 1956, Item 336* — 1956-57: *90,000*	–	90,000	–
Construct classroom building *Budget Act of 1955, Item 324b* — 1955-56: *$1,947,400*; 1956-57: *—275,000*[b]	$1,947,400	—275,000[b]	–

---

* From Capital Outlay and Savings Fund unless otherwise indicated.

[a] Expenditures from bond fund not included in over-all budget totals.

[b] Unexpended balances previously reported as expended in prior years.

DEPARTMENT OF EDUCATION—Continued

San Francisco State College

This college was established in 1899. In 1939, a new campus site was acquired at 19th Avenue and Lake Merced Boulevard. Additional purchases have increased the new campus until it now covers 97.5 acres.

In addition to the existing facilities, a large classroom building is under construction and a library addition has been financed.

An enrollment of 6,500 regular students (FTE) is anticipated in 1959.

An ultimate enrollment ceiling of 9,000 regular students (FTE) has recently been established by the State Board of Education. The campus and all proposed new facilities have been masterplanned to this ceiling.

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1957-58 EXPENDITURES *

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Construct administration building addition *Budget Act of 1957 Proposal* To construct administration building addition containing offices for administrative, business management, and student personnel functions to serve the ultimate enrollment of 9,000 students (FTE).	–	–	$467,500
Construct fine arts building addition *Budget Act of 1957 Proposal* To construct fine arts building addition containing lecture, activity, and laboratory rooms with related faculty offices to house 147 students (FTE).	–		586,200
Construct classroom building No. 1 addition *Budget Act of 1957 Proposal* To construct an addition to classroom building No. 1 containing classrooms, activity rooms, and laboratories with related faculty offices for approximately 500 students (FTE) in home economics and education.	–	–	835,200
Working drawings for physical education building addition *Budget Act of 1957 Proposal* To provide working drawings for an addition to the physical education building in order that construction may be commenced in 1958 and the building made ready for occupancy by fall, 1959.	–	–	70,000
Construct science building addition *Budget Act of 1957 Proposal* To construct an addition to the science building containing classrooms and laboratories with related faculty offices to house 200 students (FTE) in biological and physical sciences.	–	–	1,901,600
Construct 3 residence halls *State Construction Program Fund:* [a] *Budget Act of 1957 Proposal* To construct residence halls to house 200 women and 400 men students.	–	–	2,261,600

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58

San Jose State College

This college, established in 1870, offers courses in general education and teacher training. Most buildings are permanent in nature except for a few temporary classrooms and some old converted houses which are to be replaced as new buildings are constructed. The 107-acre campus is split between the main downtown campus and the stadium and playfield areas.

An enrollment of 10,500 regular students (FTE) is anticipated in 1959-60.

REAL PROPERTY ACQUISITION

PROPOSED 1957-58 EXPENDITURES*

	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Site acquisition *Budget Act of 1957 Proposal* To purchase land to provide for expansion of college facilities to accommodate projected enrollments.	–	–	$2,500,000

California State Polytechnic College

Established in 1901, this college, located on 3,216 acres at San Luis Obispo, provides agricultural and vocational education, supplemented by a liberal arts program. Except for permanent administration, library, auditorium, power plant, agricultural mechanics, and engineering and science buildings, all structures are of temporary farm-type construction. Development of the master plan for this campus requires the relocation and replacement of many such buildings as each permanent building area develops.

The Southern California campuses are maintained near San Dimas. The Voorhis unit specializes in citriculture, ornamental horticulture, and related subjects, with frame and stucco classrooms and dormitories and temporary farm-type structures occupying its 150 acres. The Kellogg unit consists of 812 acres received as a restricted gift in 1952, subject to development of an instructional area thereon by 1957. To fulfill this condition, funds have been appropriated to date to provide a science (and general classroom) building, gymnasium, cafeteria, engineering building, and some agricultural instructional units.

An enrollment of 4,900 regular students (FTE) at the San Luis Obispo campus and 2,400 regular students (FTE) at the Kellogg-Voorhis campus is anticipated in 1959-60.

REAL PROPERTY ACQUISITION

PROPOSED 1957-58 EXPENDITURES*

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Site Acquisition:			
Budget Act of 1957 Proposal			
Purchase of property adjacent to San Luis Obispo campus to complete the site for the athletic fields	–	–	$57,500

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1957-58 EXPENDITURES*

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
San Luis Obispo Campus:			
Site development	–	–	$60,400
Budget Act of 1957 Proposal			
To extend utility mains.			
Construct agriculture classroom building	–	–	1,599,600
Budget Act of 1957 Proposal			
To contain classrooms, activity rooms, and laboratories with related faculty offices for 1,091 students (FTE).			
Construct men's physical education building and outdoor physical education facilities	–	–	2,518,300
Budget Act of 1957 Proposal			
To construct a men's physical education building containing classrooms, activity rooms, and offices and to construct outdoor physical education facilities including playfields, handball courts, and tennis and basketball courts.			
Construct student health service building	–	–	551,560
Equip student health services building	–	–	58,000
Budget Act of 1957 Proposal			
To provide facilities for examination, treatment, first aid, physiotherapy and related services.			
Construct home economics building	–	–	1,137,400
Budget Act of 1957 Proposal			
To construct a home economics building to contain classrooms, activity rooms and laboratories with related faculty offices for 771 students (FTE).			
Construct Whale Rock reservoir and water distribution system	–	–	1,855,000
Budget Act of 1957 Proposal			
This is the college's portion of a joint project with the Men's Colony and the City of San Luis Obispo. This project will meet water needs for the ultimate enrollment of the college.			
Construct 4 residence halls	–	–	3,159,200
State Construction Program Fund: [b]			
Budget Act of 1957 Proposal			
To construct residence halls for 600 men and 200 women students.			
Kellogg-Voorhis Campus:			
Equip animal husbandry production units	–	–	32,000
Budget Act of 1957 Proposal			
To equip animal husbandry production units funded in Budget Act of 1956.			

---

UNIVERSITY OF CALIFORNIA

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58

The University of California maintains 8 campuses throughout the State from La Jolla in the south to Davis in the north. 2 of these campuses, La Jolla and Mt. Hamilton, are research centers rather than teaching institutions. The other 6, Berkeley, Davis, Los Angeles, Riverside, San Francisco and Santa Barbara, are teaching campuses. San Francisco is a specialized institution, concentrating on medical sciences.

In addition to the 8 campuses, numerous agricultural experiment and field stations are maintained throughout the State. The capital outlay for these stations and the agricultural activities on the teaching campuses is provided from a continuing appropriation from the Fair and Exposition Fund.

Analysis

The University's capital outlay program for 1957-58 totals $25,141,214 from state sources. The projects cover all campuses and are distributed by source of funding and campuses as follows:

Campus	*Total*	*Capital Outlay and Savings Fund*	*Construction Program Fund*	*Fair and Exposition Fund*	*University Contract Overhead Funds*
Berkeley	$5,613,400	$5,211,500	$98,000	$227,600	$76,300
Davis	999,550	–	–	999,550	–
La Jolla	1,859,800	1,859,800	–	–	–
Los Angeles	10,126,014	6,653,324	98,000	3,298,390	76,300
Mt. Hamilton	71,050	71,050	–	–	–
Riverside	1,908,400	475,500	–	1,432,900	–
San Francisco	1,769,500	301,400	1,073,000	–	395,100
Santa Barbara	3,624,600	2,024,600	847,700	–	752,300
Field stations	84,100	–	–	84,100	–
State-wide	384,800	291,900	–	92,900	–
Total	$26,441,214	$16,889,074	$2,116,700	$6,135,440	$1,300,000
Less funds from University contract overhead	*—1,300,000*				
Net Total, State Funds	$25,141,214				

Pursuant to procedure approved by the Legislature in 1956, University income in the amount of $1,300,000, equal to approximately one-half the yearly increment of payments from the Federal Government for overhead on research contracts conducted by the University for federal agencies, has been applied to the financing of the University's capital outlay program. (Subsequent increments and the net income from the self-liquidating projects so financed will be similarly applied.)

The residence halls included in the program are budgeted on a comparable basis as that used for the residence hall program of the state colleges, both as to construction cost and as to the proportion of state subsidization (50 percent of construction cost to be subsidized from state funds).

Of the total of $6,135,440 from the Fair and Exposition Fund only $1,562,688 will be from current appropriations while $4,572,752 will be made available from reserves built up in prior years when the continuing appropriation was larger than the capital outlay program.

It is proposed that 4 projects, totaling $2,116,700 be financed from the State Construction Program Fund while the remainder, $16,889,074, is to be financed from the Capital Outlay and Savings Fund.

As in the past the main emphasis in the program is to provide instructional capacity to meet the increasing enrollments forecast for the immediate future. In addition to student capacity certain auxiliary facilities are necessary to properly maintain and operate the physical plants. These needs are recognized in the 1957-58 program.

The table below illustrates the number of full-time-equivalent students anticipated each year from the fall of 1955 to 1959, the target date for the completion of the projects contained in this program.

	1955	*1956*	*1957*	*1958*	*1959*
Berkeley	17,493	18,300	19,100	20,100	20,800
Davis	1,954	2,100	2,400	2,600	2,800
Los Angeles	14,160	15,100	16,600	17,400	18,500
Riverside	698	700	700	800	1,000
Santa Barbara	1,808	2,000	2,100	2,200	2,400

It should be noted that these figures do not include full-time-equivalent enrollments for physical education and military sciences. Figures for La Jolla and Mt. Hamilton are not included as they are strictly research centers. San Francisco enrollment figures are excluded as the number of students accepted is controlled by the availability of physical facilities.

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT—Continued			
PROPOSED 1957-58 EXPENDITURES *—Continued			
Riverside Campus—Continued			
Entomology building addition *Continuing appropriation, Fair and Exposition Fund* Prepare working drawings for, construct, and purchase equipment for addition to entomology building to provide additional offices, laboratories, and special purpose facilities for departments of entomology and biological control.	–	–	$381,200
San Francisco Campus:			
Combined structure unit 2—parking partial cost *Budget Act of 1957 Proposal:* *State Construction Program Fund ($1,073,000)* *University Contract Overhead Fund ($395,000)* Provide two-thirds of funds (other third to be non-State funds) needed for preparation of working drawings for and construction of parking structure with 750 parking spaces for Medical Center's clinical patients, visitors, professional staff, other employees and students.	–	–	1,468,100 [a]
Laundry alterations *Budget Act of 1957 Proposal* Prepare working drawings for, construct, and purchase equipment for mezzanine floor in laundry to provide expansion for auxiliary laundry operations (preparation of surgical packs, sewing, sorting of linens).	–	–	79,600
Heating plant expansion *Budget Act of 1957 Proposal* Prepare working drawings for and provide additional steam production capacity within existing structure.	–	–	157,400
Santa Barbara Campus:			
Fine and applied arts building *Budget Act of 1957 Proposal* Purchase equipment for fine and applied arts building, which will provide classrooms, laboratories, and offices for departments of art and industrial arts.	–	–	124,600
Physical education building (men and women) *Budget Act of 1957 Proposal* Purchase equipment for physical education building, which will provide instructional facilities and offices for departments of men's and women's physical education.	–	–	40,000
Science unit 2 *Budget Act of 1957 Proposal* Prepare working drawings and construct science unit 2 to provide classrooms, laboratories, and offices for division of biological sciences.	–	–	1,790,000
Residence hall unit 2 (400) *Budget Act of 1957 Proposal:* *State Construction Program Fund ($847,700)* *University Contract Overhead Fund ($752,300)* Provide matching funds for preparation of working drawings and construction of residence hall for 400 students.	–	–	1,600,000 [a]
Field Stations:			
Imperial Valley field station—tile drain completion and cement lining of irrigation ditches *Continuing appropriation, Fair and Exposition Fund* Prepare working drawings for and install tile drains and line irrigation ditches with cement to improve drainage in experimental fields and combat accumulation of salts.	–	–	29,600

ESTIMATED 1955-56 AND 1956-57 EXPENDITURES *

	Source of funds 1955-56	*Source of funds* 1956-57	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
State-wide:					
Preliminary plans and cost estimates for University-wide projects			$100,000	$182,400	–
Budget Act of 1956, Item 354(a)		*$150,000*			
Budget Act of 1955, Item 399(a)	*$100,000*				
Continuing appropriation, Fair and Exposition Fund		*32,400*

University Contract Overhead Funds			–	*1,250,000*	*1,300,000*
MINOR CONSTRUCTION, IMPROVEMENTS, REPAIRS, AND EQUIPMENT					
Expenditures From Budget Act Appropriation:					
Berkeley Campus:					
Architecture and city and regional planning building—partition and rehabilitate areas for increased laboratory capacity and more effective space utilization			–	–	$12,500
Men's gymnasium—retile swimming pool			–	–	20,000
Public Health Building—develop unfinished library stack area to accommodate expanded collections			–	–	19,500
Gilman Hall—remodel reassigned rooms 15 and 19 for chemical engineering			–	–	10,500
Richmond Field Station—increase water supply			–	–	18,600
Doe Library—install stacks and lighting in undeveloped first tier, step 1 of 3 steps			–	–	20,000

---

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
MINOR CONSTRUCTION, IMPROVEMENTS, REPAIRS, AND EQUIPMENT—Continued			
Expenditures From Budget Act Appropriation—Continued			
Berkeley Campus—Continued			
Cowell Hospital (student health)—replace interior steam lines, step 1	–	–	$17,500
Install additional outdoor lighting throughout campus	–	–	20,000
Richmond Field Station—increase electrical power capacity	–	–	14,500
Remodel space in Hilgard Hall for marine food technology	–	$20,000	–
Richmond Field Station—install fence for security	–	10,000	–
Richmond Field Station—remove trees, clear land, replant	–	13,700	–
Life Sciences Building—construct constant temperature rooms within room 1595 for physiology department	–	15,000	–
Gilman Hall—remodel room 3 for machine shop expansion	–	2,500	–
Botanical Garden—convert to gas heat	–	8,500	–
Dwinelle Hall—develop offices in area originally planned for lockers	–	20,000	–
Replace deteriorated heating and ventilating system in Doe Library	–	63,000	–
Replace interior water lines and improve plumbing in Haviland Hall, Doe Library, Giannini Hall, and Wheeler Hall	$78,000	–	–
Convert rooms 153 and 153A in Hearst (Women's) Gymnasium to shower and locker space for men students in coeducational physical education courses	9,000	–	–
Remodel lecture room (209) in Bacon Hall, increasing seating density and converting released space into laboratory and three offices	19,500	–	–
Rehabilitate fume hoods in various buildings	50,000	–	–
La Jolla Campus:			
Improve ventilation in Scripps Hall	–	–	12,800
Install improved electrical system in Scripps Building	–	–	15,000
Ritter Hall—convert reassigned space into biochemistry laboratory	–	–	6,000
Develop unfinished basement area of Ritter Hall addition	–	20,000	–
Remodel amphibious craft garage for aqua lung storage and maintenance, and for core storage	–	10,000	–
Remodel temporary building T-2 for marine biological research	–	6,000	–
Library Building—relocate rest rooms and construct mezzanine	–	16,500	–
Remodel space in old Ritter Hall vacated by activities moving to new building	–	20,000	–
Purchase equipment for remodeled space in old Ritter Hall vacated by activities moving to new building	–	11,000	–
Increase capacity of electrical distribution system	5,000	–	–
Remodel museum basement	5,000	–	–
Install street lights, step 1	15,000	–	–
Los Angeles Campus:			
Men's and women's gymnasiums—partition, paint, and ventilate areas for increased utilization	–	–	6,400
Men's gymnasium—provide additional exit facilities to comply with State Fire Marshal's requirements	–	–	16,600
Art Building—install spray booth and make minor improvements to exhibit facilities	–	–	2,800
Chemistry-Geology Building, Engineering Building, Life Sciences Building—install sun control devices for heat control	–	–	23,700
Medical Center—install edging and bracing on shelving for safety, and complete laboratory benches in various areas	–	–	5,000
Chemistry-Geology Building—install audio-visual facilities in auditorium-classroom 2276	–	–	4,500
Install sidewalks and electroliers on north side of LeConte Avenue between Gayley and Westwood Boulevard	–	–	9,000
Chemistry-Geology Building—convert room 4242 into expanded space for geology library	–	–	10,000
Chemistry-Geology Building—convert room 1653 into research laboratory for institute of geophysics	–	–	15,900
Medical Center—install partitions in rooms 47-175 and 48-188 to provide additional laboratory space	–	–	3,000
Men's and women's gymnasiums—install new basketball backboards and standards, and recondition outdoor basketball courts	–	–	6,000
Engineering Building—improve ventilation in room 2032 to make space usable as a classroom	–	–	4,000
Install by-pass steam line to Medical Center to insure uninterrupted steam supply	–	7,500	–
Install new water main connection to campus from Hilgard Avenue near Mira Hershey Hall	–	7,500	–
Alterations to Business Administration and Economics Building—convert room 55 to teaching laboratory for production management and construct mezzanine stack in library of industrial relations and business administration, releasing space for seminar use	–	13,900	–

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
MINOR CONSTRUCTION, IMPROVEMENTS, REPAIRS, AND EQUIPMENT—Continued			
Expenditures From Budget Act Appropriation—Continued			
Los Angeles Campus—Continued			
Convert space in Franz Hall vacated by psychology clinic school to teaching laboratories for psychology department	–	$6,000	–
Purchase and install pressure-reducing valve on main campus water supply line on Hilgard Avenue	$6,000	–	–
Replace elevator in Haines Hall	25,000	–	–
Enlarge vented area of Royce Hall stage to meet requirements of State Fire Marshal	2,000	–	–
Improve ventilation in laboratories and faculty offices in Chemistry and Geology Building	29,000	–	–
Remodel temporary building T-3 for School of Public Health	12,000	–	–
Mt. Hamilton Campus:			
Construct and equip new heating plant	–	–	$16,200
Install emergency water supply system	–	–	7,500
Main building—replace windows and exterior doors	–	–	10,000
Construct residence for astronomer	–	20,000	–
Construct road to emergency water supply	–	5,000	–
Construct residence for increased staff	15,500	–	–
Enlarge machine shop	9,000	–	–
Riverside Campus:			
Library building—make minor improvements	–	–	1,600
Library building—install additional bookstacks for expanded collections	–	–	8,000
Construct two tennis courts	–	–	17,000
Physical Science Building—convert 2 storage rooms into laboratories and develop storage room from space under lecture hall	–	11,000	–
San Francisco Campus:			
Pave, install fencing, construct carport for animal receiving building	–	–	5,400
Hooper Foundation Building—install fire sprinkling system	–	–	12,000
Shop Building—install fire sprinkling system	–	–	5,000
Provide 2 storage facilities in service area of Moffitt (Teaching) Hospital for storage of patient equipment and maintenance equipment	–	–	17,000
Construct shops at corporation yard, and pave and fence enlarged corporation yard area	–	–	20,000
Develop surface parking in the incinerator area	–	–	5,000
Install suicide-proofing barricades on fire escape stairwells adjacent to patient areas in H. C. Moffitt Hospital and Medical Sciences Building	–	20,000	–
Renovate physiotherapy pool in Clinics Building	–	4,500	–
Modernize elevators in Clinics Building	–	20,000	–
Old medical building—remove deteriorated bell tower and replace roof	–	19,500	–
Renovate steel window sash in Clinics Building	–	22,000	–
Replace deteriorated steam service lines on Parnassus Avenue	50,000	–	–
Repair walls, windows, plumbing, and tile work in nurses' domitory	21,000	–	–
Develop 100 parking spaces in Upper Edgewood area and construct retaining walls and access stairway or ramp	15,000	–	–
Santa Barbara Campus:			
Convert space for administration expansion	–	–	20,000
Construct 2 tennis courts	–	–	17,000
Convert space for biological science laboratory	–	–	13,000
Construct permanent animal house with laboratory for biological science and psychology	–	–	20,000
Install domestic water line to buildings 464 and 465	–	2,800	–
Athletic field area—construct building for rest rooms and storage	–	15,000	–
Remodel temporary buildings for six teaching departments to be relocated because of master plan revision	17,000	–	–
Convert temporary building to lecture room facilities for basic physical science courses	6,500	–	–
Install gas line and heating equipment for fire station and corporation yard buildings	7,500	–	–
Expenditures From Continuing Appropriation:			
Berkeley Campus:			
Agriculture Hall—alter space for landscape architecture	–	–	4,000
Forestry—convert storage space in room 26, Mulford Hall, to teaching laboratory	–	–	6,000
Gill Tract—remodel insectary to provide four culture and segregation rooms for biological control work	–	–	6,000

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
MINOR CONSTRUCTION, IMPROVEMENTS, REPAIRS, AND EQUIPMENT—Continued			
Expenditures From Continuing Appropriation—Continued			
Berkeley Campus—Continued			
Gill Tract—rehabilitate and expand irrigation and drainage system	–	–	$20,000
Forestry—make improvements to Meadow Valley Summer Camp, step 2	–	–	20,000
Hearst Greenhouse Range—install smog protection equipment in 4 greenhouses	–	–	12,000
Gill Tract—install fence and provide water for Area A	–	$3,500	–
Oxford Tract—improve roads, fences, drainage system, landscaping; rehabilitate old field building	–	20,000	–
School of forestry summer camp at Meadow Valley—install pipeline, bring in telephone service, make improvements to building facilities	–	4,000	–
Gill Tract—convert space in headhouse No. 3 into 6 offices and a photographic darkroom	–	13,200	–
Hilgard Hall—remodel obsolete laboratory (room 23) for soil physics research	–	10,000	–
Hearst Greenhouse Range and Gill Tract—install smog-control systems in genetics greenhouses	–	3,000	–
Hearst Greenhouse Range and Gill Tract—install smog control install sink in forestry headhouse	–	1,500	–
Purchase and install air filters and temperature controls in greenhouse range	$8,000	–	–
Erect greenhouse No. 2 for entomology and parasitology on Oxford Tract	23,326	–	–
Service outdoor work space for forestry and soils in greenhouse range	10,000	–	–
Modernize room 204, Agriculture Hall, as teaching laboratory for entomology and parasitology	9,500	–	–
Construct building for bioclimatic chambers on Gill Tract	16,000	–	–
Davis Campus:			
Widen street and add sidewalks on California Avenue between Hutchison Drive and corporation yard	–	–	12,000
Install 20 refrigerated drinking fountains in older buildings	–	–	4,600
Genetics—construct lathhouse and headhouse	–	–	10,000
Animal Husbandry—provide domestic water supply to beef field laboratory and sheep barn on area C-2	–	–	6,500
Animal Husbandry—beef field laboratory and steer shed, install concrete slabs and feed bins	–	–	10,000
Irrigation—construct storage shed	–	–	10,500
Hopkins Tract (area D)—supplement and expand domestic water supply system	–	–	20,000
Provide additional sidewalks near Memorial Union, and make other landscaping and site improvements	–	–	5,000
Install security fence around poultry space in area D-1	–	–	15,000
Construct irrigation reservoir for areas B-6, B-7, B-8, B-9	–	–	15,000
Food Technology—construct equipment storage building	–	–	20,000
Install rabbit-proof fencing in areas B-6, B-7, B-8, B-9 (15,500 feet) and E-3 (8,300 feet)	–	–	17,250
Plant Nematology—construct lathhouse	–	–	4,000
Irrigation—construct outdoor water measurement laboratory	–	–	17,000
Regrade and seal coat unsurfaced parking areas adjacent to chemistry building and library and administration building	–	6,800	–
Irrigation corporation yard—construct enclosure and pave yard area	–	10,500	–
Armstrong barn—construct concrete floor and stanchions for mud-free handling of large animals in venterinary science instruction	–	4,000	–
Irrigation and vegetable crops—install rabbit-proof fencing	–	4,600	–
Construct a shelter outside the chemistry building for the storage of inflammable, explosive, and toxic chemicals	–	6,000	–
Modernize lighting in the botany, physics, and horticulture annex buildings	–	8,700	–
Animal science building—replace deteriorated steam lines	–	25,000	–
Hopkins Tract—replace power panel	–	25,000	–
Install fire alarm boxes in buildings and connect them to campus fire alarm system	–	17,750	–
Dairy barn—improve floor and outdoor area drainage	–	1,800	–
Plant pathology—construct lathhouse	–	12,000	–
Horticulture building—renovate auditorium, replacing seats and installing floor covering	–	9,250	–
Irrigation—construct outdoor drainage laboratory	–	4,000	–
Viticulture—construct 12 lysimeters	–	4,000	–

DEPARTMENT OF EMPLOYMENT

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58

The proposed appropriations will provide for the continuation of the department's building program started in 1948-49. The long-term building programs of the Department of Employment proposes to replace leased premises with state-owned buildings where economically sound.

The department is presently leasing office space in many communities throughout the State. The acquiring of state-owned buildings will represent in the future a substantial savings in rent paid by the department. The Federal Bureau of Employment Security will provide a rental grant to the Department of Employment which will be used to amortize the cost of the building projects over a reasonable number of years. Similar grants will also be made for maintenance and repair costs during and after amortization.

The proposed projects would provide sufficient working space correctly designed to meet the specific needs and would be designed to provide for future expansion. The department is continuing its efforts to build an outstanding employment service in California; and experience here and elsewhere in the Nation indicates that suitable premises definitely contribute to employer and applicant acceptance of the program. With properly designed facilities the department can give better service to employers, applicants and claimants.

The projects included propose the construction of offices in Torrance and Vallejo, construction of off-street parking area in Sacramento, and plans and working drawings for offices in Huntington Park and Pasadena. These buildings will also provide space for other state agencies and/or Members of the State Legislature. In addition, funds are proposed for purchases of sites for off-street parking and future building expansion.

General Activities

GENERAL ANALYSIS

The proposed capital outlay program for the 1957-58 Fiscal Year includes the acquisition of 2 office building sites, 1 in San Jose and 1 in San Bernardino. The construction of office buildings on these sites will replace inadequate leased quarters and provide office space requirements at these locations.

2 major construction projects are proposed. The construction of an addition to the textbook warehouse to provide necessary expansion for textbook storage and the Printing Plant; and the construction of an office building in San Bernardino to provide office space for agencies now occupying rented quarters.

In addition, provision is made for the preparation of working drawings and foundation construction of the Los Angeles State Building garage in order to advance foundation construction and the completion date of the garage to coincide with that of the Los Angeles State Office Building.

The budget also provides for major alterations and improvements to the State Treasury to provide additional space and security; and improvements where necessary to the air conditioning system in the Old Capitol Building.

PROPOSED 1957-58 EXPENDITURES*

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Construct jockeys' room	–	–	$66,800
Fair and Exposition Fund:			
Budget Act of 1957 Proposal			
To provide dressing, working, and resting facilities for 45 jockeys during the horse racing season. The jockeys are confined to this room and a fenced outside area from the first race until the last race. A temporary jockeys' room now existing will be demolished and the proposed building will occupy the same site.			
Construct 2 race horse barns	–	–	47,800
Fair and Exposition Fund:			
Budget Act of 1957 Proposal			
To provide 1 40-stall and 1 20-stall race horse barn. These barns are required to provide stall facilities for all of the horses which run at the fair. Existing facilities are inadequate.			
Replace sheep and swine pens	–	–	31,400
Fair and Exposition Fund:			
Budget Act of 1957 Proposal			
To provide replacement of existing wooden pens with metal pens. Present pens are splintered and provide a hazard to the sheep and swine when penned. This is the first increment of a 4-year program to replace 600 pens at a rate of 150 pens each year.			
Construct incinerator	–	–	200,000
Fair and Exposition Fund:			
Budget Act of 1957 Proposal			
To provide an incinerator capable of burning 75 to 100 tons of manure, garbage, and other refuse each day during fair time. Smaller quantities will be burned during the interim period. Due to the health hazard, the city and county health departments have prohibited the past methods of disposal and are now requiring the fair to dispose this material 14 miles from the site with no assurance that the present disposal site will be available in the future.			
Reroof and repair horse barns	–	–	28,600
Fair and Exposition Fund:			
Budget Act of 1957 Proposal			
To provide funds for repairing and rehabilitating 4 existing barns used for horse show entrants. Barns were constructed in 1906 and require new roofs, new doors, and other repairs.			

ESTIMATED 1955-56 AND 1956-57 EXPENDITURES*

[a] Unexpended balances previously reported as expended in a prior fiscal year.

[b] Expenditures from bond fund not included in over-all budget totals.

DEPARTMENT OF MENTAL HYGIENE—Continued

GENERAL ANALYSIS

The Department of Mental Hygiene currently operates state-wide, 8 hospitals for mentally ill patients, 3 hospitals for mentally retarded patients, and 2 hospitals housing both mentally ill and mentally retarded patients. In addition, it is planned that wards and other physical facilities of the new Fairview State Hospital, located near Costa Mesa, Orange County, will be utilized for mentally retarded patients about September, 1957. Provision has been included in the current year capital outlay budget for bringing utility connections to the site acquired for a new hospital for the mentally ill in the San Fernando Valley. Financing for plans and construction of hospital buildings and facilities on this site will be proposed in subsequent capital outlay budgets depending on capacity needs based on population and patient forecasts.

The Langley Porter Clinic for teaching, research, and clinical purposes in connection therewith, is operated by the department in conjunction with the University of California Medical School at San Francisco; and construction of a similar facility, the Neuropsychiatric Institute as part of the Los Angeles Medical School of the University has been authorized and is expected to be completed during the 1959-60 Fiscal Year. Construction of the institute as presently planned, however, is now estimated to cost $6,446,000 which will require an additional appropriation of $1,106,000 in the 1957-58 Capital Outlay Budget.

Other major projects are proposed for financing in the 1957-58 Fiscal Year which will provide 386 net additional bed capacity for mentally ill patients and 280 additional bed capacity for mentally retarded patients. 15 additional bed capacity also will be added at Langley Porter Clinic by a remodeling project financed in this budget. The additional net capacity is expected to be completed by June 30, 1960, and will result from the following construction projects and deactivations:

a. At Atascadero State Hospital, construction of additional dormitory buildings estimated to cost $2,002,700 will add 432 beds to complete this hospital; thereby providing a total capacity of 1,540 beds for sexual psychopaths and criminal insane patients.

b. Construction of an addition to the children's unit at Camarillo, amounting to $81,750, will increase by 8 the capacity of this unit; and upon completion of the new business and medical office building, ward space now being used for offices will be released which will provide an additional 55-bed capacity, increasing total capacity of this hospital to 6,334.

c. A net increase of 46 beds at Napa State Hospital will result from the proposed construction of a new juvenile unit of 192-bed capacity at a cost of $2,553,000 and the deactivation of 2 obsolete wards of 146 bed-capacity.

d. For Stockton State Hospital, additional ward building construction will provide 420 beds. 355 of these will replace deactivated bed capacity in cottage 2 and the main male building and 65 will provide additional capacity. $2,506,900 has been included to construct the new ward building.

e. 2 condemned wards at Agnews State Hospital of 105-bed capacity and the old receiving and treatment building with 115 beds at Metropolitan State Hospital are planned for deactivation during 1957-58 and for which replacement bed capacity is not proposed in this budget.

f. 2 ward buildings at Fairview State Hospital estimated to cost $1,297,400 will provide an additional 280 beds at this new hospital for mentally retarded patients and is included for financing in the 1957-58 Budget.

Completion of the above construction projects as offset by the indicated deactivations will provide 681 net new beds in addition to presently authorized projects for 8,042 new beds, of which 3,673 are now under construction and 4,369 are to be started in the near future. The 8,723 new beds will increase the total capacity of the mental hospitals and clinics from 41,856 on June 30, 1956 to 50,579 on June 30, 1960, to care for a population estimated to increase from 41,856 to 51,124 patients during this same period. Based on the factors of anticipated total population and rate of capacity construction at the hospitals for mentally ill and mentally retarded, it is estimated there will be need for only 571 (98 for mentally ill and 473 for mentally retarded patients) additional beds by June 30, 1960. During this same period, construction of the Neuropsychiatric Institute with a 196-bed capacity is planned which, added to the 118 beds available at Langley Porter Clinic, will provide total bed capacity of 314 for the programs of these 2 institutions.

A number of other major projects are also included for financing in the 1957-58 Fiscal Year to provide necessary service facilities and essential improvements at the hospitals and clinics and are explained under their respective budgets. Essential minor construction projects in the amount of $1,020,556 are included for all hospitals. See individual hospital budgets for detail.

(See page 1010 for Summary of all Department of Mental Hygiene Capital Outlay projects.)

Langley Porter Clinic

The Langley Porter Clinic, in conjunction with the University of California School of Medicine in San Francisco, operates a research, training, and acute treatment center for Northern California. The clinic had a rated bed capacity of 95 on June 30, 1956. This budget provides for part of the equipment to be used in the 4-story addition which is financed in the current year. In the minor construction program 1 project is included to install a television antenna distribution system to aid in the rehabilitation therapy aspects of the treatment program, and another for the alteration of the insulin ward into space for the day-night hospital program which will provide for an additional 15 beds and 2 offices.

Neuropsychiatric Institute at University of California, Los Angeles

The institute is to be constructed as a wing of the University of California Hospital at Los Angeles and is to contain a children's unit, adult unit, neurosurgery (including neurology) unit, and an outpatient clinic facility. There will be laboratory space for all types of research in connection with mental illness, office space for psychiatrists, psychologists, social workers, and the administrative staff.

[a] This structure will be located on the University campus. The appropriation is made to the University and construction will be under general supervision of the University. However, the item is budgeted as a Department of Mental Hygiene project on the basis that it is primarily for mental hygiene purposes.

[b] Expenditures from bond fund not included in over-all budget totals.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58

Agnews State Hospital

This hospital for the mentally ill has a rated bed capacity of 3,762 as of June 30, 1956. Completion of the new receiving and treatment building which is planned for the 1958-59 Fiscal Year will add 512 beds to the present capacity. No additional bed capacity is submitted for the budget year, however, several other major projects including planning for a new administration building for the east area and a new boiler plant for the east area are proposed. These projects are explained in detail below. Minor construction projects totaling $90,476 are also included to correct deficiencies and improve the hospital's physical plant.

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1957-58 EXPENDITURES*

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Equipment for altered and remodeled original food service building, west area *Budget Act of 1957 Proposal* Provides equipment necessary to adapt the altered and remodeled building to use as medical offices, student nurses' quarters and patient rehabilitation facilities.	–	–	$29,800
Administration building, east area (working plans) *Budget Act of 1957 Proposal* To provide for working plans only, for the new administration building in the hospital's east area.	–	–	42,000
Install storm and sanitary sewer lines, east and west areas *Budget Act of 1957 Proposal* Project will provide the necessary sewer lines for the expanded east area and permit control of storm water drainage problems in both areas. Project to consist of construction of storm and sanitary sewer lines together with necessary pumping stations, pumps, automatic controls and electrical work.	–	–	141,200
Construct new boiler plant and utility services east area *Budget Act of 1957 Proposal* Project to provide for the required facilities to service the entire east area in both existing structures as well as those proposed on the master plan for an ultimate capacity of approximately 3,400 patients. Project to include a steam processing boiler plant, steam service lines, revised high pressure gas system and water mains and necessary street lighting.	–	–	915,900
Equipment for food service building, east area *Budget Act of 1957 Proposal* To provide the necessary equipment to properly equip the new food service building, east area, funded in the 1956-57 Fiscal Year.	–	–	96,950
Continuation of remodeling old ward buildings, west area *Budget Act of 1957 Proposal* Project to consist of remodeling and modernization of wards to conform to present-day hospital ward standards. This is a continuation of the program started in 1953.	–	–	300,000

Atascadero State Hospital

This hospital for the mentally ill is the maximum security unit of the Department of Mental Hygiene, and shows a rated bed capacity of 1,108 on June 30, 1956. It is proposed to fund the construction of 3 ward buildings and an office addition in the the budget year.

The 3 ward buildings will provide an additional 432 beds to complete the hospital with a total rated bed capacity of 1,540. The office addition will provide required office space for professional positions, and will provide additional space for the group therapy aspects of the treatment program. This addition is directly related to the needs of the increased patient population.

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1957-58 EXPENDITURES*

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Construct additional dormitory buildings to complete hospital *Budget Act of 1957 Proposal* Project to consist of construction of 3 2-story reinforced concrete ward buildings of 432-bed capacity. Necessary covered walks, paving, grounds, development, and mechanical and electrical work is included.	–	–	$2,002,700
Construct office addition to existing building *Budget Act of 1957 Proposal* Project to provide additional office space for professional positions and group therapy activities because of increased population. Project will include necessary mechanical and electrical work, site development, and utility services.	–	–	110,300

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58

Camarillo State Hospital

A hospital for the mentally ill having a rated bed capacity of 6,263 as of June 30, 1956. The proposed major construction program includes a project for a treatment addition to the children's unit which will provide 8 additional bed capacity; a project for a business and medical office building which, upon completion, will permit ward areas now being used for offices to be utilized for bed space thereby increasing the patient bed capacity by 55; and other major projects which are explained in detail below. Minor construction projects totaling $110,520 are included to correct deficiencies and further improve the hospital physical plant.

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1957-58 EXPENDITURES*

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Construct treatment addition to children's unit	–	–	$81,750
Equipment for treatment addition to children's unit	–	–	4,550
Budget Act of 1957 Proposal Project is intended to complete the juvenile unit for psychotic children by providing a treatment unit as a part of its operation, separate and apart from the adult treatment unit. The addition will increase patient capacity by 8 and will include all necessary mechanical, electrical, and grounds development work. The required additional equipment is also included.			
Construct business and medical office building	–	–	697,000
Budget Act of 1957 Proposal Project is primarily required to provide office space for professional positions currently located in temporary offices and in areas originally intended for other uses. The building will be of 2 stories and all necessary mechanical and electrical work, site development and utility services are included.			
Equipment for recreation and therapy center	–	–	28,400
Budget Act of 1957 Proposal Provides the equipment for this project funded in the Budget Act of 1956.			
Construct steam loops	–	–	45,730
Budget Act of 1957 Proposal Project consists of adding a section of new steam tunnel to complete the tunnel system between the boiler house and the male units. A ventilation system for the tunnel and the installation of insulation on 2 condensate return lines is also included.			
Install larger pipeline between water reservoirs	–		62,170
Budget Act of 1957 Proposal Project will add a larger pipeline between the upper and lower reservoirs and include a larger booster pump header, gate valves and cross connections for a wider flexibility in the existing water system.

DEPARTMENT OF MENTAL HYGIENE—Continued

Mendocino State Hospital

This hospital for the mentally ill shows a rated bed capacity of 2,270 on June 30, 1956. Authorized financing will provide an additio 131 beds during 1956-57 and a net increase of 91 additional beds during 1957-58 for a total authorized bed capacity of 2,492 June 30, 1958. Major construction projects are included for construction and equipment of a new auto repair shop and mot pool and the completion of the grounds improvement phase of the renovation program for ward 12 which is presently authoriz Minor construction projects totaling $109,750 are included to correct deficiencies and to improve the physical plant.

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1957-58 EXPENDITURES *

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Construct auto repair shop and motor pool	–	–	$123,325
Equipment for auto repair shop and motor pool	–	–	6,850
Budget Act of 1957 Proposal			
Project consists of constructing several buildings to provide auto repair and storage facilities. The present facility is located in the boiler plant and it is inadequate to maintain the hospital's fleet of autos, trucks, tractors, and related equipment. Utility services, paving, gas and oil pumps, storage tanks, and necessary mechanical and electrical work are included.			
Grounds improvements, ward 12	–	–	51,000
Budget Act of 1957 Proposal			
Project consists of road work, installation of drains on the north and east sides of the building, planting of lawn and shrubbery, installation of 6-inch water line around building and replacement of steam and condensate lines to building together with necessary electrical work. Ward 12 is presently being renovated and this project will provide the needed grounds development work.

DEPARTMENT OF MENTAL HYGIENE—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58

Metropolitan State Hospital

This hospital for the mentally ill has a rated bed capacity of 1,842 as of June 30, 1956. Completion of the new receiving and tre ment building during the current fiscal year will add 488 additional beds and ward buildings previously funded are planned add 1,600 beds in 1958-59 and another 200 when a ward building funded in the current year is completed. Three major proje are included in the 1957-58 Budget and are explained in detail below. Minor construction projects totaling $36,250 are includ to correct deficiencies and improve the hospital's physical plant.

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1957-58 EXPENDITURES *

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Construct maintenance shop buildings *Budget Act of 1957 Proposal* Project consists of the construction of 3 prefabricated steel frame, corrugated metal siding and roof buildings, on concrete slabs. Necessary and related mechanical, electrical and grounds improvement work is included. The project is required because of the increase in patient population and the corresponding expansion in the hospital's physical plant.	–	–	$418,800
Construct road improvements to hospital front entrance *Budget Act of 1957 Proposal* Project provides for off-site development which will include a paved entrance to the hospital at the new receiving and treatment building and the administration building. Frontage improvements will provide traffic channelization and a safe loading zone for vehicular passengers.	–	–	24,000
Remodel old administrative building and working plans for remodeling 5 old buildings *Budget Act of 1957 Proposal* Project consists of the remodeling and conversion of 6 existing buildings. The old administration building is planned for conversion into rehabilitation therapy and psychology offices and it is proposed to complete the work. Working plans only are proposed for the other 5 buildings which are as follows: (1) remodel kitchen into canteen, chapel, and library; (2) remodel dining room building into classrooms; (3) remodel receiving and treatment building into student nurses' quarters; (4) remodel laundry into commissary building; (5) remodel and expand present commissary building. These old buildings have been replaced by new larger buildings in order to accommodate the expansion in hospital population.	–	–	50,000

DEPARTMENT OF MENTAL HYGIENE—Continued

Napa State Hospital

This hospital for the mentally ill shows a rated bed capacity of 4,718 on June 30, 1956. The major construction program includes a project to construct a juvenile unit with a bed capacity of 192, a project to construct and equip industrial and maintenance shops and a project to share with the Veterans' Home in the construction of water supply improvements at Rector Dam. Minor construction projects totaling $91,655 are included to correct deficiencies and make improvements to the physical plant.

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1957-58 EXPENDITURES *

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Construct water supply improvements (Rector Dam)	–	–	$74,700
Budget Act of 1957 Proposal			
Project provides for improvements at Rector Dam near Yountville, California, which will permit an increase in the volume of water to be pumped into the water main that serves the City of Napa as well as Napa State Hospital. The hospital will benefit by securing additional water for its use from Rector Dam. The Veterans' Home will also benefit by this project; therefore, the financing is proposed to be shared by both Napa State Hospital and the Veterans' Home. The amount proposed represents the hospital's share of the project.			
Construct juvenile unit	–	–	2,553,000
State Construction Program Fund [a]			
Budget Act of 1957 Proposal			
Project to consist of 4 dormitories, a treatment and administration building, and a school and gymnasium building. The facility will have a bed capacity of 192 patients. This project generally is a reproduction of the juvenile unit recently completed and activated at Camarillo State Hospital.			
Construct industrial and maintenance shops	–	–	173,700
Equipment for industrial and maintenance shops	–	–	8,700
Budget Act of 1957 Proposal			
Project to consist of 2 1-story buildings. 1 building is to house the mattress and upholstery shop activity, while the other building is to house the maintenance paint shop. The present mattress and upholstery shop is located in an old temporary type building which is inadequate and hazardous. The present paint shop is inadequate for the expanded size of the hospital.

DEPARTMENT OF MENTAL HYGIENE—Continued

Patton State Hospital

This hospital for the mentally ill shows a rated bed capacity of 3,898 on June 30, 1956. The completion of 2 new ward buildings during the 1958-59 Fiscal Year will provide for 1,072 new beds. While no further bed capacity is submitted in the budget year, 5 other major projects are proposed and they are explained in detail below. Minor construction projects totaling $117,000 are included to correct deficiencies and to improve the hospital's physical plant.

CAPITAL OUTLAY EXPENDITURES	Source of funds 1955-56	Source of funds 1956-57	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT					
PROPOSED 1957-58 EXPENDITURES *					
Construction of additional utility services *Budget Act of 1957 Proposal* This project will provide increased steam service to the laundry in order to make effective use of laundry equipment, and permit replacement of wornout existing steam service lines.			–	–	$303,600
Water development, phase II *Budget Act of 1957 Proposal* Project to consist of modification of existing pumping system, installation of a 1,000,000-gallon reservoir and installation of piping necessary to meet requirements of the Municipal Fire Administrative Code.			–	–	481,800
Working plans for addition to administration building *Budget Act of 1957 Proposal* To provide plans and working drawings for a 2-story addition to the existing administration building. The addition will provide office space for doctors and social workers and house the medical records division.			–	–	30,000
Site development for two ward buildings *Budget Act of 1957 Proposal* This project provides for construction of roads, walks, yard paving, lighting, parking lots, yard toilets, and shelters for 2 new ward buildings which were funded in the 1955-56 Fiscal Year. These site development items were deleted from the scope of the ward building project due to a shortage of funds to cover the estimated cost of the total project.			–	–	448,300
Construct carport and motor pool *Budget Act of 1957 Proposal* This project provides for site development, roads, wash rack, fencing, and housing for trucks and automobiles.			–	–	28,750
ESTIMATED 1955-56 AND 1956-57 EXPENDITURES *					
Construct maintenance shops			–	$210,500	–

Stockton State Hospital

This hospital for the mentally ill shows a rated bed capacity of 4,242 on June 30, 1956. The major construction program incl projects for the construction of a 2-story ward building which will provide 420 beds of which 65 are additional and 355 replacement, construction of a laundry building addition and equipment to meet the needs of the increased patient populatio marking, mending, and tailor shop to house these activities centrally, and provides for the purchase and installation of veget preparation equipment to improve the efficiency of the food service function. Minor construction projects totaling $137,820 included to correct deficiencies and to improve the physical plant.

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1957-58 EXPENDITURES *

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Construct ward building	–	–	$2,506,900
Budget Act of 1957 Proposal			
Project consists of a 2-story ward building of 420-bed capacity which will replace 355 existing beds located in cottage 2 barracks and the third and fourth floors of the main male building. The necessary mechanical, electrical, site development work, utility services and installed equipment are included.			
Construct laundry building addition	–	–	392,200
Equipment for laundry building addition	–	–	4,700
Budget Act of 1957 Proposal			
Project consists of a steel frame and concrete addition. The project is required to process the increased laundry load due to improvement in laundry service and population expansion. The necessary demolition, mechanical, electrical, site development work, utility services, installed and other equipment are included.			
Construct marking, mending, and tailor shop	–	–	125,500
Equipment for marking, mending, and tailor shop	–	–	3,000
Budget Act of 1957 Proposal			
Project to consist of a steel and wood frame building. This structure will house activities furnishing related services at a central location to provide a more efficient and economical operation and better control of commissary stores items. All necessary mechanical, electrical, site development work, utility services, installed and other equipment are included.			
Purchase and install vegetable preparation equipment	–	–	64,250
Budget Act of 1957 Proposal			
Project is to furnish, install and connect to roughed-in services various items of vegetable preparation equipment. The project will help bring the food service function up to a more efficient and higher standard of operation.

Additional toilet facilities—employees quarters	–	–	2,000
Construct ramps, cottage F	–	–	4,500
Install combustion controls at ranch boiler room	–	–	15,000
Install street lighting, farm annex	–	$8,000	–
Install vacuum pumps in cottages 4 and 9	–	7,800	–
Install metal awnings on cottage 12, units C, D, E and F	–	3,600	–
Install centrifugal sand traps at No. 3 well	–	2,300	–
Install 2 ovens in central kitchen	–	24,000	–
Install lawn irrigation system	–	2,500	–
Renovate cottage 9	–	18,500	–
Install evaporative coolers in cottage 12	–	4,400	–
Raise deaerating heater and install hot well	–	4,600	–
Modernize and replace steam and return lines to cottage A	–	4,400	–
Install weatherstats and motorized valves in cottages D and X heating systems	–	1,250	–
Improvements to receiving and treatment unit	–	3,000	–
Rebrick Erie City boiler at farm annex	–	4,868	–
Construct canteen building, Butler type	$19,200	–	–
Complete combustion controls at annex	7,200	–	–
Replacement of lawn irrigation system, third increment	2,118	382	–
Replace front door and repair all-steel casement window operators, cottages E and F	1,215	686	–
Street lighting, farm annex	6,536	1,464	–
Tile bathrooms, cover floors, replace plumbing fixtures, repair heating system, enclose porch for added dayroom space in cottage 10	2,237	17,696	–
Resurface farm annex roads	130	2,870	–
Reroofing ward 4, male building	3,300	–	–
Partial replacement of gas distribution system, main institution	4,861	139	–
Replace old shop buildings	–	19,250	–
Install sewers for greenhouse and shop	2,527	339	–
Replace overloaded electric distribution center in laundry	4,462	62	–
Repairs and alterations to heating systems in residences 4 and 6	683	217	–
Replace old ammonia system in central kitchen with freon system	2,950	50	–
Replace old steam and return lines from cottage 9 to 11 and cottage 9 to 7	5,359	138	–
Repair walls, install metal sash and doors—milking barn	2,438	1,762	–
Renew and replace steam condensate piping and heating coil in central kitchen	3,827	558	–
Duplex boiler compound and steam line treatment pump, main institution and farm annex and 1 40 h.p. motor	1,245	680	–
Replace old circuit breakers at central kitchen and bake shop	16	3,484	–
Replace old locks at cottages A and B, also 8 door checks	2,369	1,331	–
Replace old steel 6-inch water mains and water services to cottages X and 1	2,257	35	–
Extend steam line to garage and commissary buildings	3,026	–	–
Connect steam and returns from male building to central dining room	4,579	211	–
Ventilating machinery rooms at cottages E and F	1,867	13	–
Magnesium pipe covering for exposed steam lines	1,756	44	–
Install vacuum breakers on plumbing fixtures, main institution and annex	1,972	1,178	–
Install weatherstats and motorized valves in cottages E, F, D and X heating system	965	35	–
Alterations and improvements to vegetable preparation room	–	9,000	–
Replacement of sinks	2,851	6,049	–

Fairview State Hospital

This new hospital for the mentally retarded will have ward buildings completed during the 1957-58 Fiscal Year with a total capacity of 280 beds. Since the administration building will not be completed until the 1958-59 Fiscal Year, ward space amounting to 80 beds in this first unit to be activated will be utilized temporarily for administrative offices. This will enable Fairview to open in July, 1957, and begin receiving patients, starting in September, 1957. With completion of the administration building in 1958-59, the 80 beds will become available for patients along with 710 beds in the new hospital unit, 560 beds in 2-ward buildings containing 8 wards, and 130 beds in 2 security wards. The financing of 2 additional ward buildings containing 4 wards of 280 beds is proposed in the budget year. The total financed and proposed bed capacity will amount to 1960 beds by June 30, 1960. The other major projects, all necessary to establish a new hospital, are explained in detail below.

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1957-58 EXPENDITURES*

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Site development, phase II *Budget Act of 1957 Proposal* Project is to furnish complete grounds improvements to areas surrounding structures financed through the 1956-57 Fiscal Year. The work mainly consists of finish grading, planting and seeding, and installation of irrigation systems.	–	–	$222,975
Equipment for 2 security wards, 130 beds *Budget Act of 1957 Proposal* To provide equipment required to utilize the ward buildings which were funded in the 1956-57 Fiscal Year.	–	–	59,800
Construct employees' housing units	–	–	407,000
Equipment for employees' housing units *Budget Act of 1957 Proposal* Project to consist of 2 duplex units and 4 apartment units. These housing units will help serve the recruiting needs for physicians and single employees. The necessary mechanical, electrical, grounds development work, installed and other equipment are included.	–	–	22,200
Equipment for firehouse and quarters *Budget Act of 1957 Proposal* To provide the equipment necessary to utilize the facility which was funded in the 1956-57 Fiscal Year.	–	–	6,700
Construct 2 ward buildings, 280 beds *State Construction Program Fund:* [a] *Budget Act of 1957 Proposal* Project consists of 2 1-story buildings each containing 2 70-bed wards for a total of 280 beds. Necessary mechanical, electrical, site development work, utility services and installed equipment are included.	–	–	1,297,400
Install additional boiler and controls *Budget Act of 1957 Proposal* Project consists of installation of an additional boiler of 25,000 pounds per hour capacity and the necessary controls in the existing boiler house. The additional steam capacity will be required for the buildings presently financed as well as those proposed for the 1957-58 Fiscal Year.	–	–	85,300
Equipment for school recreation field *Budget Act of 1957 Proposal* To provide the equipment necessary to fully utilize the facility which was funded in the 1956-57 Fiscal Year.	–	–	3,100
Equipment for two ward buildings, 560 beds *Budget Act of 1957 Proposal* To provide the equipment required to utilize the ward buildings which were funded in the 1956-57 Fiscal Year.	–	–	184,800
Working plans for library, occupational therapy, canteen and barbershop building *Budget Act of 1957 Proposal* To finance plans and working drawings for a building to provide for the services outlined above. An ultimate patient population of about 4,000 is expected to be served by these facilities.	–	–	33,000
Working plans for auditorium *Budget Act of 1957 Proposal* To finance plans and working drawings for an auditorium building of 800 capacity designed for motion picture shows, with a stage and dressing rooms for entertainment and dancing, and a service kitchen for other social functions. Preliminary plans indicate a project cost of $378,400.	–	–	23,000

Pacific State Hospital

This hospital for the mentally retarded shows a rated bed capacity of 2,409 on June 30, 1956. The completion of 3 new ward buildings and new hospital annex during 1956-57 will provide an additional 539 beds which together with a capacity adjustment of 54 will provide a net increase of 485 during the current year. The major construction projects proposed for the budget year include the additional mechanical services required for the enlarged hospital, modernization, repair, and equipping of 2 ward buildings, equipment for the new laundry, and installation of a ventilating system for the medical ward on the second floor of the original hospital unit. Minor construction projects totaling $87,410 are included to correct deficiencies and to improve the physical plant.

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1957-58 EXPENDITURES*

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1955-56	ESTIMATED 1956-57	PROPOSED 1957-58
Additional mechanical services for enlarged hospital	–	–	$455,900
Budget Act of 1957 Proposal			
Project consists of replacing 1 boiler and replacing and rearranging certain boiler room auxiliary equipment to provide for increased steam requirements and proper standby reserve as a result of the addition of the hospital annex, 3 new wards, and the new laundry.			
Modernize and repair 2 wards	–	–	268,800
Equipment to modernize and repair 2 wards	–	–	6,000
Budget Act of 1957 Proposal			
Project includes the construction of a serving kitchen, installation of new partitions, modernization of electrical services and lighting, improvements to heating and ventilating systems, additional plumbing facilities, and other alterations. Site improvement work includes additional parking area, change of rain water collection system, minimum grading and foundation planting, and manual controlled irrigation.			
Equipment for new laundry	–	–	9,200
Budget Act of 1957 Proposal			
Project consists of purchasing and installing new equipment in the new laundry building which was funded in the 1956-57 Fiscal Year.			
Install mechanical ventilation system in medical ward	–	–	62,200
Budget Act of 1957 Proposal			
Project will provide a filtered and tempered air system for the medical ward on the second floor of the original hospital unit.
